

start tracing the numbers and letters, guiding your little one's pencil from the very start. Part 1 includes number tracing 26-50 and part 2 moves on to word tracing for each number. Within the pages of "Let's Count To 100 Volume 2", you'll find: Instructions that are simple to follow - "Let's Count To 100 Volume 2" makes tracing simple by guiding your child through each letter and number, each pencil movement associated with a step. Watch as they learn proper spacing and penmanship, becoming familiar with 26-50 and growing in their confidence to be able to count in sequence. Once your child is done, they'll be ready to take on even bigger numbers. Pages designed for all speeds of progression - Counting up to 25 may be a breeze for your child already, and maybe they can write many of those numbers without any help. Most children have trouble with the bigger double digits beyond this point at this age. At 5, some children are even still learning up to four. It's completely normal -- all children learn at a different pace. Providing them with tools such as "Let's Count To 100 Volume 2" will ensure they catch up just fine. Number-tracing exercises and practice - Teachers have been using tracing as a method to introduce young children to new letters and numbers for a long time. Within "Let's Count To 100 Volume 2", your child will be introduced to each and every number's lines and curves, beginning with 26 and following through up to 50. Many of these numbers they will be familiar with, and some they may not be. After plenty of practice going through forming each number, your child will be ready to write on their own. Word-tracing exercises and practice - Once your child has progressed through the numbers 26-50, it's time to move on to the word variations. Being able to write out "thirty-seven" is an important skill that your child will need to develop. It also helps further instill the knowledge of each number, and soon your little one will understand the sequencing of numbers. A FREE digital edition - When you purchase a copy of "Let's Count To 100 Volume 2", you'll also gain a code for the digital version of the book. With the ability to print as many copies of all the pages, your child will be able to practice as much as they need. Give them some extra work with tricky numbers, write out "forty-four" a few more times, or save extra sheets for later. Join our VIP Writing Club! write numbers is a critical skill, and as a parent, there are many options you have for giving your little one all the practice they need. Penmanship goes hand in hand with literacy, fine motor skills, and handwriting -- all of which are being developed as your child engages in writing and drawing activities. "Let's Count To 100 Volume 4" continues your child's progression through the numbers 1-100, focusing on 76-100 as your child learns to trace each number. As your child masters these higher double digits, they'll finally be ready to take on more advanced mathematical concepts. Within the pages of "Let's Count To 100 Volume 4", you'll find: Easy to follow instructions - "Let's Count To 100 Volume 4" shows your child the way through numbers by making tracing easy and fun. A numbered step guides each pencil stroke, and your child will enjoy memorizing each number and letter. They'll develop proper penmanship and spacing for 76-100, and after they're done, they'll be prepared to count 1-100 in sequence. Pages suited for all levels of progress - By the age of 5, some children are already able to count into the double digits and write many of those numbers as well. Other children are still working their way through the teens, while others are still working up to the number 4. Wherever your child fits, it's all completely normal -- all children develop at their own pace. With "Let's Count To 100 Volume 4", you're helping your child to learn what they will need to know for school and gain confidence to learn even more. Word-tracing exercises and practice - Once your child has completed tracing numbers 76-100, the next step is moving to trace the words to go with every number. All children must learn how to write "eighty-nine" to go with the number 89, and being able to do so further ingrains the knowledge of where that number fits in the counting sequence. Your child will be one step closer to being able to count and write numbers 1-100! A FREE digital edition - When you purchase a copy of "Let's Count To 100 Volume 4", you also gain access to a digital copy of the book. This allows you to print as many copies of the pages as you like, giving your child extra practice with the numbers and words. Save extra sheets for more practice later, work on the trickier numbers, and more. Join our VIP Writing Club! Get discounts on new releases, access to prize giveaways, unique writing pages, and more. Keep up with all of our new writing books! Help your little one master the numbers 1-100 with Kids Learning Pages' "Let's Count To 100 Volume 4." Click the Add to Cart button at the top of this page to buy now! My very first Italian book of numbers One tiger... Una tigre... Grab your kids this fantastic Italian numbers book !
