Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)

On June 17, 2015, a white supremacist entered Emanuel AME Church in Charleston, South Carolina, and sat with some of its parishioners during a Wednesday night Bible study session. An hour later, he began expressing his hatred for African Americans, and soon after, he shot nine church members dead, the church's pastor and South Carolina state senator, Rev. Clementa C. Pinckney, among them. The ensuing manhunt for the shooter and investigation of his motives revealed his beliefs in white supremacy and reopened debates about racial conflict, southern identity, systemic racism, civil rights, and the African American church as an institution. In the aftermath of the massacre, Professors Chad Williams, Kidada Williams, and Keisha N. Blain sought a way to put the murder—and the subsequent debates about it in the media—in the context of America's tumultuous history of race relations and racial violence on a global scale. They created the Charleston Syllabus on June 19, starting it as a hashtag on Twitter linking to scholarly works on the myriad of issues related to the murder. The syllabus's popularity exploded and is already being used as a key resource in discussions of the event. Charleston Syllabus is a reader—a collection of new essays and columns published in the wake of the massacre, along with selected excerpts from key existing scholarly books and general-interest articles. The collection draws from a variety of disciplines—history, sociology, urban studies, law, critical race theory—and includes a selected and annotated bibliography for further reading, drawing from such texts as the Confederate constitution, South Carolina's secession declaration, songs, poetry, slave narratives, and literacy texts. As timely as it is necessary, the book will be a valuable resource for understanding the roots of American systemic racism, white privilege, the uses and abuses of the Confederate flag and its ideals, the black church as a foundation for civil rights activity and state violence against such activity, and critical whiteness studies.

Can the syllabus constitute the curriculum? In this volume, Rocha explores curriculum theory through the lens of the syllabus. By critiquing curriculum studies and the entire field of education, overrun by the social sciences, Rocha provides an integrated vision of philosophy of education and curriculum theory, rooted in the humanities. Through an original reconceptualization, this text draws from a broad range of sources – ranging from Classical Antiquity to the present – offering a rich context for understanding curriculum as a philosophically salient concept, contained within the syllabus. *The Syllabus as Curriculum* features actual syllabi created and taught by the author in undergraduate and graduate courses at the University of British Columbia, Canada. These curated syllabi work as exemplars and media, supported by pedagogical commentary and context. Inspired by Augustine's *Confessions*, each part of the book culminates in a metaphorical "garden," which serves as a meditation on the syllabus in three senses: correspondence, essay, and outline. An original, powerful, and corrective contribution to the literature on curriculum studies, this work invites teachers and scholars from across the foundations of education, especially philosophy of education, art education, and those invested in curriculum theory, to see their contribution in more direct and integral ways.

Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: • Why sometimes letting your mind wander is an important part of the learning process • How to avoid "rut think" in order to think outside the box • Why having a poor memory can be a good thing • The value of metaphors in developing understanding • A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Lectures on Theories of Learning explores the maze of conditioning principles and concepts that guided research in American experimental psychology in the twentieth century.

The main trails on our journey are the historical theories of learning: —Edward Thorndike and the laws of learning —Ivan Pavlov and classical conditioning —John Watson and the first behaviorism —Edwin Guthrie and one-trial learning —Edward Tolman and the cognitive map —Clark Hull and drive reduction —Donald Hebb and physiological psychology —B. F. Skinner and radical behaviorism Each trail leads to further intellectual excursions: —orientations in the study of learning —operationism and fallibilism —habituation and sensitization —a primer on operant conditioning —schedules of reinforcement —the uses and abuses of punishment —escape and avoidance learning There are no blind alleys in Lectures on Theories of Learning as it sagely winds its way through the history of American psychology. From the commencement in lecture 1 to the conclusions in lecture 15, students will experience an informed and informal journey of psychological discoveries and intellectual enrichment.
