A psychologist with a reputation for penetrating to the heart of complex parenting issues joins forces with a physician and bestselling author to tackle one of the most disturbing and misunderstood trends of our time -- peers replacing parents in the lives of our children. Dr. Neufeld has dubbed this phenomenon peer orientation, which refers to the tendency of children and youth to look to their peers for direction: for a sense of right and wrong, for values, identity and codes of behaviour. But peer orientation undermines family cohesion, poisons the school atmosphere, and fosters an aggressively hostile and sexualized youth culture. It provides a powerful explanation for schoolyard bullying and youth violence; its effects are painfully evident in the context of teenage gangs and criminal activity, in tragedies such as in Littleton, Colorado; Tabor, Alberta and Victoria, B.C. It is an escalating trend that has never been adequately described or contested until *Hold On to Your Kids*. Once understood, it becomes self-evident -- as do the solutions. *Hold On to Your Kids* will restore parenting to its natural intuitive basis and the parent-child relationship to its rightful preeminence. The concepts, principles and practical advice contained in *Hold On to Your Kids* will empower parents to satisfy their children's inborn need to find direction by turning towards a source of authority, contact and warmth. Something has changed. One can sense it, one can feel it, just not find the words for it. Children are not quite the same as we remember being. They seem less likely to take their cues from adults, less inclined to please those in charge, less afraid of getting into trouble. Parenting, too, seems to have changed. Our parents seemed more confident, more certain of themselves and had more impact on us, for better or for worse. For many, parenting does not feel natural. Adults through the ages have complained about children being less respectful of their elders and more difficult to manage than preceding generations, but could it be that this time it is for real? -- from *Hold On to Your Kids*

In this article, we review some properties of the harmonic quadrilateral related to triangle simedians and to Apollonius's Circle. This book provides a clear overview of current thinking on the teaching and learning of geography. It is an ideal companion to all students beginning a career in teaching the subject in secondary schools. The chapters are written by experienced teacher educators and bridge both theory and practice. The writers focus on the continuities, whilst setting them in the context of the changing curriculum. The book is divided into four parts. Part One examines the historical context of geography teaching. Part Two looks at issues of course planning, design, syllabuses and programmes of study. Underlying this section is the assumption that

geography should not be considered in isolation from other subjects, but rather as part of a whole curriculum. Part Three concentrates on teaching and learning, and includes chapters on the use of maps, field work, IT and first hand experience within a community. The final section covers the issues associated with assessment, across the whole school age range.

Lucretius' poem, for which Epicurean philosophy provided the inspiration, attempts to explain the nature of the universe and its processes with the object of freeing mankind from religious fears. The third book not only seeks to demonstrate that, since the soul is mortal, there can be no after-life, but also aims to reconcile the reader to the prospect of the end of his consciousness. This edition incorporates a new text and prose translation and is designed to set the book in the context of the whole poem and of the Epicurean philosophical system, to explain and elucidate its argument, and at the same time to analyse some of the literary and artistic features which contribute to Lucretius' poetic achievement and stature. Latin text with facing page translation.

The short-sighted adolescent is a passionate reader who takes various cultural figures as models, trying to emulate both their lives and their works. The pupil protagonist is a poor student, who likes science and reads a lot of books, sometimes staying up all night to do so. At the age of 15, he decides to write a novel to demonstrate to his teachers that he is not as mediocre as all the other students, and is prepared to give up everything he holds dear for his art. The novel is written in a number of notebooks--the "diary" of the title--but our myopic hero ultimately fails in three subjects and is too lazy to learn and has to repeat the school year. *Diary of a Short-Sighted Adolescent* was written by the young Mircea Eliade, one of Romania's greatest writers and intellectuals. The book can be viewed as an early 20th century *Catcher in the Rye*, and allows us an intimate view of the developing genius--his teachers, his classmates' academic and amorous rivalries, his first sexual experiences--and an introduction to the themes of religion, self-knowledge, erotic sensibility, artistic creation, and otherness; ideas which would

preoccupy him until the end of his life.

„Aceste lecții au fost scrise pentru cei care știu puțin sau nu știu nimic despre știința modernă. Împreună, ele oferă o privire de ansamblu concentrată asupra celor mai fascinante aspecte ale marii revoluții științifice în fizică în secolul XX și ale întrebărilor și misterelor pe care această revoluție le-a adus la lumină. Căci știința ne arată nu doar cum s-a înțelegem mai bine lumea, dar și cât de vastă e dimensiunea a ceea ce încă nu cunoaștem.“ (Carlo ROVELLI)

The Romanian writer Mateiu I. Caragiale (great playwright Ion Luca Caragiale's son), lived between 1885-1936. His main literary works are the short story "Remember" (1921) and the novel "Gallants of the Old Court" (1929, Romanian Writers Society's Award). He shines through the originality and distinction of his masterly controlled style. Written in the first person, "The Gallants of the Old Court (Craii de Curtea-Veche)" reveals the traits of, and satirizes, Romanian society in the early 20th century. Three self-indulgent, decadent characters while away their time, drinking, playing cards, chasing women. They also make allowance for the company of Gore Pirgu, an uncultured self-seeker of very low extraction, whose abominable character mirrors the new political class of the time. In this novel, the dying world of medieval boyars meets a rising fiercely capitalistic world, with new rules and ruthless behavior. Respected Romanian literary critic George Calinescu wrote: "Reality is transfigured, it becomes fantastical and a sort of Edgar Poe-like unease stirs these worthless figures of the old Romanian capital." "Gallants of the Old Court" opens a fascinating universe in front of us, as well as explains usually untapped regions of the human soul, helping us to better understand not only most of the Byzantine, Balkan, and Romanian spirit, but also a large size of our own unexplored self. The translator has done a painstakingly perfectionist work in rendering the text into English in the best possible way and also explaining every detail that might help us understand the spirit and the letter of the original, even without any hint of knowledge of Romanian. "Gallants of the Old Court" is a great read and one of the masterpieces of world literature; and this translation is surely the best so far. The Cube of Strategic Management: The Distinctive Advantage of Organizations is a trans-disciplinary book that introduces the author's new business model of the geometrization of management. The author advocates that strategic management has to shift to include a science and technology perspective, to not only support business administration but also to make this scientific perspective an inherent part of management strategy building. The book spans the fundamental and the theoretical aspects and advances this new management model in response to the current and future 21st-century synergic interconnection needs in addressing management and marketing post-modern strategies. The book is a quintessence of the historical theories of the various 8th fold ideas of management (Taylor, Drucker, Peters & Waterman, Covey) and applies them in an innovative new way. The author uses the cube and its 8 corners for the first time to represent 8 forms of the strategic management way of business, in that the 8 corners of a cube represent the competitive advantage of (any) organization.

The book presents nanoscience and nanotechnology to a broad audience that does not necessarily have a scientific background. This book starts with the fundamental physicochemical properties of nanoparticles and nanostructures, and discusses how these special properties can be manipulated to produce high-performance materials and devices. In the following chapters, the scope is broadened to cover naturally occurring nanoparticles and artificially-engineered carbon nanoparticles, their mechanical properties, and their importance to the rest of nanotechnology. The book also covers the two design ideologies for manufacturing nanostructures, the bottom-up and top-down methods, and discusses how these two can be combined to allow for the imaging, probing and manipulation of nanostructures. The remainder of the book surveys the current state of nanotechnology, including the use of single-nanoparticle devices in data storage, electronics, optics, and solar power; advances in nanoparticle manufacturing and biotechnology that can lead to powerful new cancer treatments; and the use of nanotechnology to study the "quantum vacuum".

The lives of middle school students are dynamic, and their needs and desires are always evolving. They experience

more complicated lives as influences of the broader society including popular media and technology, immigration and cultural diversity, amplified political divisiveness, and bullying effect their daily lives both in and out of school. These influences have contributed to the need for more socialemotional support and the desire of students and teachers alike to find and express their voices. Since the publication of the 2002 Handbook volume focusing on curriculum, instruction, and assessment, the ideas, approaches, and practices of middle school educators and researchers have also needed to evolve and change in many ways to meet these changing realities and the needs of students, teachers, and schools. This volume includes chapters focusing on varying aspects of curriculum, instruction, and assessment currently being implemented in middle grades classrooms across the country.

In these ten stories, Ford mines literary gold from the wind-scrubbed landscape of the American West - and from the guarded hopes and gnawing loneliness of the people who live there. A refugee from justice driving across Wyoming with his daughter; an unhappy girlfriend and a stolen Mercedes; a boy watching his family dissolve in a night of tragicomic violence; two men and a woman swapping hard-luck stories in a frontier bar as they try to sweeten their luck. Rock Springs is a masterpiece of taut narration, cleanly chiselled prose, and empathy so generous that it feels like a kind of grace.

This collection of expert articles highlights the standards and practices concerning sustainability reporting among companies in Central and Eastern Europe (CEE). Due to the growing interest in corporate social responsibility issues,

sustainability reporting has become increasingly common among businesses that claim to adhere to certain social, environmental and economic standards. While it can be observed that sustainability reporting is widely practiced in Western and Northern European countries, only few studies have been conducted on this topic in the CEE region. Drawing on a major empirical study involving researchers from 10 different CEE countries, this book addresses the status quo of sustainability reporting, outlines future prospects and provides essential recommendations for practitioners. 'This is a well written and thoroughly researched book on an issue of vital importance. It places the experiences of individual teachers under pressure into the larger UK and worldwide context. Policy makers need to wake up to its messages' - Sara Bubb, Institute of Education, University of London What is it really like to be a teacher in today's demanding classrooms? Maurice Galton and John MacBeath spoke to teachers, parents and students in England, and compared their responses to similar inquiries in Asia, America, Australia and New Zealand. Their findings were disturbing. Issues examined in the book include: - frustrations facing those trying to make inclusive education work in practice - effects of constantly changing policies on the staff required to implement them - loss of status within the teaching profession - reasons for teachers choosing to leave the profession - the consequences of staying on and fighting for what one believes in This fascinating read will be of interest to anyone involved in teaching, school leadership and educational policy.
