World production of citrus fruits continues an upward trend. Total world citrus production in 1961 amounted to about 24 MMT (69% oranges, 11 % tangerines, 11% lemons and limes, and 9% grapefruit) and is projected in 1990 at about 71 MMT (69% oranges, 14% tangerines, 10% lemons and limes, and 7% grape fruit). More than 125 countries and territories produce some type of citrus fruit; however, nearly 70% of the world total (54 MMT) in 1983 was accounted for by the ten largest producers, viz., United States (22.2%), Brazil (18.6%), Japan (6.6%), Spain (5.5%), Italy (4.8%), Mexico (4.0%), Argentina (2.8%), Israel (2.6%), Turkey (2.6%), and Egypt (1.8%). In 1983, about 60% of world citrus production was consumed in fresh form. During the 1960s and 1970s, fresh consumption increased at an average rate of about 4% per year; however, projections for the 1980s and 1990s show an annual average rate of only 2%. Countries differ in the utilization of their citrus crop. As an example, Mediterranean Basin countries use 80% of their production in fresh form, whereas the two largest citrus producers, the United States and Brazil, use less than 40% of their production in fresh form. The Mediterranean Basin countries are also the largest exporters of fresh citrus, accounting for about 75% of the world total. The major fresh citrus fruits exported in 1981 were oranges, (58%), tangerines (15%), lemons and limes (15%), and grapefruit (12%).

Annotation In developing countries and emerging economies, traditional industrial practices can be linked to policy changes which foster innovation, but can equally result in stagnation if the policy/practice mix is wrong. These case studies -- from Brazil, Chinese Taipei, India and Korea -- demonstrate that where industrial habits tend to reduce competitiveness, policies can make a difference. The book opens a fresh debate on the industrial policies developing countries need to adopt to compete and grow in a globalized economic environment.

Heart Imagery - A Path to Enlightenment is a continuation of the book This Now is Eternity, revealing exercises and meditations related to the most ancient spiritual system: Heart Imagery. It is a treasure full of advice, meditations and exercises that come directly from two of the last Great Masters of Heart Imagery. These Masters lived in the Tibetan area, but that isn't relevant. Like other Great Masters of Imagery (Anastasia from Russia, Colette Aboulker-Muscat from Jerusalem and Ana Pricop from Romania), the location and the time during which they lived was of no consequence. They were able to change anything: the past, the present and the future. They could reverse any action or thought. This is beyond our understanding. Remember that everything around you is a dream and that you can awaken at any moment if you really wish to. "Hormegeddon" is the term coined by entrepreneur and New York Times Bestselling Author Bill Bonner to describe what happens when you get too much of a good thing in the sphere of public policy, economics and business. Simply put, it ends in disaster. Drawing on stories and examples from throughout modern political history—from Napoleon's invasion of Russia to the impending collapse of the American healthcare system, from the outbreak of WWII and the fall of the Third Reich to the 21st century War on Terror, from the Great Recession to the sovereign debt crisis—Bonner pursues a modest ambition: to understand what goes wrong. History is not a clean yarn spun by its victors. It is a long tale of things that went FUBAR—debacles, disasters, and catastrophes. That each disaster carries with it a

warning is what makes it useful to study. For instance, if the architect of a great ship tells you that 'not even God himself could sink this ship, ' you should take the next boat. If the stock market is selling at 20 times earnings and all the expert analysts urge you to 'get in' because you 'can't lose'-it's time to get out! Similarly, public policy disasters are what you get when well meaning people with this same Titanic degree of certitude apply rational, small-scale problem-solving logic to inappropriately large scale planning. First, you get a declining rate of return on your investment (of time or resources) until you hit zero. Then, if you keep going through the zero floor-and you always keep going-you get a disaster. The problem is, these disasters cannot be stopped by well-informed smart people with good intentions, because they are the people who cause them in the first place. From the mind of Bill Bonner comes Hormegeddon, a phenomenon that occurs when a small dose of something produces a favorable result, but if you increase the dosage, the results end in disaster. The same applies when the world gets too much of a good thing in public policy, economics, and business. Drawing on examples throughout modern political history, Bonner brings context and understanding to this largely ignored and anonymous phenomenon.

Shani D'Cruze and Louise A. Jackson provide students with a lively overview of women's relationship to the criminal justice system in England, exploring key debates in the regulation of 'respectable' and 'deviant' femininities over the last four centuries. Major issues include: • attitudes towards murder and infanticide \* prostitution • the decline of witchcraft belief \* sexual violence • the 'girl delinquent' \* theft and fraud The volume also examines women's participation in illegal forms of protest and political activism, their experience of penal regimes as well as strategies of resistance, and their involvement in occupations associated with criminal justice itself. Assuming that men and women cannot be studied in isolation, D'Cruze and Jackson make reference to recent studies of masculinity and comment on the ways in which relations between men and women have been understood and negotiated across time. Featuring examples drawn from a rich range of sources such as court records, autobiographies, literature and film, this is an ideal introduction to an increasingly popular area of study.

Sixteen-year-old Alaric discovers how to travel to an alternate reality, where his mother is alive and his place in the family is held by a girl named Naia.

B. B. King has the blues running through his blood. Growing up in the rural poverty of the Mississippi Delta, King first experienced the blues at nine years old, when his mother passed away. The man of the house before the end of his first decade, he used this strife as a source of inspiration and launched one of the most celebrated musical careers in American history. King has led a remarkable life, and this riveting autobiography dramatizes his whirlwind adventures from the Memphis of the forties to the Moscow of the nineties with unflinching candor and sincerity. But most of all, B.B.'s story is the story of the blues—the evolution from country acoustic to urban electric, the birth and explosion of rock 'n' roll—and B.B.'s own long, but ultimately triumphant, struggle for crossover success, during which he remained unwaveringly true to the music of his heart.
