Native plants are a foundation of ecological function, affecting soil conservation, wildlife habitat, plant communities, invasive species, and water quality. Establishing locally-adapted, self-sustaining plant communities can also support transportation goals for safety and efficiency. Past obstacles to establishing native plant communities on roadsides have been technical, informational, and organizational. Effective strategies and practical techniques for revegetating the disturbed conditions with limited resources must be made available to practitioners. Multiple disciplines, ranging from engineering to soil science, ecology, botany, and

wildlife science, must be able to work cooperatively, not in isolation. This report offers an integrated approach to facilitate the successful establishment of native plants along roadsides and other areas of disturbance associated with road modifications. It guides readers through a comprehensive process of: 1) initiating, 2) planning, 3) implementing, and 4) monitoring a roadside revegetating project with native plants.

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Includes a statistical issue (title varies slightly) 1947-When the beautiful Taiwanese model Kaelyn Yen is drugged and held captive by the manager of one of America's most coveted modelling agencies, she realises the recent deaths of her sister, mother, and father were not accidents, but meticulously planned events initiated by her Triad-affiliated relatives. Soon after, the Mafia assumes control, and Kaelyn's

boyfriend joins forces with the FBI to bring her extortionists to justice. However, not all schemes go according to plan. What begins as a routine kidnap and rescue soon escalates into an international pursuit through the streets of Los Angeles, San Francisco, Taipei, and Hong Kong. It leads to the torture and murder of Kaelyn's two best friends, and causes the FBI's key witness to commit suicide just weeks before she is due to give evidence in court. Spanning the globe from America to Asia, and set amidst a backdrop of Hollywood glitz-and-glamor, mixed cultures, and criminal activity, Death on Pause is a riveting crime/thriller based on a real person's living nightmare and the events that have since dominated her once blessed and envious life.

When purchasing your vehicle, you should probably expect to be lied to by everyone from the sales department to the financial department. Apples, Oranges, and Lemons is a one-of-a-kind, tell-all book about the automobile trade that reveals inside secrets they don't want you to know. There is no other book like it. It is written by the only person who could, or would. Phillip James Grismer knows the automobile industry from the inside out. He first apprenticed in a number of import auto shops, eventually rising through the ranks and opening his own facility. Grismer draws on his thirty-seven years of experience to expose how the industry really works. He provides answers on how to deal with a "lemon" while offering advice on how to make the best buy before purchasing your vehicle. Discover how the valuation and appraisal process works and how the history of your vehicle affects you and your money. Grismer's conversational style makes the

information accessible while offering personal insight on the process of vehicle manufacturing and servicing. Even the most casual reader will be enlightened and entertained by the inner workings of the automobile manufacturing, sales, and service industry. But most importantly, this handy reference guide empowers the consumer to make well-informed decisions about vehicles.

Hiking Waterfalls in Northern California includes detailed hike descriptions, maps, and color photos for the area's most scenic waterfall hikes. Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In Technobiophilia: Nature and Cyberspace, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. Technobiophilia: Nature and Cyberspace offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature

balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. www.technobiophilia.com

Today's construction environment is changing at an unprecedented pace and executives are facing a diverse set of issues – globalization, economics, workforce demographics, and technology. Moreover the traditional issues of competition and delivery are being challenged by new laws and new industry entrants; and the tasks of project and organization management are being overhauled. This all demands greater leadership from

senior management. Construction executives typically reach senior level after many years mastering the art of project management, which has given them very little time or opportunity to learn the concepts and principles of organization leadership – unlike their counterparts in other industries who have been steeped in this. This book provides a comprehensive overview of the key issues that organization leaders must understand and address. It provides concise summaries by leading international authorities of the ten key strategic management issues, shows how they have emerged, and outlines their potential impact on the construction organization.

In 2015, the Institute of Medicine (USA) issued a report critical of the research effort and clinical care for ME/CFS (Myalgic Encephalomyelitis/Chronic Fatigue Syndrome) formerly known as Chronic Fatigue Syndrome (CFS) and Chronic Fatigue Immune Deficiency Syndrome (CFIDS). While worldwide investigation into the cause and nature of ME/CFS remains disproportionately small, and treatment remains symptomatic and controversial, modest research continues in all aspects of this disease: epidemiology, possible infectious origins and other triggers, possible involvement of genetics, metabolism, and microbiome, influence of co-morbid conditions, and more. Treatment of patients consists of providing symptomatic relief. Guidance in doing so is provided for the clinician. School-age children require not only treatment but, as revealed in a 25-year retrospective study, continued engagement with peers and social activity. This e-book explores the breadth and depth of

current ME/CFS research and clinical care. Its impact for other chronic, complex illnesses should not be overlooked.
