An author subject index to selected general interest periodicals of reference value in libraries.

The present report deals with the problems involved in the greater utilization and development of aircraft engine materials, and specifically; piston materials, cylinder heads, exhaust valves, and exhaust gas turbine blading. The blades of the exhaust gas turbine are likely to be the highest stressed components of modern power plants from a thermal-mechanical and chemical standpoint, even though the requirements on exhaust valves of engines with gasoline injection are in general no less stringent. For the fire plate in Diesel engines the specifications for mechanical strength and design are not so stringent, and the question of heat resistance, which under these circumstances is easier obtainable, predominates.

Finally! A restoration guide with the kind of detail needed for a first class job. How to Restore Classic Farm Tractors is packed with hundreds of helpful full-color photographs, proven tips and techniques, and money-saving advice from restorers who know what works . . . and what doesn't. This guide will walk you step-by-step through the complete restoration of your tractor from disassembly to engine rebuild, from electrics to painting and final detailing. There's even a handy section on parts sources. So, no matter if you favor John Deeres, Fords, Farmalls, A-Cs, or Minnie-Mos, with Gaine's guidance you're well on your way to showing off your shiny "new" classic tractor! Tharran Gaines has specialized in agricultural writing for the past 25 years. He has written owners' manuals, repair guides, and sales brochures for most of the major tractor companies, such as ACGO's Allis-Chalmers, White, and Hesston lines.
