Often for the purpose of preparation candidates struggle to look for important topics and browse through some valuable concepts, they feel might be asked in an interview. Such a frantic search consumes a lot of time and energy, as it requires going through high volumes of ABAP technology. In order to solve this dilemma here is SAP ABAP/4 Interview Questions Book, which is well equipped to deal with such problems.

"SAP R/3 Reporting" shows how to deliver effective reports for every area of the enterprise. It's the first book to focus specifically on SAP R/3 reporting. Curran begins by introducing SAP R/3's key information systems, data resources, and business processes. Next, he reviews specific reports for financials, logistics, HR, asset management, and shows how to build reports that are readable, accurate, and timely. Finally, Curran introduces ActiveSheets, third-party software that streamlines reporting by working through Microsoft Excel. A working ActiveSheets demo is included on CD-ROM.

Provides an overview to the exam's topics, including a "Need to Know" list that identifies areas that must be understood in-depth. Includes exercises that can be performed, usually with a smallest BW server. Contains practice test questions that assess the readers knowledge of the current exam topics. Serves as a complement to the classroom training provided by SAP.

Praxis und Wissenschaft sind sich einig, dass die elektronische Beschaffung indirekter Güter (Nicht-Produktionsmaterial) wenig Wettbewerbsvorteile schafft. Die weitaus größeren Herausforderungen und Einsparpotenziale liegen in der Beschaffung direkter Güter (Güter, die in die Leistungen eingehen). Häufig machen diese einen großen Teil des wertmäßigen Beschaffungsvolumens aus und sind von strategischer Bedeutung. Aus der Sicht von Anwender-, IT-Anbieter- und Beratungsunternehmen sowie der Wissenschaft, bietet dieses Buch erstmals den ganzheitlichen Überblick über Strategien, Prozesse, Systeme und Trends im Bereich der Beschaffung direkter Güter.

Designed as an introduction to the basics of ABAP or as a quick certification review, this book guides the reader through the intricacies of this programming language used by SAP components and applications (e.g., R/3, NetWeaver, etc.). It is currently positioned, alongside the more recently introduced Java, as the language for programming SAP's Web Application Server, part of its NetWeaver platform for building business applications. The question and answer format provides the reader with all of the details to pass certification exams in a step-by-step, easy to read, method of instruction.

implementation. Void of theoretical treatments and preoccupation with language syntax, SAP ABAP is a comprehensive, practical one stop solution, which demonstrates and conveys the language's commands and features through hands on examples. The accompanying e-resource is a take off point to the book. SAP ABAP works in tandem with the accompanying e-resource to create an interactive learning environment where the book provides a brief description and an overview of a specified feature/command, showing and discussing the corresponding code. At the reader's option, the user can utilize the accompanying e-resource, where a step-by-step guide to creating and running the feature's object is available. The presentation of the features is scenario oriented, i.e. most of the features are demonstrated in terms of small business scenarios. The e-resource contains the scenario descriptions, screen shots, detailed screen cams and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature/command are conveyed through execution of these hands-on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects including the programs rely on some of the SAP application tables being populated, for example an IDES system which is now a de facto system for all SAP training related activities.
