Surrealism Beyond Borders challenges conventional narratives of a revolutionary artistic, literary, and philosophical movement. Tracing Surrealism's influence and legacy from the 1920s to the late 1970s in places as geographically diverse as Colombia, Czechoslovakia, Egypt, Japan, Korea, Mexico, the Philippines, Romania, Syria, Thailand, and Turkey, this publication includes more than 300 works of art in a variety of media by well-known figures—including Dalí, Ernst, Kahlo, Magritte, and Miró—as well as numerous artists who are less widely known. Contributions from more than forty distinguished international scholars explore the network of Surrealist exchange and collaboration, artists' responses to the challenges of social and political unrest, and the experience of displacement and exile in the twentieth century. The multiple narratives addressed in this expansive book move beyond the borders of history, geography, and nationality to provocatively redraw the map of Surrealism.

Macro cognition in Teams provides readers with a greater understanding of the macrocognitive processes which support collaborative team activity, showcasing current research, theories, methodologies and tools. It will be of direct relevance to academics, researchers and practitioners interested in group/team interaction, performance, development and training. This study was initiated to provide information on the productivity of lesser snow geese from Banks Island. Its objectives were to gather information on the number of nesting geese, nesting success, and gosling survival; evaluate the impact of weather and predation on the productivity of geese; and determine the impact of grazing by geese on plant communities.--Includes text from document.

Covers employers of various types from 100 to 2,500 employees in size (while the main volume covers companies of 2,500 or more employees). This book contains profiles of companies that are of vital importance to job-seekers of various types. It also enables readers to compare the growth potential and benefit plans of large employers.

Challenging the mainstream view of the environment as either threatening or valuable, this book considers how geographic knowledge can be applied to offer a more nuanced understanding. Framed within geopolitics and using a

range of methodologies, the chapters encapsulate different approaches to demonstrate how selective forms of knowledge, measurement, and spatial focus both embody and stabilize power, shaping how people perceive and respond to changing features of human-environment interactions.

Ever wanted to hop on your bicycle and pedal all across the U.S? Alone? On a no-frills, self-contained mountain bike? Meet dozens of quirky, interesting, and at times naked individuals? Beginning in Yorktown, Virginia, and ending in Florence, Oregon, Jane pedals 4,120 miles over two and a half months to really discover small-town America, following the TransAmerica Bicycle Trail. Take this inner and outer journey alongside her, as the back roads unroll a tapestry of sights and experiences. She meets soul-jarring heat and humidity in Kentucky hollers, encounters numbing expanses of Midwestern flatland, and witnesses blindingly beautiful Montana scenery. Taking it day-by-day, this journal account (with photos) of her trip is much more than a diary: you experience the joys, surprises, and challenges she meets along the way, as a woman traveling alone and exploring insights into human nature, politics, family, religion, feminism, racism, and history. Serendipity greets her in numerous funny and unexpected ways. When she finally reaches the foggy Oregon Pacific coast, you will cheer, too, having traveled and grown along with her. Written in easy, humorous style with detailed travel descriptions and ideas you can use to design your own trip.

When four friends--three boys and a girl--narrowly survive a snowmobile accident in British Columbia's remote Cariboo region, they decide that they are fated to die together and split into twos to avoid that end, only to take needless risks and to find they cannot keep apart.

A teenager bravely battles cancer with his faith sustaining him, while his father searches for a cure to save him in this heartfelt and true story. In April of 2000, seventh-grader Kevin Triplett learns he has osteosarcoma, a rare form of bone cancer. Kevin fights a courageous battle, and his father, Wayne, does everything within his power to help his son win the greatest fight of his young life. Kevin battles his disease valiantly, submitting himself to many cutting-edge, newly discovered therapies. He keeps his spirits high during his treatments, learns to play the guitar, and even forms a Christian rock band. Most importantly, his faith in Jesus Christ carries him through his journey, which ends in 2006. Kevin touches many lives, and the positive influence he has on people, young and old, endears him to everyone. This Little Light Of Mine is the story of his courageous battle against cancer and is peppered with many personal recollections. Grounded in an uncompromising faith in Jesus Christ, Kevin knows that whatever happens during this battle, he will be fine. An inspiring, true story of a son's perseverance and a father's dogged determination to keep him alive, this must read book offers encouragement to all cancer patients and their families.

UNEP Year Book 2009: New Science and Developments in our Changing Environment presents work in progress on scientific understanding of global environmental change, as well as foresight about possible issues on the horizon. The aim is to raise awareness of the interlinkages among environmental issues that can accelerate the rates of change and threaten human

wellbeing. The chapters of the Year Book track the same trajectory as our awareness of environmental change. Transformations are inherent to this trajectory and are taking place on many fronts: from industrial agriculture to eco-agriculture; from a wasteful society towards a resource efficient one; and from a triad of competing interests among civil society, the private sector, and governments to a more cooperative model based on mutual benefits.

This multi-volume series provides detailed histories of more than 8,500 of the most influential companies worldwide.

Robert Sochia, a young man just acquitted of murder, returns to face the hostility of his home town not far from the Canadian border. Julia, a recently arrived music student, befriends him and helps him start a new life. When a suspicious fire burns his house to the ground, the outlaw suddenly abducts Julia. This small, provincial community gathers a search party to rescue her, with comical and disastrous results. Mason Smith's new novel is an exuberant, often humorous celebration of the human voices of a distinct place.

The earth's cryosphere, which includes snow, glaciers, ice caps, ice sheets, ice shelves, sea ice, river and lake ice, and permafrost, contains about 75% of the earth's fresh water. It exists at almost all latitudes, from the tropics to the poles, and plays a vital role in controlling the global climate system. It also provides direct visible evidence of the effect of climate change, and, therefore, requires proper understanding of its complex dynamics. This encyclopedia mainly focuses on the various aspects of snow, ice and glaciers, but also covers other cryospheric branches, and provides up-to-date information and basic concepts on relevant topics. It includes alphabetically arranged and professionally written, comprehensive and authoritative academic articles by well-known international experts in individual fields. The encyclopedia contains a broad spectrum of topics, ranging from the atmospheric processes responsible for snow formation; transformation of snow to ice and changes in their properties; classification of ice and glaciers and their worldwide distribution; glaciation and ice ages; glacier dynamics; glacier surface and subsurface characteristics; geomorphic processes and landscape formation; hydrology and sedimentary systems; permafrost degradation; hazards caused by cryospheric changes; and trends of glacier retreat on the global scale along with the impact of climate change. This book can serve as a source of reference at the undergraduate and graduate level and help to better understand snow, ice and glaciers. It will also be an indispensable tool containing specialized literature for geologists, geographers, climatologists, hydrologists, and water resources engineers; as well as for those who are engaged in the practice of agricultural and civil engineering, earth sciences, environmental sciences and engineering, ecosystem management, and other relevant subjects. "The selection of species to include in this book was based on two principles: 1. Those that in recent times had a viable, naturally occurring wild population in Canada, its continental islands, or in the marine waters of its continental shelf ... [and] 2. Species introduced into Canada by humans"--P. xiv.

A rebellious and willful woman, author Raven White spent years stewing her organs in lethal concoctions of alcohol, meth, marijuana, and cocaine. Running from relationships and self-medicating was routine. Colon cancer and a life expectancy of three to five years became the "cure" she needed to hear God's voice. In Bad Can Be Broken, she narrates the story of how stage four colon cancer at first was her nemesis, but how it ultimately became the reason she now lives a life filled with love, joy, and peace. This memoir details her specific struggles, including being a cancer warrior, and it also discusses the challenges she faced long before accepting God. White tells how she believes the karma racked up in her teens through her late thirties led to having to swallow the weight of a life-threatening illness. Touching on spirituality and maturing as a human being, Bad Can Be Broken offers hope and inspiration. White shows how she found peace and purpose and tells how it is available for others facing the same challenges.

It was at Wounded Knee, huddled under a night sky lit by military flares and the searchlights of armored personnel carriers, that Vietnam vet Woody Kipp realized that he, as an American Indian, had become the enemy, the Viet Cong, to a country that he had defended at the risk of his life. With candor, bitter humor, and biting insight, this book tells the story of the long and tortuous trail that led Kipp from the Blackfeet Reservation of his birth to a terrible moment of reckoning on the plains of South Dakota. Kipp's is a story of Native values and practices uneasily intersected by cowboy culture, teenage angst, and quintessentially American temptations and excesses. As a boy, Kipp was a passionate reader and basketball player, always ready to brawl and already struggling with discrimination and alcoholism in his teens. From his tour of duty in Vietnam as a Marine to his troubled return, from his hell-raising as a violent, womanizing, hard-drinking horse breaker to his consciousness-raising experiences as a college student and foot soldier in the American Indian Movement, Kipp's memoir offers a unique, firsthand view of the enduring power and the vulnerability of Blackfeet culture, of the difficulties inherent in cross-cultural understanding, and of the urgent necessity of overcoming these difficulties if the essential heritage of Native America is to survive.

This textbook presents a comprehensive overview of the environmental impacts of various types of outdoor recreation, and how these can be best managed. As a field of study, recreational ecology is both multidisciplinary and interdisciplinary, and the authors seek to develop a deeper understanding of both the role and function of the factors that influence visitor numbers and their impact.

An accessible and comprehensive textbook, it features numerous types of outdoor recreational activities including hill walking, rock climbing, mountain marathons, skiing, scuba diving and more. Drawn from several global case studies, the authors estimate the current and future numbers involved in outdoor recreation, and how best these numbers can be managed. Effective visitor impact management actions arise from collaboration between recreation ecologists, social scientists, experienced recreation managers, recreation stakeholders and the recreationalists themselves: as such, this book will be multi-disciplinary in scope. This practical and engaging textbook will be invaluable to students and scholars of outdoor recreation and adventure tourism as well as practitioners and managers working in the field.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

From #1 New York Times bestselling author Lisa Jackson comes the chilling, riveting novel that first introduced Detectives Selena Alvarez and Regan Pescoli, hunting for a serial killer who is both savior and executioner... In the lonely woods around Grizzly Falls, Montana, the first body is discovered, stripped naked and tied to a tree. Alvarez and Pescoli have been hoping for a career-making case, but this is a nightmare. The killer stages car accidents on icy, isolated roads and "rescues" his victims. He toys with them, heals them, earns their trust . . . before subjecting them to a slow, agonizing death. When Jillian Rivers opens her eyes, she's trapped in a mangled car. Then a stranger, claiming to be a trail guide, pries her free. Though she's grateful, something about him sets Jillian on edge. And if she knew what was lying in wait for her, she'd be truly terrified . . . Even with the FBI involved, Selena and Regan have nothing to go on but a series of cryptic notes, and the unsettling knowledge that there is much worse to come. Piece by piece, the killer's brutal plan is taking shape. But his final move will be the most shocking—and personal—of all . . .

"Put your mittens on; you'll freeze to death!" admonish the world's grandmothers as the temperature plummets. No doubt the Arctic explorers--today in their GORE-TEX, historically in their woolens--needed no such instruction. Icy climes bring with them the dangers of frostbite, but also the poetic beauty of glaciers and ice shelves, of ice palaces and aurora borealis. Karal Ann Marling explores these topics and more as she considers the history of "hard, cold water." What better place to start than with dessert? The pleasure of ice cream on a hot day has been known since the sixteenth century, although it wasn't until a few hundred years later that reliable refrigeration made the treat readily available. Marling expands her icy explorations to the realm of fiction--the ice crossing in Uncle Tom's Cabin, the frozen wasteland of Frankenstein--and to the movies and Broadway. Cities vie for tourists by

building shimmering ice palaces to celebrate winter; explorers compete to reach the poles, and not all live to tell the story. The study of ice by a true aficionado yields fascinating insights and may just inspire readers to embrace winter-or to make their way to the nearest ice cream shop. Karal Ann Marling is a professor emerita of art history and American studies at the University of Minnesota. She is the author, most recently, of Merry Christmas!: Celebrating America's Greatest Holiday and Illusions of Eden: Visions of the American Heartland.
