Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

First Published in 1966. Routledge is an imprint of Taylor & Francis, an informa company.

The human bait was the boys themselves. Hal and Roger Hunt have been sent on a terrifying mission -- they must save the population of Mito Andei from a man-eating lion. But the 'King of the Beasts' isn't the only thing trying to kill the boys... Have the brothers bitten off more than they can chew this time?

On a visit to Don's Safari, the students in class 2B attempt to find a missing hippopotamus.

Walter Rodney is revered throughout the Caribbean as a teacher, a hero, and a martyr. This book remains the foremost work on the region.

"Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's Book of the Damned was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"--Taken from Good Reads website.

This book will tell all you need to know about British English spelling. It's a reference work intended for anyone interested in the English language, especially those who teach it, whatever the age or mother tongue of their students. It will be particularly useful to those wishing to produce well-designed materials for teaching initial literacy via phonics, for teaching English as a foreign or second language, and for teacher training. English spelling is notoriously complicated and difficult to learn; it is correctly described as much less regular and predictable than any other alphabetic orthography. However, there is more regularity in the English spelling system than is generally appreciated. This book provides, for the first time, a thorough account of the whole complex system. It does so by describing how phonemes relate to graphemes and vice versa. It enables searches for particular words, so that one can easily find, not the meanings or pronunciations of words, but the other words with which those with unusual phoneme-grapheme/grapheme-phoneme correspondences keep company. Other unique features of this book include teacher-friendly lists of correspondences and various regularities not described by previous authorities, for example the strong tendency for the letter-name vowel phonemes (the names of the letters) to be spelt with those single letters in non-final syllables.

Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky. Sections on the archaeoastronomy of South Asia and South East Asia have been expanded, with original photography and new research on temple alignments in Southern India, and new material describing the astronomical practices of Indonesia, Malaysia and other Southeast Asian countries. Beautiful photographs of temples in India and Asia have been added, as well as new diagrams explaining the alignment of these structures and the astronomical underpinnings of temples within the Pallava and Chola cultures. From new fieldwork in the Four Corners region of North America, Dr. Penprase has included accounts of Pueblo skywatching and photographs of ceremonial kivas that help elucidate the rich astronomical knowledge of the Pueblo people. The popular "Archaeoastronomy of Skyscrapers" section of the book has been updated as well, with new interpretations of skyscrapers in Indonesia, Taiwan and China. With the rapid pace of discovery in astronomy and astrophysics, entirely new perspectives are emerging about dark matter, inflation and the future of the universe. The Power of Stars puts these discoveries in context and describes how they fit into the modern perspective of cosmology, which has arisen from the universal human response to the sky that has inspired both ancient and modern cultures.

This funny, exciting and best-selling story takes you behind the scenes as eight-year-old Edward trains for the greatest swimming marathon of all!

In view of the rapidly changing ecology of Africa ,this work provides benchmarks for some of the major, and more neglected, aspects, with an accent on historical data to enable habitats to be seen in relation to their previous state, forming a background reference work to understanding how the ecology of Africa has been shaped by its past. Reviewing historical data wherever possible it adopts an holistic view treating man as well as animals, with accent on diseases both human and animal which have been a potent force in shaping Africa's ecology, a role neglected in ecological studies.

Translation and edition. The additional documents, in translation, comprise a letter by Antoine Malfante, 1447, an account of the voyages of Diogo Gomes, c. 1456, and extracts

from João de Barros, *Decadas de Asia*. This is a new print-on-demand hardback edition of the volume first published in 1937. Owing to technical constraints it has not been possible to reproduce the map of "North-western Africa in the fifteenth century" which appeared in the first edition of the work.

Reproduction of the original: *The Casement Report* by Roger Casement

The diary of Heinrich Witt (1799-1892) is the most extensive private diary written in Latin America known to us today. Written in English by a German migrant who lived in Lima, it is a unique source for the history of Peru, and for international trade and migration.

Series contains structured teaching units for nine most commonly studied text types.

Hey diddle diddle, you all know the riddle, a cow jumps over the moon... But the moon is very high in the sky. How many attempts will it take before Cow makes her famous highflying leap?

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

Eighty-four champion hippopotamuses hit the Zamboola River with a thunderous crash and the 27th Annual African Hippopotamus Race has begun!

Lottie secretly knows there is a shark in the pool waiting to eat her, until her new walrus friend, Walter, helps her to conquer her fear.

Emmett shows how Pentecostalism in Belgian Congo was pioneered by W.F.P. Burton alongside local agency. Burton had a passionate desire to see the emancipation of humankind from the spiritual powers of darkness believing only Spirit-empowered local agency would prove effective.
