This is a comprehensive text covering information on the initial assessment and stabilization of both single-system and multiple-system pediatric injuries. It provides current information about clinical nursing practices and is a source of information from which emergency department nurses can gain familiarity with pediatric trauma nursing principles that incorporate developmental factors specific to children. Strategies to assist the emergency department nurse in working with families of pediatric trauma victims are provided.

"...[written by one of] the world's foremost experts in transcultural nursing. This...much-anticipated comprehensive compendium of evidence-based and best practices...contains exceptionally useful...material for nurse educators in academic and staff development settings and...their students." ó Margaret M. Andrews, PhD, RN, FAAN, CTN Director and Professor of Nursing School of Health Professions and Studies University of MichiganñFlint Editor, Online Journal of Cultural Competence in Nursing and Healthcare "...a valuable new resource to support efforts...to provide high-quality care that is culturally appropriate... gives the professional nurse a road map for engaging in culturally appropriate, patient-centered, and high-quality care." óGeraldine (Polly) Bednash, PhD, RN, FAAN Chief Executive Officer and Executive Director American Association of Colleges of Nursing "This ambitious book is a must-read synthesis of the existing knowledge related to transcultural nursing education... builds cultural competence in individuals and

Incorporating evidence-based, best-practice protocols, it provides course syllabi and a wealth of additional teaching aids for all education arenas from foundation classes through in-service domains. The text provides a variety of creative strategies for integrating TCN into academia and practice as a separate course or across existing courses (foundation and life span courses, mental health, pharmacology, nutrition, research, community health, critical care, and transcultural concepts in simulation). Pedagogical tools include cultural assessment instruments, self-learning modules, role plays, unfolding case scenarios, continuing education, lesson plans, course syllabi, critical thinking exercises, and evidence-based practice information. The book will be of value to nursing students, faculty, educators in staff development settings, and all other professional nurses who wish to provide culturally competent care for their patients. It is a companion volume to the authorís text *Transcultural Health Care Models: Application in Nursing Education, Practice, and Administration*. Key Features: Comprises

Injury is an increasingly significant health problem throughout the world, accounting for 16 per cent of the global burden of disease. The public health burden of death and disability from injury is particularly notable in low and middle income countries. These guidelines seek to establish practical and affordable standards applicable to injury or trauma care worldwide, whether in rural health posts, small hospitals, hospitals staffed by specialists or tertiary care centres. It sets out a list of key trauma treatment services designed to be achievable in all settings, and defines the various human and physical resources required. It also includes a number of recommendations for methods to promote such standards including training, performance improvement, trauma team organisation and hospital inspection.

Medical-Surgical Nurse Exam Practice Questions are the simplest way to prepare for the Medical-Surgical Nurse Examination. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. If someone has never taken a practice test, then they are unprepared for the types of questions and answer choices that they will encounter on the official test. There is a tremendous advantage to someone taking the test that is already familiar with the questions and answer choices. Another advantage of taking practice tests is that you can assess your performance and see if you need to study and practice more, or if you're already prepared enough to achieve success on your test day. If you do well on the practice test, then you know you're prepared. If you struggle on the practice test, then you know you may still have more work to do to get prepared. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our Medical-Surgical Nurse Exam Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test

It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when y

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities
