In *Writing After War*, John Limon develops a theory of the relationship of war in general to literature in general, in order to make sense of American literary history in particular. Applying the work of war theorists Carl von Clausewitz and Elaine Scarry, John Limon argues that *The Iliad* inaugurates Western literature on the failure of war to be duel-like, to have a beautiful form. War's failure is literature's justification. American literary history is demarcated by wars, as if literary epochs, like the history of literature itself, required bloodshed to commence. But in chapters on periods of literary history from realism, generally taken to be a product of the Civil War, through modernism, usually assumed to be a prediction or result of the Great War, up to postmodernism which followed World War II and spanned Vietnam, Limon argues that, despite the looming presence of war in American history, the techniques that define these periods are essentially ways of not writing war. From James and Twain, through Fitzgerald, Faulkner, and even Hemingway, to Pynchon, our national literary history is not hopelessly masculinist, Limon argues. Instead, it arrives naturally at Bobbie Ann Mason and Maxine Hong Kingston. Kingston brings the discussion full circle: *The Woman Warrior*, like *The Iliad*, appears to condemn the fall from duel to war that is literature's endless opening.

In this study, the author uses the letters, diaries, memoirs, and reports of veterans from three conflicts - the First and Second World Wars and the Vietnam War - to establish a picture of the man-at-arms. She suggests that the structure of war encourages pleasure in killing, and that ordinary, gentle human beings in civilian life can become enthusiastic killers without becoming brutalized by the horrors of combat.

*The Real Custer* takes a good hard look at the life and storied military career of George Armstrong Custer—from cutting his teeth at Bull Run in the Civil War, to his famous and untimely death at Little Bighorn in the Indian Wars. Author James Robbins demonstrates that Custer, having graduated last in his class at West Point, went on to prove himself again and again as an extremely skilled cavalry leader. Robbins argues that Custer's undoing was his bold and cocky attitude, which caused the Army's bloodiest defeat in the Indian Wars. Robbins also dives into Custer's personal life, exploring his letters and other personal documents to reveal who he was as a person, underneath the military leader. *The Real Custer* is an exciting and valuable contribution to the legend and history of Custer that will delight Custer fans as well as readers new to the legend.

Detention and confinement—of both combatants and large groups of civilians—have become fixtures of asymmetric wars over the course of the last century.

Counterinsurgency theoreticians and practitioners explain this dizzying rise of detention camps, internment centers, and enclavisation by arguing that such actions "protect" populations. In this book, Laleh Khalili counters these arguments, telling the story of how this proliferation of concentration camps, strategic hamlets, "security walls," and offshore prisons has come to be. *Time in the Shadows* investigates the two major liberal counterinsurgencies of our day: Israeli occupation of Palestine and the U.S. War on Terror. In rich detail, the book investigates Abu Ghraib, Guantánamo Bay, CIA black

sites, the Khiam Prison, and Gaza, among others, and links them to a history of colonial counterinsurgencies from the Boer War and the U.S. Indian wars, to Vietnam, the British small wars in Malaya, Kenya, Aden and Cyprus, and the French pacification of Indochina and Algeria. Khalili deftly demonstrates that whatever the form of incarceration—visible or invisible, offshore or inland, containing combatants or civilians—liberal states have consistently acted illiberally in their counterinsurgency confinements. As our tactics of war have shifted beyond slaughter to elaborate systems of detention, liberal states have warmed to the pursuit of asymmetric wars. Ultimately, Khalili confirms that as tactics of counterinsurgency have been rendered more "humane," they have also increasingly encouraged policymakers to willingly choose to wage wars.

This comprehensive volume provides a wealth of information with annotated listings of more than 3,500 titles—a broad sampling of books on the war years 1939-1945. Includes both fiction and nonfiction works about all aspects of the war. Professional resources for educators aligned to the educational standards for social studies; technical references; periodicals and electronic resources; a directory of WWII museums, memorials, and other institutions; and topics for exploration complement this excellent library and classroom resource.

The "moving" true story of a woman fighting to give a group of chimpanzees a second chance at life (People). In 1997, Gloria Grow started a sanctuary for chimps retired from biomedical research on her farm outside Montreal. For the indomitable Gloria, caring for thirteen great apes is like presiding over a maximum-security prison, a Zen sanctuary, an old folks' home, and a New York deli during the lunchtime rush all rolled into one. But she is first and foremost creating a refuge for her troubled charges, a place where they can recover and begin to trust humans again. Hoping to win some of this trust, journalist Andrew Westoll spent months at Fauna Farm as a volunteer, and in this "incisive [and] affecting" book, he vividly recounts his time in the chimp house and the histories of its residents (Kirkus Reviews). He arrives with dreams of striking up an immediate friendship with the legendary Tom, the wise face of the Great Ape Protection Act, but Tom seems all too content to ignore him. Gradually, though, old man Tommie and the rest of the "troop" begin to warm toward Westoll as he learns the routines of life at the farm and realizes just how far the chimps have come. Seemingly simple things like grooming, establishing friendships and alliances, and playing games with the garden hose are all poignant testament to the capacity of these animals to heal. Brimming with empathy and entertaining stories of Gloria and her charges, *The Chimps of Fauna Sanctuary* is an absorbing, bighearted book that grapples with questions of just what we owe to the animals who are our nearest genetic relations. "A powerful look at how we treat our closest relatives." —The Plain Dealer "I knew the prison-like conditions of the medical research facility from which Gloria rescued these chimpanzees; when I visited them at their new sanctuary I was moved to tears. . . . Andrew Westoll is a born storyteller: *The Chimps of Fauna Sanctuary*, written with empathy and skill, tenderness and humour, involves us in a world few understand. And leaves us marveling at the ways in which chimpanzees are so like us, and why they deserve our help and are entitled to our respect." —Dr. Jane Goodall "This book will make you think deeply about our relationship with great apes. It amazed me to discover the behaviors and feelings of the chimpanzees." —Temple Grandin, author of *Animals in*

*Intimate Warfare: The True Story of the Arturo Gatti and Micky Ward Boxing Trilogy* traces the lives and careers of two legendary fighters—Micky Ward, a humble, hardscrabble, blue-collar Irishman from Lowell, Massachusetts, and Arturo Gatti, a handsome, flashy, charismatic Italian-born star who was raised in Montreal. Dennis Taylor and John J. Raspanti paint a vivid portrait of these two fighters who ushered each other into boxing lore and formed an unlikely friendship despite their brutal battles in the ring. Gatti's life would end tragically and mysteriously just a few years later, but his name and Ward's remain tied together in boxing history. In *Intimate Warfare*, each of the three spectacular fights between Gatti and Ward, two of which were named *The Ring* magazine's "Fight of the Year," are described in detail. Multiple photographs from the trilogy highlight the intensity and power of these epic collisions. With a foreword by former world champion and International Boxing Hall of Famer Ray "Boom Boom" Mancini, this book will be of interest to all fans of boxing.

*Memory, Narrative and the Great War* provides a detailed examination of the varied and complex war writings of a relatively marginal figure, Patrick MacGill, within a general framework of our current pre-occupation with blood, mud and suffering. In particular, it seeks to explain how his interpretation of war shifted from the heroic wartime autobiographical trilogy, with its emphasis on 'the romance of the rifleman' to the pessimistic and guilt-ridden interpretations in his post-war novel, *Fear!*, and play, *Suspense*. Through an exploration of the way in which war-time experiences were remembered (and re-remembered) and retold in strikingly different narratives, and using insights from cognitive psychology, it is argued that there is no contradiction between these two seemingly opposing views. Instead it is argued that, given the present orientation and problem-solving nature of both memory and narrative, the different interpretations are both 'true' in the sense that they throw light on the ongoing way in which MacGill came to terms with his experiences of war. This in turn has implications for broader interpretations of the Great War, which has increasingly be seen in terms of futile suffering, not least because of the eloquent testimony of ex-Great War soldiers, reflecting on their experiences many years after the event. Without suggesting that such testimony is invalid, it is argued that this is one view but not the only view of the war. Rather wartime memory and narrative is more akin to an ever-changing kaleidoscope, in which pieces of memory take on different (but equally valid) shapes as they are shaken with the passing of time.

Is any war a "good war"? In *Worshipping the Myths of World War II*, the author takes a critical look at what he sees is America's dedication to war as panacea and as Washington's primary method for leading the world. Articulating why he believes the lessons of World War II are profoundly relevant to today's events, Edward W. Wood, Jr., reflects on such topics as the killing of innocents, which became increasingly accepted during the war; on how actual killing is usually ignored in war discussions and reporting; on the lifetime impact of frontline duty, which he knew firsthand; on the widely accepted concept of "the Greatest Generation"; on present criteria for judging war memoirs and novels; on the

action, history may have only a very short way to run. Whether it is the growth of world population, of greenhouse gas concentrations and the accelerating rate of climate change, the running down of oil and natural gas reserves, growing shortages of fresh water for agriculture, industry and domestic use, or the increasing difficulty in controlling epidemic diseases we are facing a mounting global crisis that will peak in less than a generation, around the year 2030. Taken together, these trends point to a potentially apocalyptic period, if not for the planet itself then certainly for human societies and for humankind. In this compelling book, and update to *The 2030 Spike*, Colin Mason explains in clear and irrefutable terms what is going on largely below the surface of our daily or weekly news bulletins. The picture he paints is stark, and yet it is not bleak. Being forewarned, we are forearmed, and he draws on his own extensive political experience to describe how much we can do as individuals, and above all collectively, not merely to avert crisis but to engineer thoroughgoing change that can usher in genuinely sustainable and valuable alternatives to the way we live now.

Explores the secretive history of the United States' use of armed drones and their key role not only on today's battlefields, but also in a covert targeted killing project that has led to the deaths of thousands. There is a covert war, one in which drones scour the skies of Yemen, Pakistan and Somalia in search of militant and terrorist targets

A riveting true story of tank warfare on the frontlines of Operation Desert Storm. August 1990: Iraqi forces under the command of Saddam Hussein invade the tiny emirate of Kuwait. Within hours, the Kuwaiti defenses collapse under the onslaught of the Iraqi Army. In response, the US military leads a coalition of thirty-four nations in what becomes Operation Desert Storm—a violent campaign to eject the Iraqis from Kuwait. At the tip of the spear are the men of Ghost Troop in the US Army's 2d Armored Cavalry Regiment. Commanded by Captain Joseph Sartiano, Ghost Troop was among the lead elements of the US VII Corps' advance into Iraq. On February 26, 1991, Ghost Troop encountered a brigade-sized element of the Tawakalna Division— the elite frontline forces of Iraq's Republican Guard. Although significantly outnumbered and outgunned, Ghost Troop won a decisive victory with minimal losses to their own ranks. History would call it the Battle of 73 Easting. Based on hours of interviews and archival research by author Mike Guardia, this minute-by-minute rendition of the battle reveals an intimate, no-holds-barred account of modern warfare...as told by the men who lived it. *Days of Fury* is their story.

This book tells the story of the greatest blood-and-guts rivalry in the history of boxing, the spectacular trilogy of fights between Arturo "Thunder" Gatti and "Irish" Micky Ward. It paints a vivid portrait of two charismatic boxers who ushered each other into boxing lore with their three epic collisions, tracing their lives, careers, collisions in the ring, and the unlikely friendship they formed despite their brutal fights.

In the wake of the anthrax letters following the attacks on the World Trade Center, Americans have begun to grapple with two difficult truths: that there is no terrorist threat more horrifying -- and less understood -- than germ warfare, and that it would take very little to mount a devastating attack on American soil. In *Germs*, three veteran reporters draw on top sources inside and outside the U.S. government to lay bare Washington's secret strategies for combating this deadly threat. Featuring an inside look at how germ warfare has been waged throughout history and what form its future might take (and in whose hands), *Germs* reads like a gripping detective story told by fascinating key figures: American and Soviet medical specialists who once made germ weapons but now fight their spread, FBI agents who track Islamic radicals, the Iraqis who built Saddam Hussein's secret arsenal, spies who travel the world collecting lethal microbes, and scientists who see ominous developments on the horizon. With clear scientific explanations and harrowing insights, *Germs* is a masterfully written -- and timely -- work of investigative journalism.

A revealing saga detailing the economic, familial, and social bonds forged by Indian trader George Galphin in the early American South. A native of Ireland, George Galphin arrived in South Carolina in 1737 and quickly emerged as one of the most proficient deerskin traders in the South. This was due in large part to his marriage to Metawney, a Creek Indian woman from the town of Coweta, who incorporated Galphin into her family and clan, allowing him to establish one of the most profitable merchant companies in North America. As part of his trade operations, Galphin cemented connections with Indigenous and European peoples across the South, while simultaneously securing links to merchants and traders in the British Empire, continental Europe, and beyond. In *George Galphin's Intimate Empire: The Creek Indians, Family, and Colonialism in Early America*, Bryan C. Rindfleisch presents a complex narrative about eighteenth-century cross-cultural relationships. Reconstructing the multilayered bonds forged by Galphin and challenging scholarly understandings of life in the Native South, the American South more broadly, and the Atlantic World, Rindfleisch looks simultaneously at familial, cultural, political, geographical, and commercial ties--examining how eighteenth-century people organized their world, both mentally and physically. He demonstrates how Galphin's importance emerged through the people with whom he bonded. At their most intimate, Galphin's multilayered relationships revolved around the Creek, Anglo-French, and African children who comprised his North American family, as well as family and friends on the other side of the Atlantic. Through extensive research in primary sources, Rindfleisch reconstructs an expansive imperial world that stretches across the American South and reaches into London and includes Indians, Europeans, and Africans who were intimately interconnected and mutually dependent. As a whole, *George Galphin's Intimate Empire* provides critical insights into the intensely personal dimensions and cross-cultural contours of the eighteenth-century South and how empire-building and colonialism were, by their very

Once the Union Army gained control of the upper rivers of the Mississippi Valley during the first

half of 1862, slow and heavy ironclads proved ineffective in patrolling the waters. Hastily

outfitted steamboats were covered with thin armor and pressed into duty. These "tinclads"

fought Confederate forces attacking from the riverbanks, provided convoy for merchant

steamers, enforced revenue measures, and offered tow, dispatch, and other fleet support

services. This history documents the service records and duties of these little-known vessels of

the Union fleet.

This book examines the role of military virtues in today's armed forces. Although long-

established military virtues, such as honor, courage and loyalty, are what most armed forces

today still use as guiding principles in an effort to enhance the moral behavior of soldiers, much

depends on whether the military virtues adhered to by these militaries suit a particular mission

or military operation. Clearly, the beneficiaries of these military virtues are the soldiers

themselves, fellow-soldiers, and military organizations, yet there is little that regulates the

behavior of soldiers towards civilian populations. As a result, troops trained for combat in

today's missions sometimes experience difficulty in adjusting to the less aggressive ways of

working needed to win the hearts and minds of local populations after major combat is over. It

can be argued that today's missions call for virtues that are more inclusive than the traditional

ones, which are mainly about enhancing military effectiveness, but a convincing case can be

made that a lot can already be won by interpreting these traditional virtues in different ways.

This volume offers an integrated approach to the main traditional virtues, exploring their possible relevance and proposing new ways of interpretation that are more in line with the military tasks of the 21st century. The book will be of much interest to students of military ethics, philosophy, and war and conflict in general.

Charles Lee, a former British army officer turned revolutionary, was one of the earliest advocates for American independence. Papas shows that few American revolutionaries shared Lee's radical political outlook, and his confidence that the American Revolution could be won primarily by the militia (or irregulars) rather than a centralized regular army.

The characteristic act of men at war is not killing. It is killing by committing shocking and unspeakable atrocities, when circumstances permit. What drives ordinary people into hatred, genocide, inhumanity and evil? What turns friends and neighbours against each other with such savagery? Where does such barbarity come from? This collection examines the anarchy, cruelty and overwhelming confusion of modern warfare. In particular it analyzes: ¢ what happens when morality vanishes from the battlefield and why torture is endemic in modern warfare; ¢ how human rights, in times of war, lose meaning as a set of principles; ¢ whether official propaganda and enemy demonization make barbaric behaviour easier; ¢ how we can develop cultures opposed to torture that damage the legitimacy of our societies. Through a wealth of case studies that have been carefully selected in terms of their themes, approaches and methodologies, this comprehensive volume provokes discussion and enhances understanding from a variety of disciplinary perspectives.

This book examines the British soldiers on the Western Front and how they responded to the war landscape they encountered behind the lines and at the front. Using a multidisciplinary perspective, this study investigates the relationship between soldiers and the spaces and materials of the warzone, analyzing how soldiers constructed a 'sense of place' in the hostile, unpredictable environment. Drawing upon recent developments within First World War Studies and the anthropological examination of the fields of conflict, an ethnohistorical perspective of the soldiers is built which details the various ways soldiers responded to the physical and material world of the Western Front. This study is also grounded in the wider debates on how the First World War is remembered within Britain and offers an alternative perspective on the individuals who fought in the world's first global conflagration nearly a century ago.

Offers a comprehensive look at the history of the state of Florida, from its discovery, exploration, and settlement through its becoming a state, to notable events in the early twenty-first century.

This book explores the ethical implications of war in the contemporary world. The author, a leading theorist of warfare, explains why it is of crucial importance that Western countries should continue to apply traditional ethical rules and practices in war, even when engaging with international terrorist groups. The book uses the work of the late American philosopher Richard Rorty to explain the need to make ethical rules central to the conduct of military operations. Arguing that the question of ethics was re-opened by the 'War on Terror', the book then examines America's post-9/11 redefinition of its own prevailing discourse of war. It ends with a discussion of other key challenges to the ethics of war, such as the rise of private security companies and the use of robots in war. In exploring these issues, this book seeks to place ethics at the centre of debates about the conduct of future warfare. This book will be of great interest to all students of military ethics, war studies, military history and strategic studies in general, and to military colleges in particular.
