The Adventure Motorcycle Maintenance Manual is the definitive guide to keeping an adventure motorcycle running in the way it should. Written for the rider who wants to be self-reliant while on the road, the book takes the reader through a series of practical, hands-on techniques designed to keep the bike in peak riding condition. In the classic Haynes style, the book uses picture-led chapters and clear step-by-step instructions to demonstrate the skills needed for basic maintenance both at home and on the trail.

Written by bestselling author Manuel Molles and acclaimed science journalist Brendan Borrell, this new textbook gives non-major students the scientific foundation they need to understand environmental issues and think critically about possible solutions. Molles and Borrell make clear the connections between research and real-world problems with a "science/issues/solutions" framework for each chapter. This unique approach reinforces a positive, solutions-based framework for the science, empowering students to feel that they can have an impact on preserving biodiversity, protecting natural resources, addressing pollution hazards, confronting climate change, and more.

“Masterfully captures the largely forgotten saga of warrior queens through the ages . . . an epic filled with victory, defeat, and legendary women.” —Patrick K. O’Donnell, bestselling author of *The Indispensables* History’s killer queens come in all colors, ages, and leadership styles. Elizabeth Tudor and Golda Meir played the roles of high-stakes gamblers who studied maps with an unblinking, calculating eye. Angola’s Queen Njinga was willing to shed (and occasionally drink) blood to establish a stable kingdom in an Africa ravaged by the slave trade. Caterina Sforza defended her Italian holdings with cannon and scimitar, and Indira Gandhi launched a war to solve a refugee crisis. From ancient Persia to modern-day Britain, the daunting thresholds these exceptional women had to cross—and the clever, sometimes violent ways in which they smashed obstacles in their paths—are evoked in vivid detail. The narrative sidles up to these war queens in the most dire, tumultuous moments of their reigns and examines the brilliant methods and maneuvers they each used to defend themselves and their people from enemy forces. Father-daughter duo Jonathan W. and Emily Anne Jordan extoll the extraordinary power and potential of women in history who walked through war’s kiln and

emerged from the other side—some burnished to greatness, others burned to cinders. All of them, legends. “Reminds us intelligently, entertainingly and powerfully that strong-willed women have always been the equal—and very often the superior—of their male counterparts, even in the field historically most jealously reserved for men: warfare.” —Andrew Roberts, New York Times–bestselling author “This book should be required reading for anyone who loves history.” —James M. Scott, Pulitzer Prize finalist

Suspension is probably the most misunderstood aspect of motorcycle performance.
This book, by America's premier suspension specialist, makes the art and science of
suspension tuning accessible to professional and backyard motorcycle mechanics
alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this
step-by-step guide shows anyone how to make their bike, or their kid's, handle like a

pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Two girls use forbidden magic to fly and fight -- for their country and for themselves -- in this riveting debut that's part *Shadow and Bone*, part *Code Name Verity*. Seventeen-year-old Revna is a factory worker, manufacturing war machines for the Union of the North. When she's caught using illegal magic, she fears being branded a traitor and imprisoned. Meanwhile, on the front lines, Linné defied her father, a Union general, and disguised herself as a boy to join the army. They're both offered a reprieve from punishment if they use their magic in a special women's military flight unit and undertake terrifying, deadly missions under cover of darkness. Revna and Linné can hardly stand to be in the same cockpit, but if they can't fly together, and if they can't find a way to fly well, the enemy's superior firepower will destroy them -- if they don't destroy each other first. *We Rule the Night* is a fiercely compelling story about sacrifice, complicated friendships, and survival against impossible odds.

No motorcycle manufacturer is more closely associated with one type of engine than BMW: the air-cooled boxer twin or 'airhead'. It was included in BMW's very first motorcycle in 1923 and virtually every machine the company made, of every type, from radical road bike to TT winner, to land speed record holder, to 1970s style icon and even to the creation of an all-new adventure bike class with the R 80 G/S, right up to the mid-1990s. Phil West celebrates the success of the BMW airhead twin motorcycles. This book, with over 290 photographs, includes a history of the company pre- and post-War; the personalities behind the development of the bikes; profiles of each of the 'R'
