It appears that literary work possesses eternal temporal validity due to its autonomous aesthetic value, whereas criticism provides points of view having temporary and transitory significance. Despite such claims, the vector of methodology in our series of books, dealing with the history of English literature, relies on Viktor Shklovsky, T. S. Eliot, Mikhail Bakhtin, and especially Yuri Tynyanov, whose main reasoning would be that literature is a system of dominant, central and peripheral, marginalized elements – to us, “tradition” (centre) versus “innovation” (margin) engaged in a “battle” for supremacy, demarginalization, and the right to form a new literary system – and the development or historical advancement of literature is the substitution of systems. Roman Jakobson and French structuralism, on the whole, later Linda Hutcheon, with her “system” and “constant”, and Bran Nicol with the “dominant”, to say nothing about Itamar Even-Zohar and his theory of polysystem, to a certain extent Julia Kristeva, and even Homi Bhabha – as well as our humble contribution, by means of the books in the present series, we would like to believe – maintain Tynyanov’s line of thinking and concepts alive, which have developed and emerged nowadays more like a kind of “neo-formalism”.

This introductory creative writing text uses a unique, multi-genre approach to provide students with a broad-based knowledge of their craft, treating them as professional writers. Beginning by discussing elements common to all genres, this book underscores the importance of learning good writing habits before committing to a genre, encouraging writers to look beyond their genre expectations and learn from other forms. The book then devotes one chapter to each of the major literary genres: fiction, poetry, drama and creative nonfiction. These style-specific sections provide depth as they compare the different genres, furnishing students with a comprehensive understanding of creative writing as a discipline and fostering creativity. The discussion concludes with a chapter on digital media and an appendix on literary citizenship and publishing. With exercises at the end of each chapter, a glossary of literary terms, and a list of resources for further study, A Writer's Craft is the ideal companion to an introductory creative writing class.

A market leader for more than 30 years, *Barnet's Introduction to Literature* continues to uphold the traditions that have made it a success—a rich blend of both classic and contemporary selections as well as Barnet's signature "how-to" instruction on the elements of literature and the writing process. The new edition features a wealth of contemporary stories and a new chapter on graphic novels that were chosen for their student appeal. The LEA Guide to Composition is firmly based on research into how people learn to write and draws on the most significant strategies and techniques in composition studies. But this text is not just about the act of writing. It is about using writing as a vehicle for learning—about the world, about the academy, about oneself. The focus is on writing as a means of interpretation. The emphasis throughout is on encouraging reflection and developing critical thinking skills. Although the text suggests ways of teaching that reflect knowledge about how people most easily learn to become competent writers, it is specifically designed to allow for numerous approaches to teaching composition. Instructors will value this flexibility. This text is finely tuned to the needs and interests of today's composition students and teachers. Classroom tested at various universities over a four-year period to refine and improve its effectiveness, the Guide is distinguished by a range of carefully crafted instructional features: *Reading-Writing Connection. An extensive selection of fresh, thought-provoking, professional work allows students to internalize models and acquire appropriate genre familiarity. Student papers are included to illustrate how others have responded to real writing tasks similar to those the readers of this book will face. *Critical Reading and Thinking. Numerous reading selections are thoroughly analyzed to provide models of close, critical reading. Critical Reading Guides, provided for some selections, draw students in by asking rhetorical questions that develop critical thinking skills and better understanding of how the authors produced key effects. *Diverse Voices. Specially designed writing activities encourage students who are non-native speakers of English, or who come from non-mainstream cultural backgrounds, to share their perspectives with the entire class. *Writing Activities. More than 60 writing activities of various types are included, suitable for students with a range of writing experience. Many of these are short assignments that are linked to longer ones, which allows students to build their skills sequentially, adding new skills as old ones are practiced and mastered. *Writing Guides. Based on years of teaching experience, these guides provide detailed information and concrete, practical advice about how to succeed on selected assignments in each chapter. *Group Activities. Selected writing assignments include collaborative workshop activities that prompt students to engage in a variety of group efforts that enhance the writing process. As a result, group work progresses with a clear purpose and well-defined goals, leading to more student involvement and, ultimately, better writing. *Application of Key Ideas. Writing Assignments, Writing Guides, and Critical Reading Guides are complemented by activities that allow students to practice using important concepts discussed in the text that progress with a clear purpose and well-defined before they begin an actual assignment. *Journal Entries. Prompts throughout the text are included to increase the amount of writing students do, to enhance reflection and critical thinking, and to engage students in reflecting on and making connections between college and their lives outside of class. *Handbook. The handbook provides basic information about the form and function of language. It focuses on the usage conventions that are a crucial part of academic writing. In addition, it covers differences and similarities in the specific conventions that govern writing in the humanities, social sciences, and science. The documentation formats for these three major divisions of the undergraduate curriculum are described in detail, with full-length student papers to illustrate the formats in context. An Instructor's Manual is available with this text, upon adoption.

Robert Louis Stevenson (1850–1894) loved more than anything to talk about the craft of writing and the pleasure of reading good books. His dedication to the creative impulse manifests itself in the extraordinary amount of work he produced in virtually every literary genre—fiction, poetry, travel writing, and essays—in a short and peripatetic life. His letters, especially, confess his elation at the richness of words and the companionship of books, often projected against ill health and the shadow of his own mortality. Stevenson belonged to a newly commercial literary world, an era of mass readership, marketing, and celebrity. He had plenty of practical advice for writers who wanted to enter the profession: study the best authors, aim for simplicity, strike a keynote, work on your style. He also held that a writer should adhere to the truth and utter only what seems sincere to his or her heart and experience of the world. Writers have messages to deliver, whether the work is a tale of Highland adventure, a collection of children's verse, or an essay on umbrellas. Stevenson believed that an author could do no better than to find the appetite for joy, the secret place of delight that is the hidden nucleus of most people's lives. His remarks on how to write, on style and method, and on pleasure and moral purpose contain everything in literature and life that he cared most about—adventuring, persisting, finding out who you are, and learning to embrace "the romance of destiny."

What does it mean to be a westerner? With all the mythology that has grown up about the American West, is it even possible to describe "how it was, how it is, here, in the West--just that," in the words of Lynn Stegner? Starting with that

challenge, Stegner and Russell Rowland invited several dozen members of the western literary tribe to write about living in the West and being a western writer in particular. West of 98 gathers sixty-six literary testimonies, in essays and poetry, from a stellar collection of writers who represent every state west of the 98th parallel--a kind of Greek chorus of the most prominent voices in western literature today, who seek to "characterize the West as each of us grew to know it, and, equally important, the West that is still becoming." In West of 98, western writers speak to the ways in which the West imprints itself on the people who live there, as well as how the people of the West create the personality of the region. The writers explore the western landscape--how it has been revered and abused across centuries--and the inescapable limitations its aridity puts on all dreams of conquest and development. They dismantle the boosterism of manifest destiny and the cowboy and mountain man ethos of every-man-for-himself, and show instead how we must create new narratives of cooperation if we are to survive in this spare and beautiful country. The writers seek to define the essence of both actual and metaphoric wilderness as they journey toward a West that might honestly be called home. A collective declaration not of our independence but of our interdependence with the land and with each other, West of 98 opens up a whole new panorama of the western experience.
