Passing the Fundamentals of Engineering Exam is the first step toward becoming a Registered, or Professional, Engineer. The P.E. designation is a prerequisite for work as a consulting engineer, as well as for engineering management positions in many industries. This book prepares applicants who are planning to take the exam in the field of “mechanical” or “other” disciplines. It includes two mini diagnostic tests (one for each discipline) plus two full-length practice examinations with questions answered and explained for both disciplines. Prospective test takers will also find valuable brush-up chapters covering all test topics: chemistry, computational tools, dynamics, kinematics and vibrations, electricity and magnetism, engineering economy, ethics and professional practices, fluid mechanics, instrumentation and data acquisition, materials science and structure, mathematics, measurements, instrumentation and controls, mechanical design and analysis, probability and statistics, mechanics of materials, safety, health, and environment, statics, and thermodynamics and heat mass and energy transfer. Additional practice questions with answer keys and explanations follow each chapter. Explains the theory of political survival, particularly in cases of dictators and despotic governments, arguing that political leaders seek to stay in power using any means necessary, most commonly by attending to the interests of certain coalitions.

The ideal refresher for those still in school or recently graduated, or for those who have limited time to study, this guide covers all the general FE/EIT exam subjects. Each chapter provides a definition of terms and a concise discussion of concepts. In addition, there are 900+ practice problems and a complete eight-hour practice exam. Solutions to both the practice problems and the practice exam are included.

Told through the eyes of Isabel Ziegler, this book provides an important contribution to the historical literature of Espanola, New Mexico and the surrounding communities through its portraits of local people and events. Isabel and her husband, Dr. Samuel Ziegler, and their two young sons moved to Espanola in early 1946 as a result of Dr. Ziegler's having been invited to help build a local hospital. The Zieglers soon became involved in their community. Isabel helped start a local library, was a member of the noted local trio, Las Conquistadoras, and became the first woman president of the Espanola Chamber of Commerce. Dr. Ziegler carried on a busy medical practice as general surgeon and physician, and also served on the Espanola City Council for over twenty years—even running for State Senator against northern New Mexico Democratic boss, Emilio Naranjo. Included are stories about Arthur and Phoebe Pack of the Ghost Ranch in Abiquiu who were the original donors for the hospital; Carolyn Dozier, a helper and friend of Isabel's from Santa Clara Pueblo; and Ben Talachi, a San Juan Indian who worked for the Zieglers at their home. There are also accounts of the Zieglers' experiences with Hamilton and Jean Garland of the fabled Swan Lake Ranch in Alcalde, and with the retired concert pianist John Marsh and his wife, Mary, from nearby Quartaes. Lastly, there is a memorable portrait of Georgia O'Keeffe who was a patient of Dr. Ziegler's for over 30 years, and a friend of the family. The book also reveals accounts of local politics and business, always with attention given to local people who participated. All in all, an important insight into the working and development of a local community.
