This book provides a comprehensive guide for nurses practicing in any area of endocrinology and at any level of expertise. Endocrinology Nursing is a fast-developing specialty with nurses performing advanced roles and expanding their practice to run independent nurse-led services. Supported by the European Society of Endocrinology (ESE) and edited by members of the ESE Nurses Working Group, this is the first book ever published specifically for endocrine nurses. It is also an excellent resource for endocrinology specialty trainees, general practitioners, medical and nursing students, expert patients and nurses working in specialties such as fertility, osteoporosis, oncology, obesity, urology and gynaecology, who look after patients with endocrine-related disorders. This volume includes 13 sections and 69 chapters providing a comprehensive overview of adult and paediatric endocrinology but also a section on advanced practice, role development and nursing research. It has been written by an international team of more than 100 eminent nurses, physicians, surgeons, psychologists and other healthcare professionals, which makes this book a valuable resource for any multidisciplinary team. Many patient advocacy groups have contributed with case studies which emphasises the close working

relationships with patients.

The concepts and tutorials presented in this book are for readers with little to no experience using geographic information systems (GIS) software. This book is intended for use in an introductory college-level course with freshman students as the target audience. Each of the seven chapters represents approximately two weeks of work for a three-credit 16-week semester course. Each chapter starts with text related to fundamental concepts related to geospatial science and its sub-disciplines: Geodesy Remote Sensing Mobile Mapping Geographic Information Systems Cartography Each chapter also includes one or more tutorials designed to reinforce the concepts learned. These tutorials are suitable for undergraduate lab assignments. Tutorials may take between one to six hours to complete, depending on their complexity. When possible, the authors provide an estimated time to complete tutorials. Additional references, such as video content and external websites, may also be mentioned throughout the text. The second edition of this book includes new tutorials, updated material. Also, it has undergone a peer-review through Humboldt State University Press.

While enjoying a sunbaked and alcohol-soaked run down the Blind River, a Louisiana State Senator and his friend, the chairman of the National Defense Budget Reduction Committee, are gunned down by professional hitmen. It is up to FBI consultant Kevin Kinchen to piece together the puzzle of these murders

even as he struggles to pick up the pieces of his broken relationship with his grown daughter. The trail of blood runs from Louisiana to Indiana and Wyoming. What was behind these assassinations? One thing for sure: Blind River saw it all.

the content and the spirit of the book for the contemporary writing environment. Students learn to write for the digital world—where visual and verbal messages are inseparable—and do so by exploring serious ideas that will engage a real-world audience. Throughout the book, and in three new chapters, the authors emphasize the skills of synthesizing, defining, and evaluating—skills central to the development of good academic writing and good real-world writing. Students are encouraged to take chances, think big thoughts, and practice skills which will prepare them to ride the global communications wave as more confident, capable writers. This edition has been updated to reflect guidelines from the 2016 MLA HANDBOOK, Eighth Edition. Essays on Balance is a collection of thirty-three essays that explores possible answers to that one guiding question: Why is the world the way it is? Split into two parts, it explores first the most fundamental questions about the workings of nature-energy, entropy, time, space, change, life, and the universe-and it investigates them in a way that both laypersons and experts will enjoy reading. In the second part, considerations about human nature are explored as they relate to the self, the collective self, virtue and vice, religion, politics, free will, good and evil, and the concept of God. Approaching these considerations from an innovative worldview, it explains both nature and human nature as an indissoluble whole bound by the universal laws of balance.

Eritrean refugees crisscross between countries in the Horn of Africa and North Africa in search of a safe place. Along their journeys, they are looted, threatened, intimidated, violated, and held for ransom. This book revisits the human trafficking crisis that first emerged in the Sinai at the end of 2008 and examines the expansion of human trafficking of Eritrean refugees and other forms of exploitation beyond the Sinai. It focuses on the modus operandi of these practices and on identifying their key facilitators and beneficiaries. The book locates the origin of these practices within Eritrea; it reveals how a deliberate policy of impoverishment and human rights abuses has driven the people out of the country, and how individuals within Eritrea, and particularly within the ruling party, benefit from the smuggling and trafficking of Eritrean refugees. The use of information communication technologies (ICTs) is identified as key

The Gladiator is an icon of Roman culture, of sports economy, and of brave and brutal combat. This title in the Conquerors and Combatants series reveals the importance of gladiators as cultural heroes, enslaved athletes who were vital to the economy, and as political actors whose victories and sacrifices both entertained and subdued the Roman population. Illustrations, photos, and artifacts complement details about the gladiators' lives, fighting styles, revolts, and political impacts. In Gladiators readers discover who gladiators were, how they shaped their society, and why they remain glorified icons of combat and culture.

PROSE Award Finalist 2019 Association of American Publishers Award for Professional and Scholarly Excellence As a follow up to his widely acclaimed Sustainable Urbanism, this new book from author Douglas Farr embraces the idea that the humanitarian, population, and climate crises are three facets of one interrelated human existential challenge, one with impossibly short deadlines. The vision of Sustainable Nation is to accelerate the pace of progress of human civilization to create an equitable and sustainable world. The core strategy of Sustainable Nation is the perfection of the design and governance of all neighborhoods to make them unique exemplars of community and sustainability. The tools to achieve this vision are more

than 70 patterns for rebellious change written by industry leaders of thought and practice. Each pattern represents an aspirational, future-oriented ideal for a key aspect of a neighborhood. At once an urgent call to action and a guidebook for change, Sustainable Nation is an essential resource for urban designers, planners, and architects.

'Fat is our Friend' will change the way you think about what you eat. Confused by the nutrition messages coming from governments and health bodies? Confused by the ever-changing advice from our daily newspapers? Join Sammy Pepys in his quest to discover what's really going on and what you can do to eat more healthily ... and lose weight. In that order. Back in 2012, Sammy Pepys just wanted to help his overweight sister-in-law, Katy, avoid a tummy tuck (bariatric surgery), knowing that all previous attempts at dieting had failed. So he developed a plan showing how best to go about things, which she then put into practice. It worked. And it was the first successful diet Katy had ever completed, achieving a 20 kilo weight loss and much-improved blood sugar levels along the way. Having an inquisitive mind, Sammy spent much of the next three years finding out just why Katy's dietary approach had been so successful and why more people are not eating this way. He learned that: We've effectively been brainwashed into thinking fats and oils are bad for us. Healthy fats such as butter, lard, coconut and olive oil facilitate the essential metabolic functions our bodies perform

subconsciously day and night. An excess of sugar, refined flour, synthetic additives and those less-desirable vegetable seed oils - aka junk food - is progressively damaging our bodies. Katy's summary? 'Eat more real food, drop starches and sugar, and learn to love full-fat dairy products like cheeses and butter again to lose weight without feeling hungry. I feel energized.'
