Many people in the past – perhaps a majority – were poor. Tracing our ancestors amongst them involves consulting a wide range of sources. Stuart Raymond's handbook is the ideal guide to them. He examines the history of the poor and how they survived. Some were supported by charity. A few were lucky enough to live in an almshouse. Many had to depend on whatever the poor law overseers gave them. Others were forced into the Union workhouse. Some turned to a life of crime. Vagrants were whipped and poor children were apprenticed by the overseers or by a charity. Paupers living in the wrong place were forcibly 'removed' to their parish of settlement. Many parishes and charities offered them the chance to emigrate to North America or Australia. As a result there are many places where information can be found about the poor. Stuart Raymond describes them all: the records of charities, of the poor law overseers, of poor law unions, of Quarter Sessions, of bankruptcy, and of friendly societies. He suggests many other potential sources of information in record offices, libraries, and on the internet.

Slave Captain
The Career of James Irving in the Liverpool Slave Trade
Oxford University Press

With the Maritime Labour Convention now in force (as of August 2013), the shipping industry is faced with a new international convention that has comprehensive implications across all sectors. This vital text provides timely analysis and thought-provoking essays regarding the Convention's application and enforcement in practice. Hailed as the "Seafarer's Bill of Rights" and the "fourth pillar" of the international regulatory regime for quality shipping, the Maritime Labour Convention is set to significantly alter the playing field for key stakeholders. This book offers diverse and interesting commentary in respect of the Convention's impact on core sectors of the shipping industry, identifying both strengths and weaknesses of the Convention, as well as potential hurdles that will need to be overcome. Each chapter focuses on a different aspect of the Convention, ranging from individual rights of the seafarer to challenges of flag State implementation. Special attention is given to enforcement through examination of the innovative measures provided in the Convention itself, along with discussion of domestic enforcement mechanisms in certain States. Furthermore, the book evaluates whether the Convention has filled existing gaps in maritime labour law, resolved prior difficulties or created new problems. This book expertly addresses issues of fundamental importance to national authorities, shipping professionals and associations, maritime lawyers and academics worldwide. ---In memory of Richard Shaw---

As few accounts written by slave ship captains are known to have survived, the personal papers of James Irving are of tremendous interest and academic significance. Irving built a successful career in the slave trade of eighteenth-century Liverpool, first

as a ship's surgeon and then as a captain. Remarkably he was himself enslaved when his ship was wrecked off the coast of Morocco and he was captured by people described as 'wild Arabs' and 'savages'. This edition of forty letters and his journal reveals the reaction of the slaver to the experience of slavery, as well as throwing light on the complex and, to modern eyes, repugnant features of the transatlantic slave trade. The result is both a compelling narrative and a valuable reference text. This thoroughly revised edition of Suzanne Schwarz's best-selling book includes recently discovered archive material.

Mariners made a major - but neglected - contribution to England's warfare in the middle ages. Here their role is examined anew, showing their importance.

In 1946, approximately 40,000 U.S. military personnel participated in Operation CROSSROADS, an atmospheric nuclear test that took place at Bikini Atoll in the Marshall Islands. Congress passed a law directing the Veterans Administration to determine whether there were any long-term adverse health effects associated with exposure to ionizing radiation from the detonation of nuclear devices. This book contains the results of an extensive epidemiological study of the mortality of participants compared with a similar group of nonparticipants. Topics of discussion include a breakdown of the study rationale; an overview of other studies of veteran participants in nuclear tests; and descriptions of Operation CROSSROADS, data sources for the study, participant and comparison cohorts, exposure details, mortality ascertainment, and findings and conclusions.

A comprehensive training and reference manual used as a textbook in maritime institutions. Addresses the prevention, control, and extinguishing of fires aboard commercial vessels and on offshore drilling rigs. Includes chapters on emergency procedures and equipment as well as case studies of past shipboard fires.

Generously illustrated with drawings, photos, diagrams, tables, and checklists. Recommended reading for all maritime personnel and kept both in shipboard reference libraries and in the offices of maritime executives.

Overturns the generally held view that the press gang was the main means of recruiting seamen by the British navy in the late eighteenth century.

Die Arbeit an den drei Banden dieses Wörterbuches wurde 1932 in London begonnen und ist in ständiger Fortsetzung auf den jetzt vorliegenden Stand gebracht worden. In seinem Aufbau und in der besonderen Anordnung des Stoffes erstrebt das Werk, einem doppelten Zweck zu dienen: Besonders leichtes und schnelles Auffinden eines Stichwortes in möglichst vielen "fertig vorbereiteten" Verbindungen und möglichst wirksamer Ausschluß von Übersetzungsfehlern, besonders wenn zwischen mehrfachen Bedeutungen desselben Stichwortes gewählt werden muß. Im Verfolg dieser Ziele ist das Werk im wahrsten Sinne aus der Praxis entstanden. Dementsprechend ist es auch für die Praxis als Nachschlagewerk für den Alltagsgebrauch bestimmt. An seiner Schaffung haben Menschen des Berufs- und Geschäftslebens mit praktischen Erfahrungen mitgewirkt. Der Entwicklung der drei Sprachen folgend, wurde der Text durch Aufnahme neuer Fachausdrücke und Wendungen bedeutend erweitert und auf den neuesten Stand gebracht. Hierbei wurden auch

die im Bereich der internationalen Organisationen - insbesondere der Europäischen Gemeinschaften - entwickelten und gebräuchlichen Ausdrücke und Begriffe miteinbezogen. Zug, Schweiz, Januar 1979

ASM / MASTERS - ORALS QUESTION BANK SEGREGATED AS PER SURVEYORS **** www.owaysonline.com ****

Safety and Security at Sea is concerned with the safe operation of ships and consequently with preventing errors and oversights. This book contributes to safety where it is most effective - right at the site of work, on board the ship itself. It is here, indisputably, that it will prevent accidents and save lives. It translates theory into practice besides covering several new and current topics. This book is aimed at every deck officer - at every rank and on all ships. The book also attends to other manifest needs and discusses piracy, stowaways, management of crew on board and several other new and current topics in the interest of safety. All deck officers will find, when preparing for professional examinations, that the area which the oral section of these examinations at any level (Class One, Two or Three) cover - safety - is the one in which this book specialises. It will be an invaluable aid in passing these exams. By discussing essential details in every part of a voyage, parts that form different subjects in the theoretical section, it becomes an excellent reference book for them. In addition, it will also assist the staff of shipping companies in compiling ship operation manuals. This book includes the advice of various notices from the Marine Safety Agency and of guidelines from the International Maritime Organisation. It explains their requirements - International safety management code, emergency pollution control plans and others. In order to deal with ship board work thoroughly, this book takes an entire voyage into account. That is the reason for the sequence of its chapters to correspond to the progress of an actual voyage. The book begins with a ship embarking on a voyage and, in succession, conveys its message in a comfortable language. The last chapter leaves the reader at the beginning of another, but a safer, voyage. A summary is included at the end of each chapter. Real-time, interactive ship simulators limped onto the scene, in the wake of flight simulators, some years ago. The maritime industries have a long history of conservatism, but this is now changing rapidly. The information age has also swept over ships and shipping, and has been taken to heart to such an extent that, for example, flight simulators now cooperate with ship simulators and import useful new concepts and methodologies. The more than 50 papers contained in this book show what and why. Although traditionally conservative, the marine world is also traditionally international and this has not changed. The papers in the book are by leading authors from all over the world and provide a detailed snap-shot of the rapidly advancing state-of-the-art, together with pointers to the future. The overall theme of MARSIM '96 and therefore also of this book is: Vessel manoeuvrability and marine simulation research, training and assessment, and includes original papers on topics such as bridge resource management, distant learning and simulators coupled via The Internet, virtual

reality, neural networks, rudder-propeller hydrodynamics, prime mover models, squat in shallow water, and many more.

Over the last decades, shipping, fisheries and other uses of the oceans have considerably increased. However, adverse impacts caused by man have also been threatening the marine environment and the living resources of the sea. Hence the various international maritime organisations involved in managing the oceans are facing new challenges which in particular may be met by the concept of sustainability. How they cope with the present and future needs is shown in this book compiling information about some of the most relevant organisations in light of a sustainable marine development.

The TransNav 2013 Symposium held at the Gdynia Maritime University, Poland in June 2013 has brought together a wide range of participants from all over the world. The program has offered a variety of contributions, allowing to look at many aspects of the navigational safety from various different points of view. Topics presented and discussed at the Symposium were: navigation, safety at sea, sea transportation, education of navigators and simulator-based training, sea traffic engineering, ship's manoeuvrability, integrated systems, electronic charts systems, satellite, radio-navigation and anti-collision systems and many others. This book is part of a series of four volumes and provides an overview of Education and Training, Human Resources and Crew Resource Management, Policy and Economics and is addressed to scientists and professionals involved in research and development of navigation, safety of navigation and sea transportation.

This is a well-researched and highly readable account of naval life, both ashore and at sea, from a respected and admired historian and writer of whom it was written: 'An author who really knows Nelson's navy' (Ramage's Prize - The Observer) and 'An expert knowledge of naval history' (Ramage at Trafalgar - The Guardian).

Generations of readers have enjoyed the adventures of Jim Hawkins, the young protagonist and narrator in Robert Louis Stevensons Treasure Island, but little is known of the real Jim Hawkins and the thousands of poor boys who went to sea in the eighteenth century to man the ships of the Royal Navy. This groundbreaking new work is a study of the origins, life and culture of the boys of the Georgian navy, not of the upper-class children training to become officers, but of the orphaned, delinquent or just plain adventurous youths whose prospects on land were bleak and miserable. Many had no adult at all taking care of them; others were failed apprentices; many were troublesome youths for whom communities could not provide so that the Navy represented a form of floating workhouse. Some, with restless and roving minds, like Defoes Robinson Crusoe, saw deep sea life as one of adventure, interspersed with raucous periods ashore drinking, singing and womanizing. The author explains how they were recruited; describes the distinctive subculture of the young sailor the dress, hair, tattoos and language and their life and training as servants of captains and officers. More than 5,000 boys were recruited during the Seven Years War alone and without them the Royal Navy could not have fought its wars. This is a fascinating tribute to a forgotten band of sailors.

Every family historian has child ancestors, and childhood experiences and records are an essential aspect of research into a past life. That is why Sue Wilkes's detailed and accessible handbook is such a useful guide for anyone who is trying to find out about the early years of their forbears. In *Tracing Your Ancestors' Childhood* she explores the history of childhood and education and brings together information about relevant records and archives into one handy reference guide. She outlines ancestors' childhood experiences at home, school, work and in institutions, especially during Victorian times. In the opening chapter she reviews basic family history sources, then she discusses records of childhood in detail. Specialist archives, published sources, recommended reading and other resources and documents are covered. She focuses primarily on England and Wales and covers the years 1750–1950. The second part of her book is a directory of archives and specialist repositories. Databases of children's

Where To Download Example Muster List Ship

societies, useful genealogy websites, and places to visit which bring the social history of childhood to life are all included.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

As Britain's dominant port for the slave trade in the eighteenth century, Liverpool is crucial to the study of slavery. And as the engine behind Liverpool's rapid growth and prosperity, slavery left an indelible mark on the history of the city. This collection of essays, boasting an international roster of leading scholars in the field, sets Liverpool in the wider context of transatlantic slavery. The contributors tackle a range of issues, including African agency, slave merchants and their society, and the abolitionist movement, always with an emphasis on the human impact of slavery.

Convinced that Napoleon was about to declare war once more, the British Government ordered a secret press of seamen in 1803. This book records how the ensuing events affected one man in particular, Joesph Bates, a 21-year old merchant seaman who proved to be of exceptional ability rising to the rank of lieutenant. The book is based largely on the logs of the two ships in which he sailed, the frigate, HMS Cerberus, and the sloop of war, HMS Racoon, supplemented by eye-witness accounts, official letters, medical notes and the secret diary of one of Joseph's shipmates. Pressed in Chatham on 6th May, a few days before Britain declared war on France, he spent the next 12 years before his release from the Royal Navy. The author brings to life the detail of everyday events on board as Joseph is promoted from able seaman servicing in the foretop to coxswain, quartermaster, midshipman, master's mate and lieutenant. Joseph's service, however, was full of more dramatic events: deaths by drowning, falls from the rigging, cholera or tuberculosis. He was engaged in battles, attacks on the French coast, the capture of a town in the Caribbean, an explosion in the Racoon that killed many of the crew and the near-sinking of the ship. But there were lighter moments: the celebrations on crossing the Equator and riding horses borrowed from the Mexican army. One highlight found in the secret diary of a shipmate is his single-handed attempt to transport a very large hog back to the ship. After 'capturing' the last American fort on the Pacific coast, Joseph's ship sailed to Hawaii and Tahiti, hunting American shipping. Her mission completed, Racoon once more rounded to the Horn and as a final duty escorted a convoy back to England. Joseph's service was ended.

Plagued by disinformation, personal politics and poor research, the Titanic story has existed in a miasma of romance and chivalry for a century now. Going back to the official enquiry transcripts and letters and interviews from survivors, a different picture emerges, and controversies about the sinking can be addressed. Were the 3rd class held below decks while the nobility escaped? Did the captain or 1st officer shoot themselves? Why did the ship leave port with room in the boats for only half of those on board, and why were 400 seats in the boats wasted? Was the Titanic trying for a speed record? With the aid of a hundred years of research, an enlightening new account of the liner's final hours emerges.

Buy Latest & Cheapest notes from www.owaysonline.com Phase-I - Complete Q.Set till Jan'19 These guidelines have been produced to support implementation of the Code of Conduct for Responsible Fisheries with regard to safety at sea in the fisheries sector. Their purpose is to enable relevant authorities to develop and implement strategies aimed at improved safety, health and conditions of service at sea in capture fisheries and aquaculture operations. They

Where To Download Example Muster List Ship

apply to all commercial fishing activities, as well as activities at sea within the aquaculture sector. Furthermore, the principles therein, may also be applied to vessels engaged in fisheries research. However, while these guidelines are not directed at sport and recreational activities carried out within the aquatic environment, administrations responsible for such sectors may well take note of the safety and health issues therein. The guidelines contribute to Strategic Objective 5: Increase the resilience of livelihoods to threats and crises.

The series of IFAC Symposia on Analysis, Design and Evaluation of Man-Machine Systems provides the ideal forum for leading researchers and practitioners who work in the field to discuss and evaluate the latest research and developments. This publication contains the papers presented at the 6th IFAC Symposium in the series which was held in Cambridge, Massachusetts, USA.

The Command Companion of Seamanship Techniques is the latest work from the well-respected marine author, D J House. It contains all the information needed for command posts at sea. · All aspects of shipboard management are discussed, with special emphasis placed on health and safety. · Guidelines on how to respond to accidents and emergencies at sea · Contains the most recent SOLAS revisions and a discussion of marine law to keep you up to date with the latest rules and regulations. In order to aid learning, the book includes a number of worked examples in the text along with questions and answers at the end of chapters. The author tells you how to respond to accidents and emergencies at sea, in the event, for example of cargo contamination, collision, loss of stability due to cargo shift and damage due to flooding, fire plus loss of life/crew. In addition, the SOLAS revisions and a discussion of marine law is included to keep you up to date with all the latest rules and regulations. In order to aid learning, this book will include a number of worked examples in the text along with questions and answers at the end of chapters. D J House is senior lecturer in Nautical studies at the Nautical college, Fleetwood. His sea-going experience includes general cargo, reefer, bulk cargo, passenger and liner trades, underwater operations, and roll-on/roll-off ferries. He is a well-known marine author and has written Seamanship Techniques Volumes 1 and 2 (combined) and he has revised Cargo Work in the Kemp & Young series.
