Literacy is a concern of all nations of the world, whether they be classified as developed or undeveloped. A person must be able to read and write in order to function adequately in society, and reading and writing require a script. But what kinds of scripts are in use today, and how do they influence the acquisition, use and spread of literacy? *Scripts and Literacy* is the first book to systematically explore how the nature of a script affects how it is read and how one learns to read and write it. It reveals the similarities underlying the world's scripts and the features that distinguish how they are read. Scholars from different parts of the world describe several different scripts, e.g. Japanese, Chinese, Korean, Indian Amerindian -- and how they are learned. Research data and theories are presented. This book should be of primary interest to educators and researchers in reading and writing around the world.

"Chemistry is designed for the two-semester general chemistry course. For many students, this course provides the foundation to a career in chemistry, while for others, this may be their only college-level science course. As such, this textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their lives and the world

around them. The text has been developed to meet the scope and sequence of most general chemistry courses. At the same time, the book includes a number of innovative features designed to enhance student learning. A strength of Chemistry is that instructors can customize the book, adapting it to the approach that works best in their classroom."--Openstax College website.

The sheer magnitude of the Holocaust has commanded our attention for the past sixty years. The extent of atrocities, however, has overshadowed the calculus Nazis used to justify their deeds. According to German wartime media, it was German citizens who were targeted for extinction by a vast international conspiracy. Leading the assault was an insidious, belligerent Jewish clique, so crafty and powerful that it managed to manipulate the actions of Roosevelt, Churchill, and Stalin. Hitler portrayed the Holocaust as a defensive act, a necessary move to destroy the Jews before they destroyed Germany. Joseph Goebbels, Minister of Propaganda, and Otto Dietrich's Press Office translated this fanatical vision into a coherent cautionary narrative, which the Nazi propaganda machine disseminated into the recesses of everyday life. Calling on impressive archival research, Jeffrey Herf recreates the wall posters that Germans saw while waiting for the streetcar, the radio speeches they heard at home or on the street, the headlines that blared from newsstands. *The Jewish Enemy* is the first extensive study of how anti-Semitism pervaded and shaped Nazi propaganda during World War II and the Holocaust, and how it pulled together the diverse elements of a delusory Nazi worldview. Here we find an original and haunting exposition of the ways in which Hitler legitimized war and genocide to his own people, as necessary to destroy an allegedly omnipotent Jewish foe. In an era when both anti-Semitism and conspiracy theories continue to influence world politics, Herf offers a timely reminder of their dangers along with a fresh interpretation of the paranoia underlying the ideology of the Third Reich.

*Christ and Satan* is the title of the last of four poems in the eleventh-century Junius XI manuscript of Anglo-Saxon poetry. This critical edition contains text, glossary, textual and explanatory notes, and an essay surveying former criticisms and setting forth the author's ideas on the poem's principle of unity. Of particular value to students and scholars of Old English, *Christ and Satan* makes an important contribution to the understanding of this fine and interesting poem.

These proceedings represent the work of contributors to the 18th European Conference on Research Methodology for Business and Management Studies (ECRM 2019), hosted by Wits Business School, University of Witwatersrand, Johannesburg, South Africa on 20-21 June 2019. This book will help you understand the redemptive story of the Old Testament through six major periods: Creation, Abraham, Sinai, Kings, Exile and Temple, with the first letter of each heading making up the word CASKET. This acronym will enable you to memorize the storyline of the Old Testament and place key events, people and biblical books in their correct time period. The author takes you through each period step by step, explaining the major covenants and highlighting the most important people, events, and biblical themes. As you become familiar with storyline of the Old Testament you will learn that God's redemptive plan is climactically fulfilled in the New Testament with the coming Messiah. The acronym for the entire Bible is CASKET EMPTY, therefore, which points to the empty tomb of Jesus as the beginning of God's new creation, the assurance that death has been defeated, and the guarantee of our resurrection yet to come. Through the acronym CASKET EMPTY you will have a framework for remembering the entire sweep of the Bible with the person and work of Christ at the center.

Passed in 1965 during the height of the Civil Rights movement, the Voting Rights Act (VRA) changed the face of the American electorate, dramatically increasing minority voting, especially in the South. While portions of the Act are permanent, certain provisions were set to expire in 2007. Reauthorization of these provisions passed by a wide margin in the House, and unanimously in the Senate, but the lopsided tally hid a deep and growing conflict. The Most Fundamental Right is an effort to understand the debate over the Act and its role in contemporary American democracy. Is the VRA the cornerstone of civil rights law that prevents unfair voting practices, or is it an anachronism that no longer serves American

democracy? Divided into three sections, the book utilizes a point/counterpoint approach. Section 1 explains the legal and political context of the Act, providing important background for what follows; Section 2 pairs three debates concerning specific provisions or applications of the Act; while Section 3 offers commentaries on the previous chapters from attorneys with widely divergent viewpoints.

The #1 testimony book that every Christian needs to read. Despite the danger and threat of discovery, the ten Boom family courageously offered shelter to persecuted Jews during the Nazi occupation of Holland. Then a trap brought about the family's arrest. Could God's love shine through, even in Ravensbruck? Though "pejoration" is an important notion for linguistic analysis and theory, there is still a lack of theoretical understanding and sound descriptive analysis. In this timely collection, the phenomenon of pejoration is studied from a number of angles. It contains studies from phonology, morphology, syntax, semantics and pragmatics, and deals with diverse languages and their variants. The collection will appeal to all those linguists with a genuine interest in locating pejoration at the grammar-pragmatics interface.

This book presents a systematic literature review of 156 published papers on business model innovation (BMI). The aim is to identify and integrate the different theoretical perspectives, analytical levels, and empirical contexts in order to deepen understanding of this complex phenomenon. The authors conduct an inductive thematic analysis based on an informal ontological classification that identifies 56 key themes. Within each theme, discussion focuses on thematic patterns, potential inconsistencies and debates, and future directions and opportunities for research. The book makes a number of significant contributions to the field. First, it offers a deeper understanding of the evolution of research on BMI through an ontological map that identifies the key thematic areas in the literature. Second, a multilevel model is developed that clarifies the concept of BMI by identifying its drivers, contingencies, and outcomes. Third, the authors identify clear and specific directions for further research and offer suggestions on research design, creating an informative road map for the future. The book will be of value both to scholars and researchers and to practitioners.

"The Celebrated Jumping Frog of Calaveras County" is an 1865 short story by Mark Twain. It was his first great success as a writer and brought him national attention.[1] The story has also been published as "Jim Smiley and His Jumping Frog" (its original title) and "The Notorious Jumping Frog of Calaveras County". In it, the narrator retells a story he heard from a bartender, Simon Wheeler, at the Angels Hotel in Angels Camp, California, about the gambler Jim Smiley. The narrator describes him: "If he even seen a straddle bug start to go anywheres, he would bet you how long it would take him to get to wherever he going to, and if you took him up, he would foller that straddle bug to Mexico but what he would find out where he was bound for and how long he was on the road."

But I do not account my life of any value nor as precious to myself, if only I may finish my course and the ministry that I received from the Lord Jesus, to testify to the gospel of the grace of God. —Acts 20:24 (ESV) Growing old has been the greatest surprise of my life," says Billy Graham, known by many as God's Ambassador. "I would have never guessed what God had in store for me, and I

know that as I am nearing home, He will not forsake me the last mile of the way.” In *Nearing Home* this man of faith—now in his nineties—explores the challenges of aging while gleaning foundational truths from Scripture. Billy Graham invites us to journey with him as he considers the golden years while anticipating the hope of being reunited with his wife, Ruth, in his heavenly home that eclipses this world. “When granted many years of life, growing old in age is natural, but growing old with grace is a choice,” says the author. “Growing older with grace is possible for all who will set their hearts and minds on the Giver of grace, the Lord Jesus Christ.” Join Billy Graham as he shares the challenges of fading strength but still standing strong in his commitment to finishing life well. “Explore with me not only the realities of life as we grow older but also the hope and fulfillment and even joy that can be ours once we learn to look at these years from God’s point of view and discover His strength to sustain us every day.” —BILLY GRAHAM

Precalculus is adaptable and designed to fit the needs of a variety of precalculus courses. It is a comprehensive text that covers more ground than a typical one- or two-semester college-level precalculus course. The content is organized by clearly-defined learning objectives, and includes worked examples that demonstrate problem-solving approaches in an accessible way. Coverage and Scope Precalculus contains twelve chapters, roughly divided into three groups. Chapters 1-4 discuss various types of functions, providing a foundation for the remainder of the course. Chapter 1: Functions Chapter 2: Linear Functions Chapter 3: Polynomial and Rational Functions Chapter 4: Exponential and Logarithmic Functions Chapters 5-8 focus on Trigonometry. In Precalculus, we approach trigonometry by first introducing angles and the unit circle, as opposed to the right triangle approach more commonly used in College Algebra and Trigonometry courses. Chapter 5: Trigonometric Functions Chapter 6: Periodic Functions Chapter 7: Trigonometric Identities and Equations Chapter 8: Further Applications of Trigonometry Chapters 9-12 present some advanced Precalculus topics that build on topics introduced in chapters 1-8. Most Precalculus syllabi include some of the topics in these chapters, but few include all. Instructors can select material as needed from this group of chapters, since they are not cumulative. Chapter 9: Systems of Equations and Inequalities Chapter 10: Analytic Geometry Chapter 11: Sequences, Probability and Counting Theory Chapter 12: Introduction to Calculus

Interpreting the Great Awakening of the eighteenth century was in large part the work of Jonathan Edwards; whose writings on the subject defined the revival tradition in America. Moving from sensitive descriptions of "the Surprising work of God" in conversion to a consuming quest for the essence of true religion, and threading his way through mounting controversies over "errors in doctrine and disorders in practice," Edwards sought to locate an authentic core of evangelical experience, to define it in terms of biblical faith and psychological insight, and to defend it against both overheated zealous and rationalistic critics. The tracts that unfold his thoughts, presented here (with related correspondence ) for the first

time in accurate critical texts, document a movement so significant for the American character that it has been called "our national conversion." In a carefully researched introduction, C.C. Goen identifies the "Arminian threat" to which the Northampton pastor responded at the onset of the Awakening, and traces Edwards' understanding of vital religion as it developed in the ambiguous context of revivalism. Mr. Goen's study also illuminates little-known aspects of A Faithful Narrative and describes the haphazard way in which that important work reached its eager audience. C.C. Goen, author of *Revivalism and Separatism in New England, 1740-1800* (1962), is professor of church history at the Wesley Theological Seminary in Washington, D.C.

While certain ecological problems associated with artificial night lighting are widely known-for instance, the disorientation of sea turtle hatchlings by beachfront lighting-the vast range of influences on all types of animals and plants is only beginning to be recognized. From nest choice and breeding success of birds to behavioral and physiological changes in salamanders, many organisms are seriously affected by human alterations in natural patterns of light and dark. *Ecological Consequences of Artificial Night Lighting* is the first book to consider the environmental effects of the intentional illumination of the night. It brings together leading scientists from around the world to review the state of knowledge on the subject and to describe specific effects that have been observed across a full range of taxonomic groups, including mammals, birds, reptiles and amphibians, fishes, invertebrates, and plants. *Ecological Consequences of Artificial Night Lighting* provides a scientific basis to begin addressing the challenge of conserving the nighttime environment. It cogently demonstrates the vital importance of this until-now neglected topic and is an essential new work for conservation planners, researchers, and anyone concerned with human impacts on the natural world.
