The Prince of Brancoleone has a reputation for breaking hearts. And now he's set his sights on a new conquest. She's Nisida, the beautiful daughter of a Naples fisherman. The prince disguises himself as a commoner and seduces her. But Nisida's little brother Gabriel intervenes, setting off a bloody tale of revenge, suicide and family secrets. Part of Dumas' "Celebrated Crimes" series, "Nisida" is an enthralling look at honour and justice in 19th century Italy. Based on real events, it was co-written with Italian author Pier Angelo Fiorentino. Before "The Three Musketeers", Alexandre Dumas explored some of history's darkest chapters in "Celebrated Crimes". These true crime stories cover famous murders, conspiracies and executions, from Mary Queen of Scots to the Borgias. Alexandre Dumas (1802 - 1870) was a hugely popular 19th century French writer. Born of mixed French and Haitian heritage, Dumas first rose to prominence in Paris as a playwright, but later gained international fame with his historical fiction. Often co-authored with other writers, these stories wove together swashbuckling adventure, romance, and real events from France's past. Among the best known are "The Three Musketeers", and its sequels "Twenty Years After", and "Le Vicomte de Bragelonne: Ten Years Later". Set across four decades, this trilogy follows the rise of the dashing D'Artagnan—from hot-headed soldier to trusted captain under Louis XIV. Dumas' other novels include "The Count of Monte Cristo" and "The Black Tulip". His works have been adapted into more than 200 movies, including The Man in the Iron Mask starring Leonardo DiCaprio.

Why can't we look away? Whether we admit it or not, we're fascinated by evil. Dark fantasies, morbid curiosities, Schadenfreude: As conventional wisdom has it, these are the symptoms of our wicked side, and we succumb to them at our own peril. But we're still compelled to look whenever we pass a grisly accident on the highway, and there's no slaking our thirst for gory entertainments like horror movies and police procedurals. What makes these spectacles so irresistible? In Everyone Loves a Good Train Wreck, the scholar Eric G. Wilson sets out to discover the source of our attraction to the caustic, drawing on the findings of biologists, sociologists, psychologists, anthropologists, philosophers, theologians, and artists. A professor of English literature and a lifelong student of the macabre, Wilson believes there's something nourishing in darkness. "To repress death is to lose the feeling of life," he writes. "A closeness to death discloses our most fertile energies." His examples are legion, and startling in their diversity. Citing everything from elephant graveyards and Susan Sontag's On Photography to the Tiger Woods sex scandal and Steel Magnolias, Wilson finds heartening truths wherever he confronts death. In Everyone Loves a Good Train Wreck, the perverse is never far from the sublime. The result is a powerful and delightfully provocative defense of what it means to be human—for better and for worse.

Lucid Death is the first work by Paloma Cabadas and is an international reference for people who seek their own transcendence. As the author reveals, Lucid Death is the natural consequence of having lived with lucidity, the discovery of the meaning of life and death as well as the loss of all one's fears and transforming beliefs into direct knowledge. In her book, Lucid Death, based on the experience of over twenty years of research, Paloma Cabadas explores fascinating topics such as: The interpretation and discovery of our dreams, premonitions and awareness experiences. To lose our fear of the unknown, fear of changes and the fear of losing our identity. To successfully achieve and evolutionarily benefit from out-of-body experiences and subtle consciousness experiences. To use knowledge of oneself as a self-healing method. To explore the knowledge of what life after death is like.

Let your imagination run wild in the gritty hub of a modern metropolis or find yourself amongst the wonders of nature or in a land of myth. Anything is possible. The power is in your hands! Completing J. North Conway's widely acclaimed trilogy of Gilded Age New York City Crime—following King of Heists and The Big Policeman—Bag of Bones combines the era's affluence, decadence, and corruption with a gruesome deed fit for the tabloids of today. In 1878, the body of multi-millionaire A. T. Stewart was stolen from St. Mark's Churchyard. The ghoulish crime, the chase for the culprits, the years-long ransom negotiations, and the demise of the Stewart retail empire fed a media frenzy. When the widow Stewart eventually exchanged \$20,000 for a burlap bag of bones on a country road, not everyone was convinced that the remains were truly those of "The Merchant Prince of Manhattan," the department store pioneer who had risen from the flood of Irish immigration to a place alongside names like Astor, Vanderbilt, and Rockefeller. As Bag of Bones details the futile tactics used by police to identify the grave robbers, it also unveils the villainy of Judge Henry Hilton, the Stewart family advisor who not only interfered in the case repeatedly but also dismantled a once-great business empire . . . all the while profiting quite nicely. By the end of this fascinating slice of history, one is left to wonder who displayed the greater evil: the grave robbers or Judge Hilton. This amazing work, first published in 1909, is divided into five parts. The first is a discussion of ancient beliefs and the unifying truths that are found in all of them. The second concentrates on the basic concepts of spiritism such as the immortality of the soul, the purpose of life, reincarnation, God, and death. The third section explores deeper spiritist concepts such as fluids and magnetism, spiritual phenomena, nature and science, evolution of the spirit, dangers of Spiritism, and charlatanism. The fourth part discusses related topics to the spiritual world such as errant souls, higher life, inferior spirits, providence, free will, and hell. The last section discusses ethical topics such as moral life, faith, consolation, wealth, poverty, and charity. Matt Johnson had a life he was happy enough with. Could he learn to be happy with his death as well? This zombie story is written from his point of view-- from normal, every-day security guard, to brain-eating, mindless zombie.

Poetry. "HIDDEN DEATH, HIDDEN ESCAPE is an occulted text osmotically invading the public soil by spawning its cyclic seed in the most fertile territory. By an ingenious language, Liviu Georgescu's wayward helium imagination becomes an existential zone diving in the darkened nautical scars of being. His poems transmute the waters from the Transylvanian Alps to a scorpion running through a purgatorium. His poetry, in contrast to quotidian description, opens up a visionary fervor invoking a tradition which runs from Blake and Holderlin through T.S. Eliot and Breton into the present"-Will Alexander.

Tackles a human problem we all share?the fate of the earth and our role in its future Confident that your personal good deeds of environmental virtue will save the earth? The stories we encounter about the environment in popular culture too often promote an imagined moral economy, assuring us that tiny acts of voluntary personal piety, such as recycling a coffee cup, or purchasing green consumer items, can offset our destructive habits. No need to make any fundamental structural changes. The trick is simply for the consumer to buy the right things and shop our way to a greener future. It's time for a reality check. *Ecopiety* offers an absorbing examination of the intersections of environmental sensibilities, contemporary expressions of piety and devotion, and American popular culture.

Ranging from portrayals of environmental sin and virtue such as the eco-pious depiction of Christian Grey in *Fifty Shades of Grey*, to the green capitalism found in the world of mobile-device “carbon sin-tracking” software applications, to the socially conscious vegetarian vampires in *True Blood*, the volume illuminates the work pop culture performs as both a mirror and an engine for the greening of American spiritual and ethical commitments. Taylor makes the case that it is not through a framework of grim duty or obligation, but through one of play and delight, that we may move environmental ideals into substantive action.

Gerald Stern, National Book Award-winning poet, creates a powerful new prose book in his ninth decades, as he contemplates mortality. In his characteristic audacious, uncompromising, funny, and iconoclastic style, Stern looks back at his life and forward to how he will end his days. Will he be cremated—against the tenets of Judaism—or buried, and if buried where? He visits synagogues to find answers to questions that are unanswerable. He examines his identity—a Jew born of immigrant parents and raised somewhat haphazardly in Pittsburgh, on account of the death of his sister, Sylvia, at ten, when the author was eight years old. Her death lingers over *Death Watch*, as much as the author’s own inevitable demise. Stern wrestles with his identity in Judaism, his name uprooted from its origins, as so much of his life will be willfully disrupted from the expectations of his parents and the norms of a predictable path. Stern recounts his life, itself “a grand digression,” which takes him from Pittsburgh, to the Army, to Paris on the GI Bill, and back to the US, where he immerses himself in the literary culture around him. *Death Watch* – which Stern describes as an account of a final journey – reads instead as a vivid, passionate, and, at times, whimsical look at the gamble of living life to its fullest, choosing the life of a poet, philosopher, prophet, lover, radical, and perpetual trouble-maker. He revels in his past love affairs, the many women beloved in his life. He recollects books that occupy his recent reading—the work of W.G. Sebald, Blaise Cendrars, and Louis-Ferdinand Céline—and how memory is always at the heart of literary accomplishment and what creates the staying power of great literature. Stern’s early and traumatic loss of his older sister provides the occasion to imagine what her life might have been had she lived. Sylvia, the painful loss, which his family refused to talk about, erasing her life, as they erased her death in their inability to cope with its magnitude. Sylvia, nonetheless, lives on with Stern—his everlasting muse, his eternal companion. In a lighter vein, the author tells about his misbehavior—beginning in the sixth grade when he discovers his teacher wears a wig to cover her bald head, a secret he immediately spreads to the entire school. On a visit to Camden, New Jersey, he visits the Whitman home and takes a moment to lie down in Whitman’s bed. In the William Carlos Williams Library, he walks out with Williams’s hat, which on second thought he returns to its rightful place. As a teacher at Temple University, he lectures the institution’s president in front of a faculty assembly on the mistakes in grammar and English usage he made in addressing the meeting. But while walking the edge, speaking out for

justice, Stern never falters in his commitment to poetry, his dedication to writing, and his championing of fellow writers. *Death Watch* gives us a writer at the peak of his powers—no holds barred. Stern joins the likes of writers such as Tony Judt, Oliver Sacks, Jean-Dominique Bauby, and Randy Pausch, who, while contemplating mortality, celebrate lives lived in full tilt. In the case of Gerald Stern, his memoir portrays a life lived at the edge of boundaries, with the intoxication of poetry and love, and with the compassion of a writer who ends *DEATH WATCH* with a celebration of orangutans.

This is a tome of poetry over 350 pages in length, that covers all aspects of life that the bleeding heart of a poet can long to appreciate. Desperation breeds good poetry, and lovesickness breeds desperation, so the lovelorn heart often speaks plainly, and tells stories of the paths we tread.

Dr Korsten provides a biographical sketch of Thomas Baker and reconstructs his library of 4300 titles.

Cancer sucks, death sucks even more. But we humans don't have the power to stop either of them from messing with our lives. They enter our lives whenever and wherever they choose to. Cancer is so common that each one of us have known someone who has dealt with the disease; some of us have lost a loved one to cancer. Common does not always mean simple, and it also does not mean we know everything about it. The diagnosis of cancer, regardless of the disease's curability, is almost always nerve-wracking, even for healthcare providers like the main character of this book who is a veteran nurse. This book is written in first person; the subject is a middle aged woman who had been separated from her boyfriend some thirty years ago and then after three decades when she searches for an oncologist for treatment of an aggressive cancer that she was recently diagnosed, she finds her ex-boyfriend's name and decides to see him. That brings back the memory of their past together, and she starts going through her old diary she had written some thirty years in the past. Part of the story is set in Nepal (from the diary) and the other part is set in the USA (this takes place after her cancer diagnosis). The main character of the story was born with 'Manglik' cosmic influencer, meaning that the planet Mars "mangal Graha" was in such position in the solar system at the time of her birth that it would have strong negative effect on her husband if she married a man who was non-Manlik (a person born at the time when the planet Mars was not in such position.) What happens next changes the lives of the main characters.
