

## P3 Business Analysis Kaplan Study Text

Bachelor Thesis from the year 2011 in the subject Business economics - Accounting and Taxes, grade: 50%, Oxford Brookes University, language: English, abstract: The aim of this research is to analyze the business and financial performance of Ryanair by focusing on financial and non-financial performance such as financial management, business strategy, future prospects and ways of achieving its objectives in its competitive environment from a stakeholder point of view. In 1985, Ryanair was set up by the Ryan family with a share capital of just £1, and a staff of 25. The company launched its first route in July with daily flights from Waterford in the southeast of Ireland to London Gatwick. Since then, the company has grown considerably and became one of Europe's largest low-fare airlines.

The P3 Study Text covers the official syllabus thoroughly and comprehensively, and perhaps most importantly in a way that that has been approved by the Examiner. Material is presented in a user-friendly format. The syllabus emphasises the integrated nature of the subject and the Study Text highlights links between the various topics - essential for the exam.

Praise for *How Learning Works* "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to improve their students' learning."  
—Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, *Tools for Teaching* "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching."  
—Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my colleagues."  
—Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you

in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, e-Learning and the Science of Instruction; and author, Multimedia Learning

The twenty-first century has seen a breathtaking expansion of statistical methodology, both in scope and in influence. 'Big data', 'data science', and 'machine learning' have become familiar terms in the news, as statistical methods are brought to bear upon the enormous data sets of modern science and commerce. How did we get here? And where are we going? This book takes us on an exhilarating journey through the revolution in data analysis following the introduction of electronic computation in the 1950s. Beginning with classical inferential theories - Bayesian, frequentist, Fisherian - individual chapters take up a series of influential topics: survival analysis, logistic regression, empirical Bayes, the jackknife and bootstrap, random forests, neural networks, Markov chain Monte Carlo, inference after model selection, and dozens more. The distinctly modern approach integrates methodology and algorithms with statistical inference. The book ends with speculation on the future direction of statistics

and data science.

Strategic Management: Text and Cases, 2nd Edition, by Dess/Lumpkin/Eisner is both readable and rigorous - written for today's student. A rocket-ship in its first edition, the revision continues to provide solid treatment of traditional topics in strategic management, as well as contemporary topics like entrepreneurship, knowledge management, and internet strategies. The prestigious author team understands the importance of thorough, modern concepts illustrated by rich, relevant and teachable cases. The new case selections emphasize variety, currency, and familiar company names. The cases are up-to-date in terms of both financial data and strategic issues. This group of cases gives both instructors and students unparalleled quality and variety. Based on consistent reviewer feedback, these selections combine comprehensive and shorter length cases about well known companies.

We have had a number of interesting cases come to our attention over the years. The following are illustrative of some of the issues that can emerge at the interface between neuropsychology and the law. The first involved a patient suffering from a debilitating fear of heights. The fear seemed a reasonable consequence of the fact that he had been a passenger on a plane that crashed while attempting take off. Given that many of the passengers and crew died or were seriously injured, this man was quite fortunate. In fact, he could be said to have lived a charmed life. It had been just a year since he had been involved in an industrial accident in which he could have easily died. He came away from that accident with injuries to his legs and a concussion. That accident had also involved him falling from a considerable height so that there was some discussion among clinic staff about how well the patient's circumstances and symptoms fit the diagnostic category of "posttraumatic stress disorder." Supportive psychotherapy was used as an aid in dealing with his recurring memories of the plane crash and systematic desensitization was quite successful in reducing the most disruptive consequences of his fear of heights. However, during the course of treatment, it became apparent that there were a number of problems that had not been addressed. The examining team reviewed P3 Study Text covers all the relevant ACCA P3 syllabus topics. It explores the theories behind the key areas of Business Analysis and demonstrates how these theories are put in to practice. Detailed examples throughout the text will help build your understanding and reinforce learning.
