This casebook provides the most comprehensive treatment available, including the theoretical foundations, the common-law origins, the statutory structure, and the procedural context of modern criminal law. The book concentrates on doctrinal materials that can support both rigorous technical, and sophisticated theoretical, discussions. The purposes and limits of punishment are addressed through Supreme Court decisions, a focus on statutes throughout the substantive law sections enables training students in the legal art of statutory interpretation as well as exposing them to the hard moral and political problems of legislative choice, and the sentencing materials reprise the theory of punishment in the context of the practically most important stage of the modern process. The 12th edition carries forward the comprehensive approach of prior editions, empowering

the teacher to design a course suited to the needs of the teacher's students and institution. New Supreme Court's decisions, changing the landscape of both substance and procedure, include *Skilling v. United States*, *McDonald v. City of Chicago*, *Graham v. Florida*, *United States v. Statutes (e.g., the New York and California homicide statutes) and the caselaw (e.g., up-to-the-minute material on "willful blindness") have been updated. We also now include a case about the admissibility of neuro-imaging evidence to support a diminished-capacity defense, thus acknowledging how modern brain science has begun to raise both practical evidentiary issues and a substantial challenge to important theoretical p

'This highly informative and engaging volume on the Chinese criminal justice system today provides a window into the vagaries of law and its operation in the People's Republic. McConville and Pils bring together an impressive array of scholars whose studies span the criminal process. from initial police investigation, through to prosecution and sentencing of defendants, we see how dominant values in the Chinese state and its structures of power make the practice of criminal justice today still intensely political.' - Susan Trevaskes, Griffith University, Australia

experts in the field. The book offers a systematic overview and detailed comparison of the standards governing the conduct of proceedings in all major international and internationalized criminal courts from the Nuremberg and Tokyo Tribunals to the recently established Cambodian Extraordinary Chambers and the Special Tribunal for Lebanon. Based on a major research project, the study covers all procedural phases from the initiation of investigation to the appeals process. It pays special attention to the crosscutting themes which shape the contemporary discourse on international criminal justice, including the law of evidence, the defence issues, the procedural role of victims, and negotiated dismissal of international crime cases. The book not only takes stock of the procedural legacy of the UN ad hoc Tribunals for the former Yugoslavia and Rwanda and the International Criminal Court, but also reflects on the future directions of international criminal procedure. Investigating the tribunals' procedural law and practice through the prism of human rights law, domestic legal traditions, and tribunals' special objectives, the expert group puts forth proposals on how the challenges facing international criminal jurisdictions can best be met. International Criminal Procedure will be an indispensable work for practitioners involved in the adjudication of serious crimes on both national and international level, as well as international law

Constitutional principles are the foundation upon which substantive criminal law, criminal procedure law, and evidence laws rely. The concepts of due process, legality, specificity, notice, equality, and fairness are intrinsic to these three disciplines, and a firm understanding of their implications is necessary for a thorough comprehension of the

This is a study of the duties, functions, qualifications, selection processes, and potential for advancement associated with law enforcement, courts, and correctional personnel. The specific roles and the personnel that comprise the operating criminal justice system are identified and analyzed in this study. Detailing not only duties and functions, but also qualifications, selection processes, and even potential for advancement, the work forms an unusual perspective of the field for students of law enforcement, police science, criminal law, criminology, and corrections. The study details over fifty-five distinct professions within the criminal justice system, and discusses the qualifications required and the tasks performed by each. A major section of the book is its examination of the prosecutorial function - the powers and duties, the major concepts and criticisms of the role of the prosecutor, and the multi-faceted role of the defense attorney, including his duties and professional responsibilities, as well as the function of court

appointed counsels and public defenders. Law enforcement is viewed at every level from municipal through federal agencies, with a focus on police legal advisors, criminalists, and the numerous other individuals who comprise the total law enforcement complex. The function of the court is presented through the roles of the various court officers - judges, juries, grand juries, bailiffs, clerks, and reporters. Each is discussed in terms of qualifications, duties, and function in the mechanics of the courtroom procedure. A final section covers the corrections system - the custodial and institutional personnel, as well as the juvenile, probation and parole officers who work with offenders in the community.

This edition of this alternative to the standard black letter criminal law text. Employing a number of critical approaches, including a feminist perspective, the author analyze central aspects of criminal law in the context of the assumptions surrounding it.

Twenty-five leading contemporary theorists of criminal law tackle a range of foundational issues about the proper aims and structure of the criminal law in a liberal democracy. The challenges facing criminal law are many. There are crises of over-criminalization and over-imprisonment; penal policy has become so politicized that it is difficult to find any clear consensus on what aims the criminal law can properly serve; governments seeking to protect their citizens in the face of a range of

perceived threats have pushed the outer limits of criminal law and blurred its boundaries. To think clearly about the future of criminal law, and its role in a liberal society, foundational questions about its proper scope, structure, and operations must be re-examined. What kinds of conduct should be criminalized? What are the principles of criminal responsibility? How should offences and defences be defined? The criminal process and the criminal trial need to be studied closely, and the purposes and modes of punishment should be scrutinized. Such a re-examination must draw on the resources of various disciplines-notably law, political and moral philosophy, criminology and history; it must examine both the inner logic of criminal law and its place in a larger legal and political structure; it must attend to the growing field of international criminal law, it must consider how the criminal law can respond to the challenges of a changing world. Topics covered in this volume include the question of criminalization and the proper scope of the criminal law; the grounds of criminal responsibility; the ways in which offences and defences should be defined; the criminal process and its values; criminal punishment; the relationship between international criminal law and domestic criminal law. Together, the essays provide a picture of the exciting state of criminal law theory today, and the basis for further research and debate in the coming years.
