Neonatal Nursing in Australia and New Zealand: Principles for Practice uniquely reflects the local practice, context and standards of neonatal nursing in Australia and New Zealand. Edited by Victoria Kain and Trudi Mannix, the content spans all neonatal care settings, addressing the considerations of all levels, including special care and intensive care units, while highlighting the collaborative nature of neonatal care and interdisciplinary teamwork within this environment. The text comprehensively addresses ANZ-specific perspectives, including the neonatal context for First Peoples; the neonatal nurse practitioner and advanced practice roles; workplace culture; newborn screening, resuscitation, retrievals and transport; stabilisation of the high-risk newborn; the range of disorders by body system; legal and ethical issues; and end-of-life care in the neonatal unit. Supported by international and ANZ neonatal network data Aligned to the Australian College of Neonatal Nurses and New Zealand Nurses Organisation Standards Key learning objectives emphasised Nursing and midwifery-focused Case studies provide the vital link between theory and practice Clinical Practice and Reflections features further reader insight and knowledge Evidence-based practice research underpins all chapters Family-centred care is reinforced throughout Evolve resources included to enhance teaching and learning: eBook on VitalSource Student and Lecturer resources, for each chapter: Test banks of MCQ and short answer questions Additional online case studies Journal articles related to practice and critical thinking questions Answer guide to in-text and online case study, test bank and article questions

The Customer Experience BookHow to design, measure and improve customer experience in your businessPearson UK Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

Most patients with critical cardiac or thoracic conditions will at some stage pass through the cardiothoracic critical care unit. Critical care presents more complex clinical data than any other area of medicine. Continuous monitoring makes diagnosis easy and further information can be easily obtained via a variety of diagnostic tools. Core Topics in Cardiothoracic Critical Care will guide clinicians from all disciplines in the management of cardiothoracic patients, demystifying the critical care unit and providing the key knowledge in a concise and accessible manner. The central section is a detailed discussion of the management of each physiologic system; additional sections cover admission, general considerations in cardiothoracic critical care, procedure-specific care, discharge and follow-up, structure and organization of the unit, and ethical and legal issues. All aspects of the overall care of the critically ill cardiothoracic patient are explained concisely and comprehensively by experts in the field.

Packed with precise, step-by-step checklists, detailed illustrations, and informative chapter explanations, the Electrical Inspection Manual, 2014 Edition identifies important Code rules and provides guidance on how-to organize checklists by occupancy type to increase thoroughness and decrease the likelihood of overlooking potential problems. Written by certified electrical inspectors, and endorsed by the National Fire Protection Association (NFPA) and the International Association of Electrical Inspectors (IAEI), this fully illustrated manual explains significant tasks, defines terms, outlines key questions, and provides a concise overview of the electrical inspection process. The training manual is intended to assist electrical inspectors as well as anyone performing a review for Code compliance in advance of a professional inspection. This audience may include, but is not limited to: designers, insurance inspectors, architects, installers, project managers, and safety officers.

An essential guide to all aspects of car painting, for keen amateurs and professionals alike. With step-by-step instructions and illustrations throughout, Car Painting covers the entire process - from panel preparation to spraying and painting techniques - offering guidance and tips on painting your car to a professional standard. With a focus on safety throughout, the book also covers: selecting and understanding paint, including important legislation; materials and equipment, and building your own paint booth; preparing your car, including parts removal, sanding, chemical stripping and rust proofing; masking and priming; painting techniques - spraying, clear coats and drying; stripes and custom touches; polishing, reassembly and preservation and finally, troubleshooting. Superbly illustrated with 200 colour photographs.

Know the critical aspects of buying and maintaining a car Purchasing a new or used car is always a financially risky endeavor. Teach Yourself Car Buying and Maintenance offers you tips on whether to buy new or used and how to find a good deal. You will also learn how to take care of your new purchase--from washing, polishing, and checking oil to inspecting tires for safety and removing minor scratches.

This volume constitutes the refereed proceedings of the Second International Conference on HCI in Business, HCIB 2015, held as part of the 17th International Conference on Human-Computer Interaction, HCII 2015, which took place in Los Angeles, CA, USA, in August 2015. HCII 2015 received a total of 4843 submissions, of which 1462 papers and 246 posters were accepted for publication after a careful reviewing process. The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. They thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The 72 papers presented in this volume address the following topics: social media for business, enterprise systems, business and gamification, analytics, visualization and decision- making, industry,

academia, innovation, and market.

The Automotive Facilities Inspector Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: maintenance and repair of motor vehicles; inspection and investigative techniques; preparing written material; understanding and interpreting written material; and more.

Tourism in Turbulent Times presents an international review of the challenges faced by the world's largest industry and governments around the world to provide safe and enjoyable experiences for visitors. The book draws on the background and expertise of contributors from 11 countries, representing scholars, government officers and industry practitioners. It addresses traditional concerns for tourism (such as crime) as well as emerging challenges posed by the global movement of infectious disease and terrorism. These topics are examined by specialists who share a view that tourism can weather turbulent times through adopting appropriate risk management strategies and continuing to provide quality service for customers. This book differs from other texts on the market by including a large group of tourism industry practitioners as contributors. These writers practice the principles they espouse and have critical insight into the real world issues facing the tourism industry. They are also very committed to finding best practice solutions to the challenges facing their industry. The book will therefore be of particular interest to tourism managers and policy makers since it provides relevant information for the important decisions they need to make.

Throwing the net wide to include medicine, law, psychology, sociology, education and hard science means that a wide range of perspectives are available to address global business, insurance, security, and policy questions in this emerging area of tourism. Shocks such as the terrorist attacks of 11 September 2001, SARS and the more recent Asian Tsunami have made the tourism industry very conscious of the need to protect its customers. This book highlights the positive responses made by various sectors of the industry at destination, national and international levels. It also examines the growing adventure tourism market, characterised by small operators who need good risk management practices to weather adverse global events, as well as run a financially viable small business. Such a wide set of perspectives will be very valuable to both students and tourism professionals.

The safe transfer of all hospital patients, especially those who are critically ill, is of crucial importance, demanding organisational, as well as clinical skills. Safe Transfer and Retrieval of Patients (STaR) is aimed at all health care workers involved with inter and intra-hospital transfers. It provides a much needed structured approach to transfer medicine, together with sound guidance on relevant clinical procedures. The second edition has been extensively revised in line with new developments in transfer medicine. The book has been redesigned with five distinct sections covering: the principles of the STaR structured approach to transfers the management of the transfer or retrieval practical procedures related to transfer medicine an overview of clinical care during the assessment and stabilisation phases of transfer. the legal and safety aspects of transfers, specific differences in helicopter transfers and transfers involving children A new chapter, the infectious or contaminated patient, has been added, in light of current concerns around the potential transfer of infection between patients and staff. The major revisions to this STaR coursebook bring it

Read Free Vehicle Handover Checklist

into line with the latest thinking on patient transfers, making it an invaluable guide for anyone involved in this aspect of health care. This text presents a four-step approach for applying communicative concepts to driving automation, including: scoping, piloting, designing, and testing. It further provides experimental data on how practical human-human communication strategies can be applied to interaction in automated vehicles. The book explores the role of communication and the nature of situation awareness in automated vehicles to ensure safe and usable automated vehicle operation. It covers the issue of interaction in automated vehicles by providing insight into communicative concepts, the transfer of control in human-teams, and how these concepts can be applied in automated vehicles. The theoretical framework is built on by presenting experimental findings, design workshop output and providing a demonstration of prototype generation for automated assistants that addresses a wide range of performance outcomes within human-machine interaction. Aimed at professionals, graduate students, and academic researchers in the fields of ergonomics, automotive engineering, transportation engineering, and human factors, this text: Discusses experimental findings on how practical human-human communication strategies can be applied to interaction in automated vehicles. Provides a four-step approach for applying communicative concepts to driving automation, including: scoping, piloting, designing and testing. Explores the role of distributed situation awareness in automated vehicles. Covers communication and system awareness in response to multiple complex road scenarios. Provides design guidelines for automation-human handover design.

Household Inventory Record is a new readymade in the series of Robert Frank's late visual diaries. Composed of polaroids, the thin and upright volume continues the journey into Frank's realm and imagery, showing us snapshots from his travels, of his friends and everyday curiosities.

Customer Experience (CE) is becoming seen as a key component of business strategy, yet knowing the practical steps of what to do can be tricky. The Customer Experience Book helps you understand where you are now, what to do, and how to improve for your business. From Customer Journey Mapping to using Big Data, this is the ultimate Customer Experience manual for businesses, whatever the size of your company. Split into two parts, you'll discover: • Why customer experience is so important in business – and how it applies to you • How to use customer experience tools in your business – step by step guides on how to use CX metrics and how to learn from them Alongside the theory and practical how-to guidance, there will be a range of examples of 'thinking differently' about everyday situations to engage the reader. Plus, with case studies from International Companies, readers will discover not only what works well but also the hard lessons they have learned. The Customer Experience Book shows you how to understand, measure and improve customer experience in your business, whatever your level.

This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. Further, it covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is placed on smart technologies and automation in transport, and on the user-centered, ergonomic and

sustainable design of transport systems. The book, which is based on the AHFE 2019 International Conference on Human Factors in Transportation, held on July 24-28, 2019, in Washington D.C., USA, mainly addresses the needs of transportation system designers, industrial designers, human-computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists whose work involves traffic safety, management, and sustainability issues in transport.

"This book provides information on how to rebuild and modify GM 4L80E transmissions"--

This book focuses on the principles of PHC and Retrieval medicine and the continuum of care of the critically injured trauma patient in the field. It is case based and uses real pre-hospital and retrieval situations, presented in question format followed by an extensive discussion highlighting key areas of the specialty. The questions and answers are each 3-4 pages in length and most are accompanied by a photo from author archives/real events. The questions have been divided into those with a predominantly pre-hospital theme and those based around retrieval medicine. A third section covers ser

No motorcycle manufacturer is more closely associated with one type of engine than BMW: the air-cooled boxer twin or 'airhead'. It was included in BMW's very first motorcycle in 1923 and virtually every machine the company made, of every type, from radical road bike to TT winner, to land speed record holder, to 1970s style icon and even to the creation of an all-new adventure bike class with the R 80 G/S, right up to the mid-1990s. Phil West celebrates the success of the BMW airhead twin motorcycles. This book, with over 290 photographs, includes a history of the company pre- and post-War; the personalities behind the development of the bikes; profiles of each of the 'R' bikes in turn, including detailed specification guides and production numbers. These wonderful machines are regularly celebrated and now BMW itself is harking back to them with an all-new series of machines.

This comprehensive resource book, the key text for the Gold Standards Framework (GSF) Programme, supports and enables all primary health professionals, and all those involved in palliative care, to make improvements in care provided for their patients, as recommended in the NICE guidance on Supportive and Palliative Care. It aims to strengthen the role, confidence, systems and skills of primary healthcare teams for the delivery of palliative care and patient support. The GSF, recommended and promoted by the NHS End of Life Initiative, Modernisation Agency and Macmillan, is already used by over 1000 teams in the UK, and is now being offered to every primary care team to improve end-of-life care for all.

Whether you're a newcomer to the ICU or a seasoned practitioner, Oh's Intensive Care Manual delivers the practical, expert answers you need to manage the conditions you see every day in the intensive care unit. This highly esteemed,

bestselling medical reference book presents comprehensive detail on each topic, while maintaining a succinct, accessible style so this information can be seamlessly incorporated into your daily practice. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Access everything you need to know about disease processes and their management during the course of ICU rotations. Gain valuable insight into the consensus of practice and standard of ICU care as followed in the UK, Europe, India, and Australia. Take advantage of expert advice on practical issues that will be encountered on a day-to-day basis in the ICU, as well as common pitfalls in treatment and management emphasized in each chapter. Overcome the latest challenges in intensive care medicine. Ten brand-new chapters in this edition include: Palliative Care; ICU and the Elderly; Health Care Team in Intensive Care Medicine; Preparing for Examinations in Intensive Care Medicine; Ultrasound in the ICU; ECMO for Respiratory Failure; ECMO for Cardiac Failure; Cirrhosis and Acute-on-Chronic Liver Disease; Solid Tumours and their Implications in the ICU; and Delirium. Optimize patient outcomes through an even greater focus on clinical management strategies. Quickly locate essential information with an increased number of summary boxes, tables, and charts, and a new chapter organization that expedites reference.

Over the past two decades, the healthcare community increasingly recognized the importance and the impact of medical errors on patient safety and clinical outcomes. Medical and surgical errors continue to contribute to unnecessary and potentially preventable morbidity and/or mortality, affecting both ambulatory and hospital settings. The spectrum of contributing variables-ranging from minor errors that subsequently escalate to poor communication to lapses in appropriate protocols and processes (just to name a few)-is extensive, and solutions are only recently being described. As such, there is a growing body of research and experiences that can help provide an organized framework-based upon the best practices and evidence-based medical principles-for hospitals and clinics to foster patient safety culture and to develop institutional patient safety champions. Based upon the tremendous interest in the first volume of our Vignettes in Patient Safety series, this second volume follows a similar vignette-based model. Each chapter outlines a realistic case scenario designed to closely approximate experiences and clinical patterns that medical and surgical practitioners can easily relate to. Vignette presentations are then followed by an evidence-based overview of pertinent patient safety literature, relevant clinical evidence, and the formulation of preventive strategies and potential solutions that may be applicable to each corresponding scenario. Throughout the Vignettes in Patient Safety cycle, emphasis is placed on the identification and remediation of team-based and organizational factors associated with patient safety events. The second volume of the Vignettes in Patient Safety begins with an overview of recent high-impact studies in the area of patient safety. Subsequent chapters discuss a broad range of topics, including retained surgical items, wrong site

procedures, disruptive healthcare workers, interhospital transfers, risks of emergency department overcrowding, dangers of inadequate handoff communication, and the association between provider fatigue and medical errors. By outlining some of the current best practices, structured experiences, and evidence-based recommendations, the authors and editors hope to provide our readers with new and significant insights into making healthcare safer for patients around the world.

This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. Further, it covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is placed on smart technologies and automation in transport, and on the user-centered, ergonomic and sustainable design of transport systems. The book, which is based on the AHFE 2018 International Conference on Human Factors in Transportation, held in Orlando, Florida, USA on July 21–25, 2018, mainly addresses the needs of transportation system designers, industrial designers, human–computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists whose work involves traffic safety, management, and sustainability issues in transport.

Caregiving is inevitably fraught with complex issues emotional as well as medical, financial, and legal. The ABA/AARP Checklist for Family Caregivers by Sally Balch Hurme can help organize the responsibilities that caregivers face. In one place, you'll be able to record and update the myriad details you need to keep track of. And if you don't know where to start, this invaluable tool tells you, step by step, what you need and why. You can easily personalize the to-do lists, either in the book or electronically, and have them available for quick reference for your caregiving team family, friends, aides, and medical, financial, and legal professionals. This new book third in the Checklist series from AARP and the ABA will save you time and simplify the daunting tasks of caregiving. Hurme shows you how to become a trusted steward without losing your sanity. A companion to the PBS documentary (June 2015) and Amy Goyer's ABA/AARP Juggling Life, Work, and Caregiving."

British Medical Association Book Award Winner - Young Authors Award of the Year 2018 Pre-hospital Emergency Medicine at a Glance offers healthcare students and trainees the essential theoretical knowledge and practical skills relevant to the provision of immediate care outside of the hospital. This concise text provides information on the principles of managing acutely unwell patients with life-threatening injuries at the scene of their accident, all in highly-

illustrated double-page spreads to help explain key messages. This brand new title: Looks at the ways in which pre-hospital care is organised and delivered in the United Kingdom Explores some of the most common incidents that pre-hospital care teams attend to, including major trauma as well as cardiac arrests Includes an illustrated introduction to some of the many practical procedures pre-hospital care teams must be able to perform including resuscitative thoracotomy and rapid sequence induction of anaesthesia Takes into account the multi-disciplinary nature of the specialty Features a section on careers within pre-hospital care for doctors and paramedics Pre-hospital Emergency Medicine at a Glance is the perfect companion for medical students and junior doctors interested in learning more about pre-hospital care, as well as for paramedic students and paramedics who practise in the pre-hospital environment every day.

Endorsed by the College of Emergency Nursing Australasia CENA is the peak professional association representing emergency nurses and has endorsed this text in recognition of the relevance it has to emergency nursing across Australasia. Led by an expanded editorial team of internationally recognised clinicians, researchers and leaders in emergency care, the 3rd edition of Emergency and Trauma Care for Nurses and Paramedics continues to be the foremost resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary emergency care. The text provides nursing and paramedicine students and clinicians with the opportunity to understand the best available evidence behind the treatment that is provided throughout the emergency care trajectory. This unique approach ultimately seeks to strengthen multidisciplinary care and equip readers with the knowledge and skills to provide safe, quality, emergency care. The 3rd edition builds on the strengths of previous editions and follows a patient journey and body systems approach, spanning the pre-hospital and hospital environments. Additional resources on evolve eBook on VitalSource Instructor resources: PowerPoint slides Test bank Paramedic test bank Case study questions and answers Image collection Additional case studies with answers and rationales Additional paramedic case studies with answers and rationales Student and Instructor resources: Additional case studies Additional paramedic case studies Videos Expanded editorial team, all internationally recognised researchers and leaders in Emergency Care Chapter 6 Patient safety and quality care in emergency All chapters revised to reflect the most up-to-date evidence-based research and practice Case studies and practice tips highlight cultural considerations and communication issues Aligns to NSQHSS 2e, NMBA and PBA Standards An eBook included in all print purchases As information systems become ever more pervasive in an increasing number of fields and professions, workers in healthcare and medicine must take into consideration new advances in technologies and infrastructure that will better enable them to treat their patients and serve their communities. Healthcare Administration: Concepts, Methodologies,

Tools, and Applications brings together recent research and case studies in the medical field to explore topics such as hospital management, delivery of patient care, and telemedicine, among others. With a focus on some of the most groundbreaking new developments as well as future trends and critical concerns, this three-volume reference source will be a significant tool for medical practitioners, hospital managers, IT administrators, and others actively engaged in the healthcare field.

#1 NEW YORK TIMES BESTSELLER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. “The kind of book that can be life-changing.” —The New York Times “Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank.” —USA Today **DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.**

Critical care in obstetrics is an upcoming specialty in the developing countries. This book is first of its kind as there are very few books written on this subject. The book discusses various aspects of critical care in obstetrics starting from the basic principles, physiology, ethics, monitoring and organization of a critical care unit. The various chapters cover management of life threatening illnesses involving various organ systems of the body of a pregnant woman. Furthermore, the management of a pregnant woman is unique as it involves not only management of the patient but the developing fetus in her womb as well. This book aims to help the obstetricians, postgraduate students and critical care providers with the management protocols in dealing with critically ill pregnant women.

Are you a professional woman looking to buy your first house? Should you look for a cheap home loan or the right home loan ?Are you overwhelmed by all the information or lack of it?Smart Women, Smart Home Loans is the essential guide for every woman who wants to choose the right home loan based on her needs. Conversations about home loans typically focus on cheap interest rates. This book encourages you to think about home loans beyond low interest rates. It is packed with essential information about the mortgage industry, the process involved and your dream team and includes real-life examples to help you make smart choices.Obu Ramaraj advocates the need for women to be financially aware. With more women than ever stepping into the property market at a young age, they need to choose a loan on their terms, with a thorough understanding. Everyone is looking for information to guide them – this is the book.

Features recommendations and ratings on hundreds of small, medium, and large-sized cars based on quality, economy, performance, and comfort standards, with judgments on crash protection, and assessments of available options

Driving automation and autonomy are already upon us and the problems that were predicted twenty years ago are beginning to appear. These problems include shortfalls in expected benefits, equipment unreliability, driver skill fade, and error-inducing equipment designs. Designing Interaction and Interfaces for Automated Vehicles: User-Centred Ecological Design and Testing investigates the difficult problem of how to interface drivers with automated vehicles by offering an inclusive, human-centred

Read Free Vehicle Handover Checklist

design process that focusses on human variability and capability in interaction with interfaces. This book introduces a novel method that combines both systems thinking and inclusive user-centred design. It models driver interaction, provides design specifications, concept designs, and the results of studies in simulators on the test track, and in road going vehicles. This book is for designers of systems interfaces, interactions, UX, Human Factors and Ergonomics researchers and practitioners involved with systems engineering and automotive academics. "In this book, Prof Stanton and colleagues show how Human Factors methods can be applied to the tricky problem of interfacing human drivers with vehicle automation. They have developed an approach to designing the human-automation interaction for the handovers between the driver and the vehicle. This approach has been tested in driving simulators and, most interestingly, in real vehicles on British motorways. The approach, called User-Centred Ecological Interface Design, has been validated against driver behaviour and used to support their ongoing work on vehicle automation. I highly recommend this book for anyone interested, or involved, in designing human-automation interaction in vehicles and beyond." Professor Michael A. Regan, University of NSW Sydney, AUSTRALIA

Neonatal, Adult and Paediatric Safe Transfer and Retrieval is a new and vital instalment in the blended learning course from the Advanced Life Support Group (ALSG), which aims to provide hospital staff at all levels with essential information on the inter- and intra-hospital transfer of both child and adult patients. This essential manual covers the basics of mobile medicine, the elements of transfer, patient and team safety, and the practical and clinical considerations associated with the patient transfer process. Each chapter makes use of checklists, practical examples and content summaries to help readers understand and overcome the challenges of both adult and paediatric patient transfers. Combines Paediatric and Neonatal Safe Transport and Retrieval (PaNSTaR) and the (Adult) Safe Transport and Retrieval (STaR) into a single volume (NAPSTaR) Written and edited by an expert team of specialists from across the UK Complements Advanced Paediatric Life Support and Prehospital Paediatric Life Support Neonatal, Adult and Paediatric Safe Transfer and Retrieval is a must-have resource for doctors, nurses, paramedics and healthcare professionals involved in patient transfer and those in ALSG courses in patient transport.

From the publishers of the market-leading at a Glance series comes a wide-ranging and succinct overview of the key concepts of emergency care. Emergency Nursing at a Glance uses the unique and highly visual at a Glance format to convey vital information quickly and efficiently, ensuring that nursing students have access to all the important topics they need for an emergency care placement. This highly visual, easy-to-read guide is the ideal companion for anyone entering fields involving urgent or unscheduled care. •Includes all aspects of emergency care, including trauma, minor injury, triage processes, patient assessment, common emergency presentations, as well as legal, ethical and professional issues. •Covers care of adults, children, and those with learning disabilities and mental health conditions •Presented in the bestselling at a Glance format, with superb illustrations and a concise approach Emergency Nursing at a Glance is an invaluable resource for nursing students, newly qualified nurses and other healthcare professionals working in emergency departments, urgent care centres, minor injury units and walk-in centres.
