Provides information on women's health as it relates to exercise, including guidelines for activities such as walking, water exercise, and weightlifting. Losing weight has never been easier or more fun than with Leslie Sansone's WALK AWAY THE POUNDS. For over twenty-five years, Leslie has helped more women get off the couch and onto their feet than anyone else in the fitness industry. Her secret? If you can walk, you can achieve the weight-loss goals you dream about...with none of the intimidation or negative messages that have stopped you from succeeding before. Whether you are a beginner or have been walking with Leslie for years, whether you are a teen or a senior or somewhere in

between, you will see results. You will lose real weight, and keep it off—twenty pounds, forty, sixty, or even more. All you need is fifteen minutes a day for starters, two feet, and a willing attitude. There is no fancy equipment to buy, no fad diet to follow, and no fitness club to join. The revolutionary program in **WALK AWAY THE POUNDS** is designed to keep everybody on the path to success, especially those who have never been able to complete a weight-loss plan before. It's a simpler approach to fitness, one that can change your life. Leslie's step-by-step workbook format sets up the program day by day. You just wake up, flip open the book, and follow the directions. You'll get a combination of in-home walking (that's right, you can do it right from the comfort of your own living room!), simple strength training, motivational breakthroughs, and commonsense advice to help you burn fat, tone muscle, reduce stress, avoid illness, shake off the blues, and boost your energy level sky high. It's never been easier. Women all across America have dropped between 20 and 150 pounds with Leslie Sansone. Now you can too!

Cases in Sport Marketing, simulates real-life scenarios for sport marketers as exhibition games in the preseason simulate the regular season for professional athletes. The text begins with four introductory chapters to explain the case study method and then dedicates the remaining fifteen chapters to fifteen sport marketing cases that cover a wide range of issues and sport industry segments. By working through the cases, students can examine an array of situations and gain experience grappling with actual problems faced by managers. Each case presents the critical issues at hand, possible alternatives for consideration, and the criterion necessary to make an informed decision. The final chapter provides an overview of the sport marketing field.

Significant numbers of men and women take little exercise in the course of their occupation. The computer keyboard, the rise of private transport, the world by television, household 'labour saving' devices mean that with the minimal of physical effort people work and play. This book focuses on exercise and women's health.

Exercise for women is a heavily-laden social and embodied experience. While exercise promotion has become an increasingly visible part of health campaigns, obesity among women is rising, and studies indicate that women are generally less physically active than men. Women's (lack of) exercise, therefore, has become a public concern, and physiological and psychological research has attempted to develop more effective exercise programs aimed at women. Yet women have a complex relationship with embodiment and physical activity that is difficult for quantitative scientific approaches to explore. This book addresses this neglect by providing a much-needed feminist, qualitative social analysis of women and exercise. The contributors, drawn from across Europe and North America, investigate the ways women experience exercise within the

context of the global fitness industry. All the authors take a specifically feminist perspective in their analysis of the fit, feminine body, exploring media images and the global branding of fitness products, the relationship between exercise and fat, the construction of physical activity within health discourse, and the lived experience of the exercising body. The collection explores the diversity of women's experiences of exercise in relation to age, ethnicity and body size. The book is essential for anyone interested in health promotion, sport and exercise or the social and cultural study of gender and embodiment.
