Being hub of the family, she not only performs the usual maternal tasks, but also protects the family with extreme efficiency from potential enemies, apart from guiding the family to safety in times of crises. The matriarch keeps male suitors at a trunk's distance, only allowing them to join the herd when their presence is felt necessary to service the females in oestrus. Her long memory over fifty years experiences, among others, help in leading the family to introduce potential feeding grounds, waterholes, natural springs and salt licks within her domain ranging over 50 or more km². The matriarchal family remains united and truly stable to enable to wage war against adversaries and enemies.
