Passion. Loyalty. Salvation. Small time semi-pro football, the non-league. A world away from the wealth and the television cameras. A young player touched with brilliance arrives from nowhere. An ambitious manager determines to make him his own. And the old soul of the club still has dreams of glory. A haunting and humorous new play about the dying romance of the great English game - and the tender, savage love that powers it.

This book presents a collection of original research papers addressing the relationship between information systems (IS) and innovation. “Open”, “Smart” and “Network” are three keywords that are currently guiding information systems (IS) innovation, enhancing IS potentialities and their ability to support decision-making processes. The book discusses the relevance of these three new concepts in connection with technological and organizational innovations (i.e. cloud, smart technologies and networking), and the role they play in the development of accounting and management information systems. The book’s primary aim is to investigate how these innovations could influence information systems (with a particular focus on accounting and management information systems) by enhancing their information potentialities and improving accounting methodologies, performance measurement systems, data management, information systems architectures, and external and internal reporting. The book is based on a selection of the best papers—original double-blind reviewed

‘This is an important text. It brings together critical reflections on the discipline's contribution in terms of theory, practice and pedagogy and as such is equally as insightful and challenging as some of its recent predecessors (eg Brown et al 1996; Brown and Turley 1997; Brown 1998).

The book represents a useful point of departure for those setting off on their own critical journeys and, thus, it should be included on the reading lists of all those carrying out masters or doctoral research in marketing' - Journal of Marketing Management This book provides a challenging and stimulating coverage of a broad range of key issues in contemporary marketing - such as marketing philosophy, marketing ethics, the mar

The Routledge Companion to Intellectual Capital offers a comprehensive overview of an important field that has seen a diverse range of developments in research in recent years. Edited by leading scholars and with contributions from top academics and practitioners from around the world, this volume will provide not just theoretical analysis but also evaluate practice through case studies. Combining theoretical and practice perspectives, this comprehensive Companion addresses the role of IC inside and between organisations and institutions and how these contribute to the IC of nations, regions and clusters. Drawing on an extensive range of leading contributors, The Routledge Companion to Intellectual Capital will be of interest to scholars who want to understand IC from a variety of perspectives, as well as students who are seeking an authoritative and comprehensive source on IC and knowledge management.

Trial. Error. Better Beer. When most brewers think of an experimental beer, odd creations come to mind. And sure, in this book you can learn how to brew with ingredients like bacon, chanterelle mushrooms, defatted cacao nibs, and peanut butter powder. However, experimental homebrewing is more than that. It's about making good beer--the best beer, in fact. It's about tweaking process, designing solid recipes, and blind evaluations. So put on your goggles, step inside the lab, and learn from two of the craziest scientists around: Drew Beechum and Denny Conn. Get your hands dirty and tackle a money-saving project or try your hand at an off-the-wall technique. Freeze yourself an Eisbeer, make a batch of canned starter wort, fake a cask ale, extract flavors with distillation, or sit down at the microscope and do some yeast cell counting. More than 30 recipes and a full chapter of open-ended experiments will complete your transformation. Before you realize it, you'll be donning a white lab coat and sharing your own delicious results!

Craft Beer World is the must-have companion for anyone who appreciates decent beer. The last few years have seen an explosion in the popularity of craft beers across the globe, with excellent new brews being produced everywhere from Copenhagen to Colorado, Amsterdam to Auckland. With more amazing beers available than ever before, it's hard to know which ones to choose. That's where Craft Beer World comes in. Gathering together over 300 of the most innovative and tastiest beers you need to try, and divided into 50 different categories, you will find the best of the best each style has to offer. Every category comes with an explanation of the key characteristics of the style - whether it's an American IPA bursting with citrusy C-hops or an Imperial Stout full of dark roasted malts - along with an example of a classic brew and a selection of cutting edge versions that are certain to become instant favourites. So whether you're looking for bitter beers or balanced flavours, a hit of hops or a hint of coffee, the reviews will point you in the right direction to find the perfect beer to suit your tastebuds. Also included throughout the book are interesting nuggets of beer information, covering everything from the catalyst that has caused the astonishing growth in craft beer through to matching beer with food and how to serve your drinks. Mark Dredge is an award-winning beer writer and runs the popular blog Pencil and Spoon where he writes about anything ale-related. Mark has won awards from the British Guild of Beer Writers in 2009, 2010 and 2011, his work is featured in leading publications across the globe and he's an international beer judge.

The judgment of the European Court of Justice concerning the Kadi case has raised substantive and procedural issues that have caught the attention of scholars from many disciplines including EU law, constitutional law, international

law and jurisprudence. This book offers a comprehensive view of the Kadi case, and explores specific issues that are anticipated to resonate beyond the immediate case from which they derive. The first part of the volume sets out an analysis of the new judgment of the Court, favouring a "contextual" reading of what is the latest link in a judicial chain. The following three parts offer interdisciplinary accounts of the decision of the European Court of Justice, including legal theory, constitutional law, and international law. The book closes with an epilogue by Ernst-Ulrich Petersmann, who studies the role of the Kadi case in the methodology of international law and its contribution to the concept of global justice. The book brings together legal scholars from a range of fields, and discusses pressing topics such as the European Union's objective of 'the strict observance and the development of international law', the EU as a site of global governance, constitutional pluralism and the protections of fundamental rights. This book examines the relationship between digital innovations on the one hand, and accounting and management information systems on the other. In particular it addresses topics including cloud computing, data mining, XBRL, and digital platforms. It presents an analysis of how new technologies can reshape accounting and management information systems, enhancing their information potentialities and their ability to support decision-making processes, as well as

several studies that reveal how managerial information needs can affect and reshape the adoption of digital technologies. Focusing on the four major aspects data management, information system architecture, external and internal reporting, the book offers a valuable resource for CIOs, CFOs and more generally for business managers, as well as for researchers and scholars. It is mainly based on a selection of the best papers - original double blind reviewed contributions - presented at the 2015 Annual Conference of the Italian Chapter of the Association for Information Systems (AIS).

No political parties of present-day Germany are separated by a wider gulf than the two parties of labor, one democratic and reformist, the other totalitarian and socialist-revolutionary. Social Democrats and Communists today face each other as bitter political enemies across the front lines of the Cold War; yet they share a common origin in the Social Democratic Party of Imperial Germany. How did they come to go separate ways? By what process did the old party break apart? How did the prewar party prepare the ground for the dissolution of the labor movement

in World War I, and for the subsequent extension of Leninism into Germany? To answer these questions is the purpose of Carl Schorske's study.

Market-Driven Management adopts a broad approach to marketing, integrating the strategic and operational elements of the discipline. Lambin's unique approach reflects how marketing operates empirically, as both a business philosophy and an action-oriented process. Motivated by the increased complexity of markets, globalisation, deregulation, and the development of e-commerce, the author challenges the traditional concept of the 4Ps and the functional roles of marketing departments, focusing instead on the concept of market orientation. The book considers all of the key market stakeholders, arguing that developing market relations and enhancing customer value is the responsibility of every member of the organization, and that the development of this customer value is the only way for a firm to achieve profit and growth. New to this edition: - Greater coverage of ethical issues and corporate social responsibility; cultural diversity; value and branding and the economic downturn - Broad international perspective - Thoroughly revised to reflect the latest academic thinking and research With its unique approach, international cases and complementary online resources, this book is ideal for postgraduate and upper level undergraduate students of marketing, and for MBAs and Executive

MBA's.

Shake up your homebrewing routine with the masters. From the mad scientists who brought you *Experimental Homebrewing* comes an all-new type of brewing book. For the first time, drop by the garage - err, we mean brewery - of 25 of today's most talented homebrewers. Pick their brains about ingredients and equipment, learn their techniques, and of course, try their recipes. Among the brewers in this book, you'll find traditionalists and rule-breakers, gear nerds and the science-obsessed. Start a solera with Mike Tonsmeire, talk temperature control with John Palmer, or tweak your pH with Martin Brungard. Featured brewers also include: Fred Bonjour, Amanda Burkemper, Chris Colby, Kent Fletcher, Joe Formanek, Lars Marius Garshol, Jeff Gladish, Gary Glass, Janis Gross, Mary Izett, Annie Johnson, Brandon Jones, Mike Karnowski, Mike "Tasty" McDole, Marshall Schott, Nathan Smith, Curt Stock, Gordon Strong, Roxanne Westendorf, Keith Yager, and two guys named Denny and Drew. Brewers cover their favorite malts, hops, and yeasts, and recipes include a wide variety of styles, from IPAs and stouts to saisons and lagers. Whether you're looking to become the best brewer ever or simply looking for a new recipe to try this weekend, this book is a home run.

Greg Noonan's classic treatise on brewing lagers, *New Brewing Lager Beer*, offers a thorough yet practical education on the theory and techniques required to produce high-quality beers using all-grain methods either at home or in a small commercial brewery. This advanced all-grain reference book is recommended for intermediate, advanced and professional small-scale brewers. *New Brewing Lager Beers* should be part of every serious brewer's library.

Craft beer is about innovation, discovery and interpretation. Homebrewing is about all that and more! As the beer scene evolves, so do the beer styles we know and love. In *Modern Homebrew Recipes*, Grandmaster Beer Judge and author Gordon Strong takes you on a guided journey of brewing discovery that includes information about some of the latest BJCP style changes. Following a primer on specific mashing and hopping techniques, recipe formulation fundamentals and how to adapt recipes to your system, Strong shares more than 100 distinctive recipes. Strong also provides specific advice and sensory profiles for each beer. Strong's recipes are provided as-brewed, with delicious variations to get the creative juices flowing. *Modern Homebrew Recipes* is more than a book of recipes; it's a book that sets brewers on the path to discovering what's new in the world of homebrewing.

Journal offers recipes for every major style of beer to teach novice, intermediate and advanced brewers more about the craft and science of brewing. From classic styles like pale ales, IPAs, stouts and porters, to experimental beers such as oyster stout, bacon-smoked porter and jolly rancher watermelon wheat, brewers will learn more about brewing techniques and beer ingredients. Chris also shows how recipes can be modified to suit an individual brewer's taste or to transform one beer style into a related style, creating a lot of different and fantastic beer options. Quench your thirst for brewing knowledge on a journey through 101 different beers, spanning all the major beer categories in the 2016 Beer Judge Certification Program (BJCP) guidelines and most in the Great American Beer Festival (GABF) guidelines.

Dreaming humanity's future. There is nothing like the dream to create the future. Victor Hugo. Dream lofty dreams, and as you dream, so you shall become. Your vision is the promise of what you shall one day be; your ideal is the prophecy of what you shall at last unveil. James Allen. What is it we, as a human race, desire in the world? What dreams do we have to shape our future? Over 100 artists, activists, authors, educators, speakers, environmentalists, scientists, young entrepreneurs, visionaries, and Elders were asked for the following: A written description of your perfect world, or your dream world. This can be one sentence or many pages; a poem or researched essay. Your dream world can be as fantastic and marvelous as you want it to be. There are no rules, no right or wrong descriptions, only the world of your imagination and the world of your dreams.

the agricultural researcher needs to know in order to design, implement, analyze, and interpret the results of most experiments with crops. Designed specifically for the non-statistician, this valuable guide focuses on the practical problems of the field researcher. Throughout, it emphasizes the use of statistics as a tool of research—one that will help pinpoint research problems and select remedial measures. Whenever possible, mathematical formulations and statistical jargon are avoided. Originally published by the International Rice Research Institute, this widely respected guide has been totally updated and much expanded in this Second Edition. It now features new chapters on the analysis of multi-observation data and experiments conducted over time and space. Also included is a chapter on experiments in farmers' fields, a subject of major concern in developing countries where agricultural research is commonly conducted outside experiment stations. *Statistical Procedures for Agricultural Research, Second Edition* will prove equally useful to students and professional researchers in all agricultural and biological disciplines. A wealth of examples of actual experiments help readers to choose the statistical method best suited for their needs, and enable even the most complicated procedures to be easily understood and directly applied. An International Rice Research Institute Book

The long-awaited second volume of Anders Hald's history of the development of mathematical statistics. Anders Hald's *A History of Probability and Statistics and Their Applications before 1750* is already considered a classic by many mathematicians and

historians. This new volume picks up where its predecessor left off, describing the contemporaneous development and interaction of four topics: direct probability theory and sampling distributions; inverse probability by Bayes and Laplace; the method of least squares and the central limit theorem; and selected topics in estimation theory after 1830. In this rich and detailed work, Hald carefully traces the history of parametric statistical inference, the development of the corresponding mathematical methods, and some typical applications. Not surprisingly, the ideas, concepts, methods, and results of Laplace, Gauss, and Fisher dominate his account. In particular, Hald analyzes the work and interactions of Laplace and Gauss and describes their contributions to modern theory. Hald also offers a great deal of new material on the history of the period and enhances our understanding of both the controversies and continuities that developed between the different schools. To enable readers to compare the contributions of various historical figures, Professor Hald has rewritten the original papers in a uniform modern terminology and notation, while leaving the ideas unchanged. Statisticians, probabilists, actuaries, mathematicians, historians of science, and advanced students will find absorbing reading in the author's insightful description of important problems and how they gradually moved toward solution.

Marketing emphasizes quality, customer service and marketing and how these can be managed towards closing the 'quality gap' between what customers expect and what they get. The authors explore the process of developing and implementing relationship strategies and in so doing, signal a radical shift in marketing practice involving first the co-ordination of external (customer) markets and second, collaboration within internal (staff) markets in order to get the marketing mix right. The book is intended for all marketing managers coming to terms with doing business in turbulent markets and facing up to strategic quality and customer services issues.
