This is an exciting time for Artificial Intelligence, and for Natural Language Processing in particular. Over the last five years or so, a newly revived spirit has gained prominence that promises to revitalize the whole field: the spirit of empiricism. This book introduces a new approach to the important NLP issue of automatic ambiguity resolution, based on statistical models of text. This approach is compared with previous work and proved to yield higher accuracy for natural language analysis. An effective implementation strategy is also described, which is directly useful for natural language analysis. The book is noteworthy for demonstrating a new empirical approach to NLP; it is essential reading for researchers in natural language processing or computational linguistics.

In a long dead language isolate such as Hurrian, grammatical studies are replete with difficulties. The paucity of material and our inability to compare it to modern, well-documented languages typically results in more questions than answers. Many posited answers to these questions lead inevitably to dead ends. Studies in languages such as Hurrian run the risk of either stagnating due to an adherence to the status quo by scholars or fragmenting when no two scholars can (or will) agree on any point. In this book, Campbell has in many ways broken with tradition in an attempt to go beneath the surface and reveal further complexities in Hurrian grammar. This work, the first English-language monograph on Hurrian since 1941, is not a dogmatic treatise meant to counter the status quo but an exploration of the complexities of the Hurrian language from a new perspective. His conclusions may challenge present perceptions, but the hope is that they will in turn inspire challenges, for it is only in this way that our understanding of this wonderful language and the people who spoke it can be furthered. Mood and Modality in Hurrian provides a formal and functional analysis of the Hurrian modal morphemes. Unlike the better-known Semitic and Indo-European languages of the ancient Near East, Hurrian has a rich complement of modal endings. This at-times bewildering variety in form and function of modal morphemes in Hurrian has been a largely unstudied topic. Although it has been touched upon in a number of studies, it has not received a detailed treatment until now. Beyond a philological treatment of a dead language, Campbell also adds to the accumulated knowledge of ergativity. This book explores the interplay between ergativity and modality in Hurrian. Furthermore, Campbell explores the issue of voice in Hurrian and its relation to modality.

Most mental health professionals and behavioral scientists enter the field with a strong desire to help others, but clinical practice and research endeavors often involve decision-making in the context of ethical ambiguity. Good intentions are important, but unfortunately, they do not always protect the practitioner and client from breaches in ethical conduct. Academics, researchers, and students also face a range of ethical challenges from the classroom to the laboratory. Now in a new expanded edition, Ethics in Psychology and the Mental Health Professions, the most widely read and cited ethics textbook in psychology, has emerged with a broadened scope extending across the mental health and behavioral science fields. The revised volume considers many of the ethical questions and dilemmas that mental health professionals encounter in their everyday practice, research, and teaching. The book has been completely updated and is now also relevant for counselors, marriage and family therapists, social workers, and psychiatrists, and includes the ethics codes of those groups as appendices. Providing both a critical assessment and elucidation of key topics in the APA's guidelines, this comprehensive volume takes a practical approach to ethics and offers constructive means for both preventing problems, recognizing, approaching, and resolving ethical predicaments. Written in a highly readable and accessible style, this new edition retains the key features which have contributed to its popularity, including hundreds of case studies that provide illustrative guidance on a wide variety of topics, including fee setting, advertising for clients, research ethics, sexual attraction, how to confront observed unethical conduct in others, and confidentiality, among others. Ethics in Psychology and the Mental Health Professions will be important reading for practitioners and students-in training. Research-intensive universities have long struggled to reconcile the imperative of specialized learning with the need for a broader, more liberal education. Combining Two Cultures provides a comprehensive account of a degree program at a distinguished Canadian university, McMaster, aimed at accomplishing this synthesis. This innovative program has stood up well over more than two decades. It has a curriculum balanced between arts and sciences and is committed to developing broadly applicable intellectual skills, above all those that underlie scholarly inquiry into questions of importance to students and to the society they live in. It attempts to harmonize the excitement of exploring a broad range of fields with students' needs to meet the requirements for advanced study in professional and academic graduate disciplines. This book offers insights into the challenges of planning and establishing a program of this kind. Brief personal reflections from many of the program's graduates, firsthand observations from current students, and instructors' accounts of their experiences give a vivid sense of what the program has meant to its participants.

This book addresses the influence of the imperial cult in first-century AD Asia Minor and its subsequent relevance to the reading of the New Testament. In particular, this work argues, through a contrapuntal reading of 1 Timothy 2:1-7, that the early Christian community strongly resisted the Emperor's claim to be the «mediator» between the gods and humanity. In contrast to this claim, the author shows that 1 Timothy 2:1-7 can be read as a polemic from a minority community, the Christian church in Ephesus, against the powerful voice of the Roman Empire in regard to divine mediation.

"Negative capability", the term John Keats used only once in a letter to his brothers, is a well-known but surprisingly unexplored concept in literary criticism and aesthetics. This book is the first book-length study of this central concept in

seventy years. As well as clarifying the meaning of the term and giving an anatomy of its key components, the book gives a full account of the history of this idea. It traces the narrative of how the phrase first became known and gradually gained currency, and explores its primary sources in earlier writers, principally Shakespeare and William Hazlitt, and its chief Modernist successors, W. B. Yeats and T. S. Eliot. Meanwhile, the term is also applied to Keats's own poetry, which manifests the evolution of the idea in Keats's poetic practice. Many of the comparative readings of the relevant texts, including King Lear, illuminate the interconnections between these major writers. The book is an original and significant piece of scholarship on this celebrated concept.

This book is about writing in the professional mathematical environment. While the book is nominally about writing, it's also about how to function in the mathematical profession. In many ways, this text complements Krantz's previous bestseller, ""How to Teach Mathematics"". Those who are familiar with Krantz's writing will recognize his lively, inimitable style. In this volume, he addresses these nuts-and-bolts issues: syntax, grammar, structure, and style; mathematical exposition; use of the computer and TeX E-mail; and, etiquette. All aspects of publishing a journal article Krantz's frank and straightforward approach makes this book particularly suitable as a textbook. He does not avoid difficult topics. His intent is to demonstrate to the reader how to successfully operate within the profession.He outlines how to write grant proposals that are persuasive and compelling, how to write a letter of recommendation describing the research abilities of a candidate for promotion or tenure, and what a dean is looking for in a letter of recommendation. He further addresses some basic issues such as writing a book proposal to a publisher or applying for a job. The fifteen papers selected for Volume II of English Historical Linguistics 2008 have a different emphasis than those in Volume I (CILT 314, Lenker et al. 2010). Nine concentrate on the development of the English vocabulary and six on historical text linguistics, including the development of text-types and of politeness strategies. Of those in the former group, three have their emphasis on etymology, three on semantic fields, and three on word-formation, although some cover more than one of these areas. The topics include: the treatment of etymological problems in the OED; deverbal derivations formed from native verbs and from loan-verbs; the role of metaphor and metonymy in the evolution of word-fields. The field of historical text linguistics is introduced by a general survey, which is followed by more specific studies focussing on 15th-century legal and administrative texts from Scotland, on early 15th-century women's mystical writings, on medical recipes from the 16th to the 18th centuries and on pauper letters from 18th-century Essex. The book should appeal to scholars interested in English etymology, the history of semantic fields and of word-formation, as well as in historical text linguistics, politeness strategies and standardization. It provides not only theoretical considerations but also a wealth of case studies.

This book constitutes the refereed proceedings of the joint conference on Machine Learning and Knowledge Discovery in Databases: ECML PKDD 2008, held in Antwerp, Belgium, in September 2008. The 100 papers presented in two volumes, together with 5 invited talks, were carefully reviewed and selected from 521 submissions. In addition to the regular papers the volume contains 14 abstracts of papers appearing in full version in the Machine Learning Journal and the Knowledge Discovery and Databases Journal of Springer. The conference intends to provide an international forum for the discussion of the latest high quality research results in all areas related to machine learning and knowledge discovery in databases. The topics addressed are application of machine learning and data mining methods to real-world problems, particularly exploratory research that describes novel learning and mining tasks and applications requiring non-standard techniques.

This volume explores a pivotal period in European history, the 'long' nineteenth century. Politeness scholars have suggested that the nineteenth century heralds a significant transition in the meanings and realisations of politeness, between the Ancien Régime and the contemporary period, with the rise of the middle classes as economic, political, social and cultural actors. The central innovation of this volume consists in its use of a wide range of politeness metasources — grammar books, schoolbooks, conduct books, etiquette books, and letter-writing manuals — to access social norms. This interdisciplinary approach, which draws on historical linguistics, argumentation theory, appraisal theory and literary stylistics, is applied to a wide range of languages: English, including Scottish and business English, Italian, Spanish, West and South Slavic languages. As a highly coherent collection of innovative research papers, the volume will be welcomed by researchers of (im)politeness, pragmatics and sociolinguistics, both from a historical and contemporary perspective.

Letters and Homilies for Hellenized Christians is the first of three volumes extending Ben Witherington's innovative socio-rhetorical analysis of New Testament books to the latter-Pauline and non-Pauline corpora. A second volume will continue the focus on letters and homilies for Hellenized Christians (1-2 Peter), while a third will focus on letters and homilies for Jewish Christians (Hebrews, James and Jude). By dividing the volumes according to the socio-religious contexts for which they were written, Witherington sheds fresh light on the documents, their provenance, character and importance. Throughout, Witherington shows his thorough knowledge of recent literature on these texts and focuses his attention on the unique insights brought about through socio-rhetorical analysis that either reinforces or corrects those gleaned from other approaches. Strikingly, based on his rhetorical analysis of the Pastorals, he makes the case for Luke as Paul's amanuensis for these letters. He also makes a strenuous argument against New Testament pseudepigrapha. "Bridging the Horizons" sections point to the relevance of the text for believers today, making this volume of special value to pastors and general readers as well as students and scholars.
