The new edition of Exploring Psychology offers outstanding currency on the research, practice, and teaching of psychology. Myers and DeWall inspire students with fascinating findings and applications, effective new study tools and technologies, and a compassionate and compelling storytelling voice. Their presentation is based on the same guiding principles behind the entire family of textbooks that have made David Myers the world's bestselling introductory psychology author: Facilitate learning by teaching critical thinking and helping students at every step. Present psychology as a science, emphasizing the process of inquiry and putting facts in the service of concepts. Make sure students come away with an appreciation of psychology's big ideas, and with a deeper respect for humanity—what drives us, distinguishes us, unifies us. This Exploring Psychology is the first to include Myers' handpicked co-author. Nathan DeWall shares Myers' belief that instilling a sense of curiosity and inquiry about psychological science is an effective way to help students navigate the content, think critically, and prepare for a lifetime of learning and living. The extraordinary, longtime Myers ancillary author team is also here—a group whose teamwork, consistency, and commitment again sets the industry-standard for

instructor and student supplements. The high quality that consistently sets Myers' ancillaries apart sees a new incarnation in LaunchPad. This course space organizes all the book's digital resources in an online format that makes it easier for instructors to teach, track, and assess their students

Violent television programs are highly preferred by

children. They stimulate their emotions and increase curiosity about violence-related issues. This means that watching violent television programs has an impact upon their way of perceiving the world around them and acting in response to it. This study investigated the impacts of watching violent television programs on secondary school children in Tanzania. The specific objectives were: to examine children's accessibility to the TV, ascertain the types of violent TV programs and the time children spend watching them, determine the ways in which watching violent TV programs affects their academic performance, find out the impact of watching violent TV programs on their discipline, and examine the role of parents in addressing the impacts of watching violent TV programs upon their children. Results indicate that most secondary school children watch violent TV programs at home in the sitting rooms. They spend an average of three hours per day on weekdays, and seven-and-half hours on weekends, watching movies, music, drama, and informational programs that were identified as the most violent ones. Obviously, spending lots of time watching violent TV programs decreases children's academic performance and discipline. This book is important because it discusses the parents' role in discouraging and limiting children from watching violent TV programs, and choosing appropriate TV programs for them.

Featuring a look and style that's more like a magazine than a textbook, Plotnik's INTRODUCTION TO PSYCHOLOGY, Tenth Edition will draw you in and show you how exciting the study of psychology can be. This modular, visual approach to the fundamentals of

love, happiness, and marriage. Author David Samuel Green succeeds admirably and wastes no time in tracing the evolution of human relationships. But he also puts forward new theories regarding the state of relations between males and females across the globe, including married couples. What Green's new book further accomplishes lies in its no-holds-barred exploration of matters of the heart. Specifically, the author examines methods we can employ to eliminate problems that tend to hamper our relationships, and shows us how best to get the most out of our unions, with emphasis on how "product thinking" and "egalitarianism" assist remarkably. Besides offering solutions for troubled marriages and other relationships, the book also extols several concepts that go hand in hand with love and happiness. At the same time, it becomes clear that if we want our unions and partnerships to work, we have to bring the right attitude to the table. After all, as we learn, the ingredients for a successful relationship must include compassion, forgiveness, and understanding.

of redemptive violence is rampant. In this book, Dr Aung Htoo places Walter Wink's political theology in conversation with both Aung San Suu Kyi and the work of Martin Luther King Jr. Locating this dialogue against the political backdrop of Myanmar's history, Htoo explores the theological and political implications of nonviolence in the cultural context of the country's people groups. He draws on the shared Buddhist and Christian foundation of commitment to loving kindness to suggest a new political reality for Myanmar – one in which its citizens work together for the transformation of their shared homeland. Ultimately, Htoo challenges Christians to dethrone the spirit of domination and bear witness to the holistic gospel in every aspect of their lives. This is an excellent resource for anyone interested in theology, peace studies, or the intersection between faith and politics.

Mental health practitioners must be prepared to treat addiction-related issues—affecting up to 50% of mental health clients—whether or not clients present with addiction as a primary concern. This practical roadmap to the treatment of addictions advocates an underutilized—yet highly effective—method of intervention: eye movement desensitization and reprocessing (EMDR) therapy. It is the first book to integrate the Stages of Change Model with EMDR's phases for successful treatment outcome. The book addresses the scope of problems relating to addiction, including relevant statistics and descriptions of substance and process addictions, and considers the connection between addiction and trauma. While focusing on the use of EMDR therapy in treating addictions, the book also considers traditional models for each stage of treatment so interventions can be individualized according to the needs of each client. The authors describe in detail the Transtheoretical Model, tracing its development and theoretical foundations. They discuss each of its stages in depth, presenting and integrating EMDR interventions used by therapists in each stage. The interventions are useful for helping clients at any motivational level. Case vignettes in each chapter illustrate how EMDR techniques are used, and several detailed cases are provided at the end of the book. The appendix features additional resources and EMDR protocols.
