Armed only with turntables, a mixer and a pile of records, hip-hop DJs and turntable musicians have changed the face of music. However, whilst hip-hop has long been recognised as an influential popular culture both culturally and sociologically, hip-hop music is rarely taken seriously as an artistic genre. *Hip-Hop Turntablism, Creativity and Collaboration* values hip-hop music as worthy of musicological attention and offers a new approach to its study, focusing on the music itself and providing a new framework to examine not only the musical product, but also the creative process through which it was created. Based on ten years of research among turntablist communities, this is the first book to explore the creative and collaborative processes of groups of DJs working together as hip-hop turntable teams. Focusing on a variety of subjects - from the history of turntable experimentation and the development of innovative sound manipulation techniques, to turntable team formation, collective creation and an analysis of team routines - Sophy Smith examines how turntable teams have developed new ways of composing music, and defines characteristics of team routines in both the process and the final artistic product. Relevant to anyone interested in turntable music or innovative music generally, this book also includes a new turntable notation system and methodology for the analysis of turntable compositions, covering aspects such as material, manipulation techniques and structure as well as the roles of individual musicians.

In this volume, contributors employ sociological and public health perspectives to offer insights into behaviours common at raves and nightclubs. The volume provides theoretical observations on illicit club drug use and supply, helping to challenge current orthodoxies on the role of drug use within young peoples' lives. Drawing material from the USA, UK and Hong Kong, the volume allows the demystification of stereotypical presentations surrounding young people who attend clubs and/or use club drugs. This work provides a badly needed and objective analysis of youthful drug use, and a foundation from which future sociological and public studies on young people, clubs and drugs - as well as young people themselves - will benefit.
