Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals July - December)

Beer and Johnston's Mechanics of Materials is the uncontested leader for the teaching of solid mechanics. Used by thousands of students around the globe since publication, Mechanics of Materials, provides a precise presentation of the subject illustrated with numerous engineering examples that

students both understand and relate to theory and application. The tried and true methodology for presenting material gives your student the best opportunity to succeed in this course. From the detailed examples, to the homework problems, to the carefully developed solutions manual, you and your students can be confident the material is clearly explained and accurately represented. McGraw-Hill is proud to offer Connect with the seventh edition of Beer and Johnston's Mechanics of Materials. This innovative and powerful system helps your students learn more effectively and gives you the ability to assign homework problems simply and easily. Problems are graded automatically, and the results are recorded immediately. Track individual student performance - by question, assignment, or in relation to the class overall with detailed grade reports. ConnectPlus provides students with all the advantages of Connect, plus 24/7 access to an eBook Beer and Johnston's Mechanics of Materials, seventh edition, includes the power of McGraw-Hill's LearnSmart--a proven adaptive learning system that helps students learn faster, study more efficiently, and retain more knowledge through a series of adaptive questions. This innovative study tool pinpoints concepts the student does not understand and maps out a personalized plan for success.

Statics of particles -- Rigid bodies: equivalent systems of forces -- Equilibrium of rigid bodies --

Distributed forces: centroids and centers of gravity --
Analysis of structures -- Internal forces and moments
-- Friction -- Distributed forces: moments of inertia --
Method of virtual work -- Kinematics of particles --
Kinetics of particles: Newton's second law -- Kinetics
of particles: energy and momentum methods --
Systems of particles -- Kinematics of rigid bodies --
Plane motion of rigid bodies: forces and
accelerations -- Plane motion of rigid bodies: energy
and momentum methods -- Kinetics of rigid bodies in
three dimensions -- Mechanical vibrations

The approach of the Beer and Johnston texts has been appreciated by hundreds of thousands of students over decades of engineering education. The Statics and Mechanics of Materials text uses this proven methodology in an - extensively revised second edition aimed at programs that teach these two subjects together or as a two semester sequence. Maintaining the proven methodology and pedagogy of the Beer and Johnson series, Statics and Mechanics of Materials, second edition combines the theory and application behind these two subjects into one cohesive text. A wealth of problems, Beer and Johnston's hallmark sample problems, and valuable review and summary sections at the end of each chapter highlight the key pedagogy of the text. Also available with this second edition is Connect. Connect is the only integrated learning system that empowers students by

Vector Mechanics for Engineers

Continuing in the spirit of its successful previous editions, the tenth edition of Beer, Johnston, Mazurek, and Cornwell's Vector Mechanics for Engineers provides conceptually accurate and thorough coverage together with a significant refreshment of the exercise sets and online delivery of homework problems to your students. Nearly forty percent of the problems in the text are changed from the previous edition. The Beer/Johnston textbooks introduced significant pedagogical innovations into engineering mechanics teaching. The consistent, accurate problem-solving methodology gives your students the best opportunity to learn statics and dynamics. At the same time, the careful presentation of content, unmatched levels of accuracy, and attention to detail have made these texts the standard for excellence.
