modelling activities. The general research question this thesis answers is what are the difficulties in the usage of process modelling tools and which methods, techniques, and tools can guide users in modelling processes to target the existing problems. The question is addressed by following a research methodology of design sciences. Amongst others, it includes a detailed analysis of the research problem, a definition of the objective, the design and development of solutions, and an evaluation of the developed concepts. In summary, the thesis presents innovative concepts to support modellers and provides a step towards end-user enablement in process modelling.

This student study guide includes learning objectives, chapter summaries, key terms, matching exercises, multiple-choice review questions, discussion questions, and practice exercises, some of which involve data analysis using the General Social Surveys using SPSS, and more. Also included are the answers to the matching and multiple-choice review questions, as well as a General Social Survey appendix.
