In 2001, Cisco introduced the CCIE in Security. This exam, a combination of a written qualification exam with a one-day intensive lab exam is a highly sought after affirmation of a networkers security skills. A key to success in the intensive lab exam is hands-on understanding of how the security principles and concepts are executed in a real network. "CCIE Practical Studies: Security (CCIE Self-Study)" provides a series of lab scenarios that help a CCIE candidate or advanced-level networker gain that expertise. The labs show how, with or without a lab of actual equipment, different concepts are applied. Chapters include background and technology overviews, directions on how to set up a practice lab, case study-based scenarios that show the step-by-step
