Aside from the Constitution itself, there is no more important document in American politics and law than The Federalist-the series of essays written by Alexander Hamilton and James Madison to explain the proposed Constitution to the American people and persuade them to ratify it. Today, amid angry debate over what the Constitution means and what the framers' "original intent" was, The Federalist is more important than ever, offering the best insight into how the framers thought about the most troubling issues of American government and how the various clauses of the Constitution were meant to be understood. Michael Meyerson's Liberty's Blueprint provides a fascinating window into the fleeting, and ultimately doomed, friendship between Hamilton and Madison, as well as a much-needed introduction to understanding how the lessons of The Federalist are relevant for resolving contemporary constitutional issues from medical marijuana to the war on terrorism. This book shows that, when properly read, The Federalist is not a "conservative" manifesto but a document that rightfully belongs to all Americans across the political spectrum.

His moving account is a work of dedication."—New York Times Book Review "With commendable restraint, Stein uses newspapers, official documents, and the evidence of survivors to unfold a story made more harrowing by the unemotional simplicity of its narration."—Library Journal "Stein... suggests that the fire alerted the public to shocking working conditions all over the city and helped the unions

organize the clothing industry, but his good taste keeps him from selling the reader any silver lining. A by-product of the careful research that has gone into this excellent narrative is an interesting sketch of the hard lives and times of working girls in the days when the business of America was business."—New Yorker March 25, 2011, marks the centennial of the Triangle Shirtwaist Factory fire, in which 146 garment workers lost their lives. A work of history relevant for all those who continue the fight for workers' rights and safety, this edition of Leon Stein's classic account of the fire features a substantial new foreword by the labor journalist Michael Hirsch, as well as a new appendix listing all of the victims' names, for the first time, along with addresses at the time of their death and locations of their final resting places.

Original, fresh and relevant this is a theoretically-informed practical guide to researching social relations. The text provides a mixed methods approach that challenges historical divisions between quantitative and qualitative research. It adopts a multidisciplinary approach to social science research, drawing from areas such as sociology, social psychology and social anthropology. Films about cities abound. They provide fantasies for those who recognize their city and

those for whom the city is a faraway dream or nightmare. How does cinema rework city planners' hopes and city dwellers' fears of modern urbanism? Can an analysis of city films answer some of the questions posed in urban studies? What kinds of vision for the future and images of the past do city films offer? What are the changes that city films have undergone? Cities and Cinema puts urban theory and cinema studies in dialogue. The book's first section analyzes three important genres of city films that follow in historical sequence, each associated with a particular city, moving from the city film of the Weimar Republic to the film noir associated with Los Angeles and the image of Paris in the cinema of the French New Wave. The second section discusses socio-historical themes of urban studies, beginning with the relationship of film industries and individual cities, continuing with the portrayal of war torn and divided cities, and ending with the cinematic expression of utopia and dystopia in urban science fiction. The last section negotiates the question of identity and place in a global world, moving from the portrayal of ghettos and barrios to the city as a setting for gay and lesbian desire, to end with the representation of the global city in transnational cinematic practices. The book suggests that modernity links urbanism and cinema. It accounts for the significant changes that city film has undergone through processes of globalization, during which the city has developed from an icon in national cinema to a privileged site for transnational cinematic practices. It is a key text for students and researchers of film studies, urban studies and cultural studies.
