For thirty years, Roy Underhill's PBS program, *The Woodwright's Shop*, has brought classic hand-tool craftsmanship to viewers across America. Now, in his seventh book, Roy shows how to engage the mysteries of the splitting wedge and the cutting edge to shape wood from forest to furniture. Beginning with the standing tree, each chapter of *The Woodwright's Guide* explores one of nine trades of woodcraft: faller, countryman and cleaver, hewer, log-builder, sawyer, carpenter, joiner, turner, and cabinetmaker. Each trade brings new tools and techniques; each trade uses a different character of material; but all are united by the grain in the wood and the enduring mastery of muscle and steel. Hundreds of detailed drawings by Eleanor Underhill (Roy's daughter) illustrate the hand tools and processes for shaping and joining wood. A special concluding section contains detailed plans for making your own foot-powered lathes, workbenches, shaving horses, and taps and dies for wooden screws. *The Woodwright's Guide* is informed by a lifetime of experience and study. A former master craftsman at Colonial Williamsburg, Roy has inspired millions to "just say no to power tools" through his continuing work as a historian, craftsman, activist, and teacher. In *The Woodwright's Guide*, he takes readers on a personal journey through a legacy of off-the-grid, self-reliant craftsmanship. It's a toolbox filled with insight and technique as well as wisdom and confidence for the artisan in all of us.

Designing Software Architectures will teach you how to design any software architecture in a systematic, predictable, repeatable, and cost-effective way. This book introduces a practical methodology for architecture design that any professional software engineer can use, provides structured methods supported by reusable chunks of design knowledge, and includes rich case studies that demonstrate how to use the methods. Using realistic examples, you'll master the powerful new version of the proven Attribute-Driven Design (ADD) 3.0 method and will learn how to use it to address key drivers, including quality attributes, such as modifiability, usability, and availability, along with functional requirements and architectural concerns. Drawing on their extensive experience, Humberto Cervantes and Rick Kazman guide you through crafting practical designs that support the full software life cycle, from requirements to maintenance and evolution. You'll learn how to successfully integrate design in your organizational context, and how to design systems that will be built with agile methods. Comprehensive coverage includes Understanding what architecture design involves, and where it fits in the full software development life cycle Mastering core design concepts, principles, and processes Understanding how to perform the steps of the ADD method Scaling design and analysis up or down, including design for pre-sale processes or lightweight architecture reviews Recognizing and optimizing critical relationships between analysis and design Utilizing proven, reusable design primitives and adapting them to specific problems and contexts Solving design problems in new domains, such as cloud, mobile, or big data

A new play from an award-winning playwright, published as part of the innovative Abbey Theatre playscript series *On the day of her father's funeral, Eva - a young woman - is still haunted by the betrayal she witnessed from her childhood haven - the treehouse in the garden. On the same day another woman, Magda, relives the ghosts of another hiding place and a different betrayal - ghosts from which she still seeks forgiveness. Interweaving lives and secrets Treehouses is a magical tale of refuge, treachery and of love lost and found.*

A Shakespearean insult generator that creates tart-tongued and totally humorous bawdy combinations and clever comebacks. Some occasions call for foul language, but why resort to the common F-word? If you must be offensive, hearken back to the Elizabethan days for more salacious and outrageous word choices. Impress your friends with your mastery of lewd iambic pentameter and vanquish your enemies with the power of the bard. After all, a toad-spotted maggot by any other name would be as pestilent . . . Grading From the Inside Out by Tom Schimmer establishes that the time for grading reform is now. Traditional grading procedures are no longer applicable due to vast changes in pedagogy and assessment. While K12 teachers and administrators may feel hesitant about moving away from past practices or making profound changes in grading, and while it may be challenging, a change in mindset is essential for effective instruction and assessment. A standards-based mindset is needed to reshape the traditional grading paradigm. To help readers develop standards-based mindsets about grading, Schimmer proposes a grading paradigm based on a new approach to reporting student achievement. He then presents educators with steps they can actively take to positively alter grading and reporting in their classrooms.

It always comes down to this: At any moment, a zombie could leap out of the shadows and end your life. At last, it seems like there is a cause that unites mankind to end all our petty squabbles. But no. It's never that simple.

This volume has been developed as a step-by-step guide for professionals involved in designing, implementing, monitoring and evaluating developmental interventions. It introduces and elucidates the key concepts and procedures involved, starting from the fundamentals of project design and management, the basics of monitoring and evaluation, and the development of a performance monitoring plan to different approaches to monitoring, choosing appropriate evaluation designs, approaches to evaluation, the analysis of monitoring and evaluation, and finally implementing this information in a project environment. In order to provide further context, the manual uses real project examples which help in buttressing the understanding of the readers and enable adoption of these practices in such projects.

Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever,

but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .

In *Mordin On Time*, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). *Mordin On Time* enables the reader to construct their own speed ratings wherever they live.

This poignant study presents a collection of research on entrepreneurship and community engagement. The context of this book is Syracuse University's award winning model of Scholarship in Action with its emphasis on sustainable campus-community entrepreneurial partnerships and its resultant 'Syracuse Miracle's the transformation that has occurred in the Central New York community thanks to the university's partnership with the community to drive social, environmental, and economic development. Broken into three engaging sections, this book introduces appraisals of technology entrepreneurship and community engagement; community engagement and entrepreneurship; and entrepreneurship, engagement, and new models of education. The first section includes chapters that focus on successful corporate university partnerships, programs to champion student technology companies, and new models for supporting technology transfer. Section two concentrates on topics including transforming a community law clinic to aid community entrepreneurs, supporting successful entrepreneurs in distressed communities, and engineering a community newspaper in partnership with local residents. The final section includes analyses of services for entrepreneurs with disabilities and an innovative program that connects university students to provide assistance, factors that contribute to innovation and entrepreneurship among adults, and a new entrepreneurial program that provides

teacher education.

There's something in the earth deep below Elise Kavanagh's territory. A shadow is falling upon local demons to devour their flesh and harvest their souls. And it's coming for Elise next. The Union has an easy way out. They want to send Elise into hiding again with her former partner, James Faulkner. All she has to do is surrender the territory and trust that they can protect the ethereal ruins, the dark gate, and the city she's come to know as home. Greater powers have other plans for Elise and her fabled power as Godslayer--plans that mean surrendering her life and blood to the most powerful demon alive. But if she descends, there's no turning back. Once she gazes into the abyss, it will gaze back into her...and Elise will be damned forever.

The concept of democratic freedom refers to more than the kind of freedom embodied by political institutions and procedures. Democratic freedom can only be properly

understood if it is grasped as the expression of a culture of freedom that encompasses an entire form of life.

Juliane Rebenitsch's systematic and historical approach demonstrates that we can learn a great deal about the democratic culture of freedom from its philosophical critics. From Plato to Carl Schmitt, the critique of democratic culture has always been articulated as a critique of its "aestheticization". Rebenitsch defends various phenomena of aestheticization – from the irony typical of democratic citizens to the theatricality of the political – as constitutive elements of democratic culture and the notion of freedom at the heart of its ethical and political self-conception. This work will be of particular interest to students of Political Theory, Philosophy and Aesthetics.

Financial Risk Management and Derivative Instruments offers an introduction to the riskiness of stock markets and the application of derivative instruments in managing exposure to such risk. Structured in two parts, the first part offers an introduction to stock market and bond market risk as encountered by investors seeking investment growth. The second part of the text introduces the financial derivative instruments that provide for either a reduced exposure (hedging) or an increased exposure (speculation) to market risk. The fundamental aspects of the futures and options derivative markets and the tools of the Black-Scholes model are examined. The text sets the topics in their global context, referencing financial shocks such as Brexit and the Covid-19 pandemic. An accessible writing style is supported by pedagogical features such as key

insights boxes, progressive illustrative examples and end-of-chapter tutorials. The book is supplemented by PowerPoint slides designed to assist presentation of the text material as well as providing a coherent summary of the lectures. This textbook provides an ideal text for introductory courses to derivative instruments and financial risk management for either undergraduate, masters or MBA students.

Raised with limited peer interaction, Ernestine St Bennett has difficulty interpreting social cues. At twenty-five she's become a loner; a shy nerd immersed in her scientific studies, whose best friend is her pet fish, Waldo. Then Ernestine meets Simon Prime, who's obviously a nerd, too! Sympathizing with his social dysfunction, Ernie decides to help poor Simon increase his self-esteem and thus enhance his social standing. Using principles learned in her fish studies, she'll simply turn Simon from meek to macho. What Ernestine doesn't know (but Waldo suspects) is that Simon Prime is really ex-cop, private investigator Sam Pierce in disguise. A man who definitely doesn't need his masculinity enhanced!

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology

draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, *The Lonely City* is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

An instant bestseller when first published in 1929—biographies of twelve bold individuals from history and what they did to separate themselves from the pack. In his trademark journalist style, author William Bolitho details the lives of twelve great adventurers—Alexander the Great, Casanova, Christopher Columbus, Mahomet, Lola Montez, Cagliostro (and Seraphina), Charles XII of Sweden, Napoleon I, Lucius Sergius Catiline, Napoleon III, Isadora Duncan, and Woodrow Wilson. Bolitho elucidates both the struggles and successes that made these figures so iconic, and demonstrates how they all battled convention and conformity to achieve enduring fame and notoriety. "We are born adventurers," Bolitho writes, "and the love of adventures never leaves us till we are very old; old, timid men, in whose interest it is that adventure should quite die out. This is why all the
