The most comprehensive introduction to project management, updated to reflect changes in the business environment over the past few years Full of downloadable forms and spreadsheets to help you implement the techniques in the book Offers updated advice on getting the most from Microsoft Project

Modern projects are all about one group of people delivering benefits to others, so it's no surprise that the human element is fundamental to project management. The Gower Handbook of People in Project Management is a complete guide to the human dimensions involved in projects. The book is a unique and rich compilation of over 60 chapters about project management roles and the people who sponsor, manage, deliver, work in or are otherwise important to project success. It looks at the people-issues that are specific to different sectors of organization (public, private and third sector); the organization of people in projects, both real and virtual; the relationship between people, their roles and the project environment; and the human behaviours and skills associated with working collaboratively. Thus this comprehensive and innovative handbook discusses all the important topics associated with employing, developing and managing people for successful projects. The contributors have been drawn from around the world and include experts ranging from practising managers to academics and advanced researchers. The Handbook is divided into six parts, which begin with management and project organization and progress through to more advanced and emerging practices. It benefits hugely from Lindsay Scott's expert knowledge and experience in this field and from Dennis Lock's contributions and meticulous editing to ensure that the text and illustrations are always lucid and informative.

This book attempts to synthesize research that contributes to a better understanding of how to reach sustainable business value through information systems (IS) outsourcing. Important topics in this realm are how IS outsourcing can contribute to innovation, how it can be dynamically governed, how to cope with its increasing complexity through multivendor arrangements, how service quality standards can be met, how corporate social responsibility can be upheld and how to cope with increasing demands of internationalization and new sourcing models, such as crowdsourcing and platform-based cooperation. These issues are viewed from either the client or vendor perspective, or both. The book should be of interest to all academics and students in the fields of Information Systems, Management and Organization as well as corporate executives and professionals who seek a more profound analysis and understanding of the underlying factors and mechanisms of outsourcing.

Viele Unternehmen stehen vor einer Fülle drängender Herausforderungen: immer schneller wandeln sich Märkte und Technologien, die Digitalisierung schreitet voran. Zudem erleben wir verschärften internationalen Wettbewerb und veränderte Anforderungen an betriebliche Organisationsformen sowie eine weitreichende Vernetzung der täglichen Arbeit. Immer häufiger werden Projekte standortübergreifend aufgesetzt, Partner werden in das Geschehen involviert. Verteilte Teams mit heterogenen und spezialisierten Mitgliedern arbeiten in multikulturellen Umgebungen zusammen. Zentrale Fragen sind daher: Wie muss ein modernes Projektmanagement in einer globalen Umgebung gestaltet sein? Wie kann in der neuen Unübersichtlichkeit der Organisationswelten zielorientiert navigiert werden? Was bedeutet das Arbeiten in verteilten und virtuellen Teams für Führungskräfte und Teammitglieder? Wie kann das Arbeiten in und das Führen von multikulturellen Teams gelingen? Welche Herausforderungen erwarten Mitarbeiter auf dem Weg in die neue Welt des Arbeitens? Antworten auf diese Fragen bietet dieses Buch. Es zeigt: Projektmanagement in einer globalisierten Welt ist machbar. Wie es geht, das zeigen fundierte Beiträge, spannende Szenarien und vielversprechende Lösungsansätze.

This is an indispensable career guide for everyone wanting to work in or already working in the international development and humanitarian emergencies sector. It provides a general introduction and insight into the sector, for those exploring it as a potential career, and offers students up-to-date advice when choosing a course, whether it's at undergraduate or postgraduate level. Should they study International Development, or will Public Health, Environmental studies or Media get them closer to where they want to get? This book offers graduates or career changers who are new to the sector an understanding of what skills and experience will make them stand out above the competition and get that job. It enables those already working in the sector to gain a long term view of where they want to go and how they might structure their professional development to gain the skills and competencies necessary to get their career on to an upward trajectory. This book draws heavily on insiders' advice, case studies and top tips, to provide the reader with various perspectives and insights. How do you become a country director for an international NGO? How can one become a gender mainstreaming expert? What can you do to get in to consultancy? Career trajectories, Career clinics Q&A boxes and the personal planner in the appendix will help you get to where you want to go. It also gives a detailed account of the myriad of careers and specialism available within the sector and methodologically describes the pros and cons of each option. So if you are not sure where you want to go with your career, you will be after you have read this book. Whether it's Programme Management, becoming an Environmental Advisor, or an Acadmic this book will give you an insight into what the job entails and how you can get in to it. It will be an invaluable guide to all readers, irrespective of their country of origin, who are interested in the sector.

This book gathers the best papers presented at the International Congress on Project Management and Engineering, in its 2017 and 2018 editions, which were held in Cádiz and Madrid, Spain. It covers a range of topic areas, including civil engineering and urban planning, product and process engineering, environmental engineering, energy efficiency and renewable energies, rural development, information and communication technologies, and risk management and safety.
