With the realm being mysterious in every way possible, she discovers a lot about its past while falling in love at the same time. When an ancient threat tries to escape from their condemned lives, Jumvella has to find out where she fits in all of this. She discovers secrets about herself that started in her past and begins to wonder what she has to do in order to save her home. Since she is different from the others, trouble follows her no matter what...almost completely to her losing the people who mean the world to her.

This refreshingly frank handbook shows teachers how to close the achievement gap in their classrooms by teaching students innovative paths to academic success. Drawing on over 20 years' experience, Kelley presents straightforward strategies for helping learners improve their grades and test scores and experience greater school engagement—all while streamlining the teacher's work to yield maximum efficiency. Strategies include team-grading essays, using Socratic seminars and sworn statements, allowing for re-dos, and ruthlessly pruning assignments, among others. Often humorous and irreverent in tone, this guide will be the talk of the break room. Includes online digital content.

This popular, topically organized, and thoroughly updated child and adolescent

development text presents you with the best theories, research, and practical advice that developmentalists have to offer today. Authors David R. Shaffer and Katherine Kipp provide you with a current and comprehensive overview of child and adolescent development, written in clear, concise language that talks to you rather than at you. The authors also focus on application showing how theories and research apply to real-life settings. As a result, you will gain an understanding of developmental principles that will help you in your roles as parents, teachers, nurses, day-care workers, pediatricians, psychologists, or in any other capacity by which you may one day influence the lives of developing persons. It started two decades ago with CompStat in the New York City Police Department, and quickly jumped to police agencies across the U.S. and other nations. It was adapted by Baltimore, which created CitiStat—the first application of this leadership strategy to an entire jurisdiction. Today, governments at all levels employ PerformanceStat: a focused effort by public executives to exploit the power of purpose and motivation, responsibility and discretion, data and meetings, analysis and learning, feedback and follow-up—all to improve government's performance. Here, Harvard leadership and management guru Robert Behn analyzes the leadership behaviors at the core of PerformanceStat to identify how they work to produce results. He examines how the leaders of a variety of public organizations employ the strategy—the way the Los Angeles County Department of Public Social Services uses its DPSSTATS to promote economic independence, how the City of New Orleans uses its BlightStat to eradicate blight in city neighborhoods, and what the Federal Emergency Management Agency does with its FEMAStat to ensure that the lessons from each crisis response, recovery, and mitigation are applied in the future. How best to harness the strategy's full capacity? The PerformanceStat Potential explains all.

Throughout history, philosophers have attempted to unravel the mystery of life. People from many diverse traditions have been invited to sit face to face at the table of philosophy to engage in analytical and critical reflection in what Dr. John Morgan calls "the great questions of life." This book invites students to explore the meaning of life in an easy and understandable manner through the infamous character Professor Plotimus. The antics of Professor Plotimus make philosophy interesting, uncomplicated, and easy to grasp while deeply compelling . . . It allows our minds to wonder and listen to the wisdom of the ages that life has meaning and purpose if we only loosen the chains of dogma and venture out of our caves as we attempt to see life in a fresh way. --from the Preface by Linda Lewis Riccardi Adjunct Professor of Humanities and Philosophy, Reading Area Community College

Introduction to Catholic Theology is an accessible but in-depth examination of the ways in which Catholic theology is rooted in and informs Catholic practice. Weaves together discussion of the Bible, historical texts, reflections by important theologians, and contemporary debates for a nuanced look at belief and practice within the Catholic faith Provides an overview of all major theological areas, including scriptural, historical, philosophical, systematic, liturgical, and moral theology Appropriate for students at all levels, assuming no prior knowledge yet providing enough insight and substance to interest those more familiar with the topic Written in a dynamic, engaging style by two professors with more than 50 years of classroom experience between them

As our brains age, we're less likely to think as quickly or remember things as well as we used to. Research is now showing how the brain changes and adapts with age. You can use what we've learned and follow a few simple tips to help remember things and avoid scams. Perhaps the most common trouble people face as they age is remembering things. Park says it's important to acknowledge that your memory is fallible. "For medicines, driving directions or other things with specific details, don't rely on your memory," she says. "That's good advice for everybody, but especially for older adults." If you need to remember something important, write it down on a pad or use an electronic device like a personal digital assistant (PDA) that lets you store notes. With this incredible ebook discover: - What Does Elderly Caregiving Entail? - How to prepare for responsible and compassionate care! - Secrets to fighting loneliness - And More

This series is for maths teachers who want to develop their maths teaching skills. This book is for teachers and educators who want to develop their maths teaching skills where English is the language of instruction. It has been written by the international group of educators based at AIMSSEC, The African Institute for Mathematical Sciences Schools Enrichment Centre. The book provides practical classroom activities underpinned by sound pedagogy and recent research findings. The activities are designed for teachers working alone or in 'self-help' teachers' workshops. They are designed to develop mathematical thinking and offer immediate practical tools to help deliver this approach.

1915-1926 include: Proceedings of joint meetings with the American Conference of Pharmaceutical Faculties; 1927- , Proceedings of joint meeting with the American Association of Colleges of Pharmacy.

Now in its second edition, *Teaching and Learning through Reflective Practice* is a practical guide to enable all those involved in educational activities to learn through the practices of reflection. The book highlights the power that those responsible for teaching and learning have to appraise, understand and positively transform their teaching. Seeing the teacher as a reflective learner, the book emphasises a strengths-based approach in which positivity, resilience, optimism and high performance can help invigorate teaching, enhance learning and allow the teacher to reach their full potential. This approach busts the myth that reflection on problems and deficits is the only way to better performance. The approach of this new edition is an 'appreciative' one. At its heart is the exploration and illustration of four reflective questions: What's working well? What needs changing? What are we learning? Where do we go from here? With examples drawn from UK primary teacher education, the book reveals how appreciative reflective conversations can be initiated and sustained. It also sets out a range of practical processes for amplifying success. This book will be a must have for undergraduate and PGCE students on initial teacher training programmes. It will also interest practising teachers, teacher educators and those on continuing professional development courses.

This book constitutes the refereed proceedings of the 8th IFIP WG 8.5 International Conference on Electronic Participation, ePart 2016, held in Guimarães, Portugal, in September 5-8, 2016. The 14 revised full papers presented were carefully reviewed and selected from 31 submissions. The papers reflect completed multi-disciplinary research ranging from policy analysis and conceptual modeling to programming and visualization of simulation models. They are organized in four topical threads: theoretical foundations; critical reflections; implementations; policy formulation and modeling.

Dynamic Relationships invites us to step into the appreciative paradigm where the principles governing our actions and relationships offer a means for increased value and meaning in our lives and communities of work and play. They empower us to become a force for creating and sustaining life-affirming relationships and success in daily living.

Celia Ross explains how to provide quality reference help on issues from marketing to finance - for business people, students, and even business faculty.
