Regardless of the subject matter, our studies are always searching for a sense of the universal in the specific. Drawing, etchings and paintings are a way of communicating ideas and emotions. The key word here is to communicate. Whether the audience sees the work as laborious or poetic depends on the creative genius of the artist. Some painters use the play of light passing through a landscape or washing over a figure to create an evocative moment that will be both timeless and transitory. The essential role of art remains what it has always been, a way of human expression. This is the role that our participants concentrate on as they discuss art as the expression of the spirit, a creative act through which the artist makes manifest what is within him. Spirit suggests the unity of feeling and thought. Avoiding broad generalities, our participants address specific areas in orchestration with music, architecture, literature and phenomenology. Profs. Souiller, Scholz, Etlin, Sweetser, Josephs show us at what point art is an intimate, profound expression and the magic of a civilization as a whole, springing from its evolving thoughts and embodying ideals, such as the Renaissance, the Baroque, Modernism and at what point it reflects the transformation of a particular society and its mode of life.

Texas has always lived up to its nickname of the Lone Star state; its rough, tough frontier status and its constant wars with Mexicans and American Indians made it the epitome of the Wild West. This classic account of the border wars of white settlers against the Indians was written in 1912, when the conflicts were well within living memory, and its style reflects the triumphalist view of America's Anglo-Saxon manifest destiny, and its God-given right to lord it over 'inferior savages'. None the less, DeShields supports the conciliatory policies of Texas's favourite son, Sam Houston. DeShields' work, which used Texas' earliest historical sources such as John Henry Brown, John W. Wilbarger, and Henderson King Yoakum, is made invaluable by his extensive use of other primary source material such as his numerous turn-of-the-century interviews and correspondence with early Texas Rangers and frontiersmen who were yet living. Many of his

accounts are found nowhere else in publications of Texas history and thus provide fresh insights into the history of Texas' wars against the Indians.

Wine is becoming increasingly popular in the Anglophone world and there are many books available which describe how and where it is made. However, none address the fundamental questions of different structures of production and how

the consumer relates to the product - this book is the first to do just that. *Wine and Society: the cultural and social context of wine production and consumption* looks at the relationship between wine production and marketing, focussing in consumer behaviour and cultural attitudes. Divided into four parts, it examines the context of wine production, the wine consumer and the social context of wine, discussing the following themes: * That the core of wine production and consumption is shaped by historical, geographical and cultural factors. * Wine production - European and new world looking at the different kinds of producer and how the varying background of each shapes their perspective on what they produce * Terroir and appellations: why demarcation and sense of place became important, how they are used to achieve marketing differentiation, and the 'benefits' (or otherwise) to the customer. * The contemporary wine consumer and lifestyle factors - looking at wine clubs, tourism, education, culture and literature * The politics and economics of wine - from supporting rural industries in France to protecting customers from deception and health risks. Suitable for third year and post-graduate students of hospitality, wine (both in production and marketing), wine tourism, gastronomy and related courses, it encourages students to think critically about the issues raised by using real life case studies and examples from around the world, also including press releases and marketing campaigns.
