Lights, Camera, Fastball is a fascinating look at the Hollywood Stars, a glamour-shrouded baseball team with a star-studded fan base during the Golden Age of Hollywood. Throughout their glorious twenty-year run in the Pacific Coast League, the Stars were an inventive team whose innovations are still seen in professional baseball today.

When Ford rolled out the Mustang in April 1964 it was an instant hit. Even with its immense popularity it didn't stop Ford Corporate, zone managers, and dealerships from taking it an extra step further. Just two short months later, the first special-edition Mustang debuted at the Indianapolis 500 tasked with pacing the race, and it's been full throttle ever since. This book examines more than 300 special-edition Mustangs from 1964 through today. Coverage includes factory offerings such as the 2001 Bullitt and SVT Cobras, regional promotions including the Twister Special, third-party tuners such as Roush and Saleen, and factory race cars including the 1968-1/2 Cobra Jets and the 2000 Cobra-R. You may find Mustangs in this book that you had no idea even existed! Never has a volume this detailed and with this many model Mustangs been offered published. The authors have taken their decades of research and logged them into a single compilation. Each Mustang is accompanied by production numbers, key features, and photos of surviving cars whenever possible. This book is sure to be a valued resource in your Mustang memorabilia collection! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

CAMRA's Good Beer Guide is fully revised and updated each year and features pubs across the United Kingdom that serve the best real ale. Now in its 45th edition, the guide is completely independent, with listings based entirely on evaluation and nomination by CAMRA members. The unique Breweries section contains a full listing of Britain's breweries - from national to micro - with information about their core beers.

p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the

Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

Focusing on the investigation phase of criminal procedure, *Criminal Procedure: Investigation* combines Laurie L. Levenson's first-hand experience in the criminal justice system with Erwin Chemerinsky's student-friendly writing style. The Third Edition examines the impact of a host of recent developments in the courts and legislature on the process investigating crime. It eschews reliance on rhetorical questions and law review excerpts in favor of comprehensive exploration of black letter law and trendsetting policy issues. The book utilizes a chronological approach that guides students through criminal procedure doctrine from rules governing law enforcement investigation to matters related to habeas corpus relief. In addition to presenting the perspectives from various stakeholders, the authors take care to provide students with useful, practice-oriented materials. *Criminal Procedure: Investigation* not only employs a systemic approach that takes students through issues from policy to application of legal doctrine but also introduces issues at the forefront of modern criminal procedure debates. Key Features: Straightforward writing style and clear, dynamic text that is uncluttered with law review excerpts and features thoughtfully edited principal and minor cases. Intuitive chronological presentation of topics. Systematic and cohesive exploration of policy on every issue, before moving on to the specifics of doctrine. Practice-oriented features and discussion of important, modern criminal procedure issues. Approachable organization based on common progression through criminal justice system. Straight writing style that relies on cases and author essays rather than law review excerpts and strict Socratic rhetoric questions. Practice-oriented features, discussion of modern policy issues, useful example documents for practitioners. Useful examples for future and current criminal law practitioners.

Inspired by soldiers returning from World War I, Bessie Coleman decided to become a pilot, but in 1916 American flight schools did not admit women. This book examines the challenging times and amazing accomplishments of Coleman on her journey to not only become the first woman of African American and Native American descent to earn an international aviation pilot's license, but also a successful civilian pilot and famous stunt flyer.

A straightforward guide to understanding English grammar This book is for people who have never thought about syntax, and who don't know anything about grammar, but who want to learn. Assuming a blank slate on the part of the reader, the book treats English grammar as a product of the speaker's mind, and builds up student skills by exploring phrases and sentences with more and more complexity, as the chapters proceed. This practical guide excites and empowers readers by guiding them step by step through each chapter with intermittent exercises. In order to capitalize on the reader's confidence as a personal authority on English, *Understanding Sentence Structure* assumes an inclusive definition of English, taking dialect variation and structures common amongst millions of English speakers to be a fact of natural language. Situates grammar as part of what the student already unconsciously knows Presupposes no prior instruction, not even in prescriptive grammar Begins analyzing sentences immediately, with the "big picture" (sentences have structure, structure can be ambiguous) and moves through levels of complexity, tapping into students' tacit knowledge of sentence structure Includes exercise boxes for in-chapter practicing of skills, side notes that offer further tips/encouragement on topics being discussed, and new terms defined immediately and helpfully in term boxes Applies decades of findings in syntactic theory and cognitive science, with an eye towards making English grammar accessible to school teachers and beginning students alike *Understanding Sentence Structure: An Introduction to English Syntax* is an ideal book for undergraduates studying modern English grammar and for instructors teaching introductory courses in English grammar, syntax, and sentence structure.

Smarter decision-making based on cognitive science *AlphaBrain* is the investor's guide to achieving more, doing better, and reaching higher. At its core, the magnitude of your success is based on the quality of your decisions. The problem is that human beings are poor decision-makers; we tend to approach problems after they arise instead of planning for them in advance. We put too much weight on instinct, belief, and "gut feeling." We make the same mistakes over and over again—so reliably, in fact, that cognitive science can accurately predict exactly which mistakes we'll make and when. This book offers a way to understand and plan for the human mind's usual tendencies to help you make smarter investment decisions. Using a framework based on cognitive research, you'll learn how to approach decisions objectively, systematically, and constantly review your process; you'll take action based on evidence instead of intuition, and get ahead of potential problems before they get the best of you. With so much riding on the correctness of your choices, natural tendency can be a dangerous thing. This book shows you how to remove the bias and emotion to start making choices backed by hard evidence and objective data and lower your stress. Shift your processes from reactive to proactive Base decisions on reality over belief Eliminate cognitive bias and reduce common mistakes Make better decisions with a systematic, objective approach Why do we begin managing risk only once it becomes apparent? Why do we react to the market instead of making the big decisions before emotion takes over? Investing has always been a largely reactive field, but those who dominate it approach decision-making less like a human and more like a machine. *AlphaBrain* shows you how to get real about investing, with cognitive techniques that lead to smarter, evidence-based decisions.

In *The Mardzong Manuscripts* Agnieszka Helman-Wa?ny and Charles Ramble recount the discovery of a cache of Bön and Buddhist manuscripts, some over seven centuries old, in the remote Mardzong caves in Mustang, Nepal, and subsequent research on the collection.
