This book develops a thorough account of the sphere of human moral action in sustained dialogue with Jürgen Moltmann. By examining God's role as promise-giver, particularly in the Christian understanding of resurrection, this work describes the occupancy of both history and space in moral terms. This leads to an understanding of Jesus' description of 'the kingdom of God' to feature prominently in describing both the possibility and content of human moral action. By offering an account of each of the main doctrines found in Moltmann's corpus - the role of the future, the Trinity, the Holy Spirit, and anthropology - this book locates how each contributes to the understanding of ethics from a Christian perspective and subsequently applies these findings to the contemporary issue of poverty and global economics.

1 Timothy is one of the more controversial documents in the New Testament. For years, critical scholars have rejected Pauline authorship, highlighted the apparent misogynistic quality of the text, and argued against any coherence in the letter. Jeon takes a fresh look at the letter, incorporating many recent advancements in NT scholarship. In detail he demonstrates the macro- and micro- chiasmic arrangement of the entire letter and explains how the presumed first-century audience would have heard and responded to an oral performance of the letter. In doing so, Jeon offers a fresh challenge to more popular ways of (mis)understanding the letter and points a way forward for appropriating the letter both in academia and in the church.

America began to breathe easy at the close of the Cold War and loosened its grip on the fear of nuclear confrontation for the first time since World War Two. Peace was palpable, but in retrospect the years between 1988 and 2008 were as rocky as they were uncertain. Turbulence, not tranquility, marked the turn of the century: the war on drugs, race riots, values debates, deep economic shifts, and the growing threat of terrorism on U.S. soil that would tragically play out on September 11, 2001. In this, the third volume of *America: The Last Best Hope*, William J. Bennett explores America's recent and momentous history: the fall of the Berlin Wall and the collapse of global Communism; sweeping changes in political and popular culture; the war on terror and the election of America's first African American president. Surveying the players, personalities, and pivotal moments, Bennett captures this recent chapter in the American story with piercing insight and unrelenting optimism.

Environmental Chemistry is a relatively young science. Interest in this subject, however, is growing very rapidly and, although no agreement has been reached as yet about the exact content and limits of this interdisciplinary subject, there appears to be increasing interest in seeing environmental topics which are based on chemistry embodied in this subject. One of the first objectives of Environmental Chemistry must be the study of the environment and of natural chemical processes which occur in the environment. A major purpose of this series on Environmental Chemistry, therefore, is to present a reasonably uniform view of various aspects of the chemistry of the environment and chemical reactions occurring in the environment. The industrial activities of man have given a new dimension to Environmental Chemistry. We have now synthesized and described over five million chemical compounds and chemical industry produces about one hundred and fifty million tons of synthetic chemicals annually. We ship billions of tons of oil per year and through mining operations and other geophysical modifications, large quantities of inorganic and organic materials are released from their natural deposits. Cities and metropolitan areas of up to 15 million inhabitants produce large quantities of waste in relatively small and confined areas. Much of the chemical products and waste products of modern society are released into the environment either during production, storage, transport, use or ultimate disposal. These released materials participate in natural cycles and reactions and frequently lead to interference and disturbance of natural systems.

In the minds of some, universal salvation is a heretical idea that was imported into Christianity from pagan philosophies by Origen (c.185-253/4). Ilaria Ramelli argues that this picture is completely mistaken. She maintains that Christian theologians were the first people to proclaim that all will be saved and that their reasons for doing so were rooted in their faith in Christ. She demonstrates that, in fact, the idea of the final restoration of all creation (apokatastasis) was grounded upon the teachings of the Bible and the church's beliefs about Jesus' total triumph over sin, death, and evil through his incarnation, crucifixion, resurrection, and ascension. Ramelli traces the Christian roots of Origen's teaching on apokatastasis. She argues that he was drawing on texts from Scripture and from various Christians who preceded him, theologians such as Bardaisan, Irenaeus, and Clement. She outlines Origen's often-misunderstood theology in some detail and then follows the legacy of his Christian universalism through the centuries that followed. We are treated to explorations of Origenian universal salvation in a host of Christian disciples, including Athanasius, Didymus the Blind, the Cappadocian fathers, Evagrius, Maximus the Confessor, John Scotus Eriugena, and Julian of Norwich.

Truthfulness. Morality. Ethics. Christians face fundamental questions regarding deep issues and everyday problems: Are there situations in life where obedience to God's law is not the most practical solution? Is lying always wrong? Situation ethics attempts to answer questions like these by affirming that doing the loving thing is a higher priority than obedience to God's law. The author endeavors to show how disregard for divine law, though seemingly attractive, reasonable, and practical, is untenable. The book reveals how a situationalist follows a misguided ego rather than an objective standard. Whether we manipulate others to suit our own purposes, lie to avoid embarrassment, or commit a minor indiscretion, it's just a quick fix, something that only lasts for a season. Discover how the eye of faith adheres to God's directives, unblinded by sin's attractive glow; it contemplates a lifetime, it considers eternity.

This book aims to uncover and explore the ideas of notable people in the story of Christian universalism from the time of the Reformation until the end of the nineteenth century. It is a story that is largely unknown in both the church and the

academy, and the characters that populate it have for the most part passed into obscurity. With carefully located bore holes drilled to release the long-hidden theologies of key people and texts, the volume seeks to display and historically situate the roots, shapes, and diversity of Christian universalism. Here we discover a diverse and motley crew of mystics and scholars, social prophets and end-time sectarians, evangelicals and liberals, orthodox and heretics, Calvinists and Arminians, Puritans, Pietists, and a host of others. The story crisscrosses Continental Europe, Britain, and America, and its reverberations remain with us to this day.

When Drake set sail from Plymouth harbour on 15 November 1577 at the start of his epic circumnavigation of the world, he had with him on board the Pelican four professional musicians and at least one trumpeter... from the Introduction. The three epoch-making voyages of Columbus (1492), Vasco da Gama (1497) and Magellan (1519) inaugurated the Age of Exploration, the most intensive era of discovery in the history of the world. This book seeks to ascertain what part musicians played in the patterns of settlement which still determine many of the cultural and linguistic boundaries of the present-day world. The focus is on Englishmen, but account will be taken of musicians representing the other leading colonial nations of Europe—France, Spain, Portugal and Holland. This study deals with the hundreds of musicians who left their native country to serve on long-distance ships in the years between the accession of Elizabeth I and the end of the 17th century. Among the many subjects covered are musical duties at sea, musicians as ambassadors on land, musical trinkets for barter, musicians of the East India Company, musical instruments presented by the trading companies, trumpeters, drum and fife players, amateur musicians, musicians in the colonization of North America, and much more.

Who is Jesus Christ? What does it mean to say that we are created in the image of God? What does salvation mean? What is the meaning of baptism? What characterizes the Christian fellowship? What hope does a Christian faith give for the future? These are only a few of the questions that this textbook on dogmatics takes up. This book begins the discussion of the various topics by looking at what the Bible has to say. Hegstad then examines how the church's doctrine has developed over the course of history, and discusses how the Christian faith can best be formulated today. This book understands the Christian faith as an answer to universal existential questions that challenge all religions and worldviews. Dogmatics is understood here as the expression of a Christian interpretation of life. Hegstad himself belongs to the Lutheran church tradition, but his perspective is consistently ecumenical. This introduction to dogmatics will interest not only students, but everyone who is looking for a deeper insight into the Christian faith.

Now Cyclops sends X-Force into the future to help Cable and Hope - and the Messiah War begins! The impact of colonial dispossession and the subsequent social and political ramifications place a unique burden on governments having to establish equitable means of addressing previous injustices. A Common Hunger considers the efforts by both of these countries to reconcile the damage left by colonial oppression, in part, looking back with a critical eye, but also pointing the way toward a solution that will satisfy the common need for human dignity.

Few reference works in philosophy have articles on hope. Few also are systematic or large-scale philosophical studies of hope. Hope is admitted to be important in people's lives, but as a topic for study, hope has largely been left to psychologists and theologians. For the most part philosophers treat hope en passant. My aim is to outline a general theory of hope, to explore its structure, forms, goals, reasonableness,

and implications, and to trace the implications of such a theory for atheism or theism. What has been written is quite disparate. Some see hope in an individualistic, often existential, way, and some in a social and political way. Hope is proposed by some as essentially atheistic, and by others as incomprehensible outside of one or another kind of theism. Is it possible to think consistently and at the same time comprehensively about the phenomenon of human hoping? Or is it several phenomena? How could there be such diverse understandings of so central a human experience? On what rational basis could people differ over whether hope is linked to God? What I offer here is a systematic analysis, but one worked out in dialogue with Ernst Bloch, Immanuel Kant, and Gabriel Marcel. Ernst Bloch of course was a Marxist and officially an atheist, Gabriel Marcel a Christian theist, and Immanuel Kant was a theist, but not in a conventional way. At present the battle over who defines our future is being waged most publicly by secular and religious fundamentalists. Hope and the Longing for Utopia offers an alternative position, disclosing a conceptual path toward potential worlds that resist a limited view of human potential and the gift of religion. In addition to outlining the value of embracing unknown potentialities, these twelve interdisciplinary essays explore why it has become crucial that we commit to hoping for values that resist traditional ideological commitments. Contextualized by contemporary writing on utopia, and drawing from a wealth of times and cultures ranging from Calvin's Geneva to early twentieth-century Japanese children's stories to Hollywood cinema, these essays cumulatively disclose the fundamental importance of resisting tantalizing certainties while considering the importance of the unknown and unknowable. Beginning with a set of four essays outlining the importance of hope and utopia as diagnostic concepts, and following with four concrete examples, the collection ends with a set of essays that provide theological speculations on the need to embrace finitude and limitations in a world increasingly enframed by secularizing impulses. Overall, this book discloses how hope and utopia illuminate ways to think past simplified wishes for the future.

The Kuyper bibliography is the first overview of his publications, from his first one to the 2010 editions. After some introducing paragraphs the bibliography presents items in chronological order. Each item contains bibliographical data and information on contents and context.

An understanding of what we mean by the present is one of the key issues in literature, philosophy, and culture today, but also one of the most neglected and misunderstood. Present Hope develops a fascinating philosophical understanding of the present, approaching this question via discussions of the nature of historical time, the philosophy of history, memory, and the role of tragedy. Andrew Benjamin shows how we misleadingly view the present as simply a product of chronological time, ignoring the role of history and memory. Accordingly, discussion of what is meant by the present disappears from philosophical concern. To draw attention to this absence, Andrew Benjamin introduces the notion of hope and asks what this concept can tell us about the present. At the heart of the outstanding work is an emphasis on the relation between hope and the Jewish tradition. Through discussions of philosophical responses to the Holocaust, the work of Walter Benjamin, Daniel Libeskind's Jewish Museum, and the poetry of Paul Celan, Present Hope shows how we must look beyond the purely philosophical horizon to understand the present we live in.
