Reintroduces the concept of "world literature" in a truly global context, transcending past Eurocentrism. The study of world literature is on the rise. Until recently, the term "world literature" was a misnomer in comparative literature scholarship, which typically focused on Western literature in European languages. In an increasingly globalized era, this is beginning to change. In this collection of essays, Zhang Longxi discusses how we can transcend Eurocentrism or any other ethnocentrism and revisit the concept of world literature from a truly global perspective. Zhang considers literary works and critical insights from Chinese and other non-Western traditions, drawing on scholarship from a wide range of disciplines in the humanities, and integrating a variety of approaches and perspectives from both East and West. The rise of world literature emerges as an exciting new approach to literary studies as Zhang argues for the validity of cross-cultural understanding, particularly from the perspective of East-West comparative studies.

"The editors of the SAGE Handbook of Research in International Education have brought together an impressive array of scholars whose cutting edge research addresses the growing field of international education, from the experiences of K-12 schools around the world to the field of teacher education. This book raises important questions and should be read by a broad audience' - Kenneth Cushner, Executive Director of International Affairs and Professor of Education, Kent State University 'The editors of this admirable handbook have set out to produce a report on international education. Their consummate success in doing so gives those of us working in the field a new and invaluable resource. The editors may be academics but this is a book largely written by, about and for those whose job it is to teach

"internationally". No-one working in international education will fail to be provoked, challenged or inspired by the compelling arguments advanced within this authoritative volume' - Peter MacKenzie, Principal, Hiroshima International School 'The book is well organized in carefully integrated sections and chapters and the references alone are a valuable bibliographical tool. An indispensable work highly recommended for education reference collections and the libraries of individual researchers' - J.B.Thomas, Emeritus Professor of Educational Studies, Loughborough University Interest in the field of international education has never been more intense than at present. There are a rapidly increasing number of schools worldwide set up specifically to meet the demands of those parents who, through their own professional activities, wish to have their sons and daughters educated in schools that offer programmes based on international values. Such schools have embraced the promotion of international education as one of their major goals and, consequently, an increasing number of

organisations currently offer curricula that claim to be international in nature. Such global movements have created a parallel increase in the incorporation of forms of international education within national school systems throughout the world. This has resulted in wider forms of collaboration between schools in the public and private sectors, nationally and internationally, generating a much more substantial base of professional experience in the implementation of schemes for international education than had previously existed. This book analyses the origins, contributions and interpretations of international education. The authors identify approaches to research that will progress our knowledge and understanding of the field, and extend and even redraw it, on the basis of the research evidence presented. Content includes: - A historical overview of the ways in which the term "international education" has been interpreted - The theoretical interpretation of international education in its current context - International education in practice: exploration of the issues in terms of students, curricula, pedagogies and organising formal institutions - Conceptual challenges for international education in the future This handbook is an essential resource for those who are involved in the practice and academic study of international education. It will be of particular interest to researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools. 'This volume is another valuable SAGE contribution to the expanding literature on international education. Not all handbooks are described as essential reading but this one will be, and will become an indispensable work of reference highly recommended for education libraries (both academic and governmental) and for the bookshelves of individual researchers and all involved in international education...the three editors and their fellow authors can take a collective pride in having given us an excellent volume which very successfully completes a chronological and theoretical journey through the issues, practices and future questions presented by international research and practice in international education' - Journal of Research in International Education

The inspirational story of a group of teachers, parents, and students who face and overcome many challenges in their struggle to create a very unconventional school within a school. Though he never reached the lead actor status he labored so relentlessly to achieve, Warren Oates (1928–1982) is one of the most memorable and skilled character actors of the 1970s. With his rugged looks and measured demeanor, Oates crafted complex characters who were at once brazen and thoughtful, wild and subdued. Friends remember the hard-living, hard-drinking actor as kind and caring, but also sometimes as mean as a blue-eyed devil. Married four times, partial to road trips in his RV affectionately known as the "Roach Coach," and famous for performances for directors ranging from Sam Peckinpah to Steven Spielberg, Warren Oates remained a Hollywood outsider perfectly suited to the 1960s and 1970s counterculture. Born in the small town of Depoy in rural western Kentucky and reared in Louisville, Oates began his career in the late 1950s with bit parts in television westerns. Though hardly lucrative work, it was during this time Oates met renegade director Sam Peckinpah, establishing the creative relationship and destructive friendship that produced some of Oates's most unforgettable roles in *Ride the High Country* (1962), *Major Dundee* (1965), and *The Wild Bunch* (1969), as well as a leading part in *Bring Me the Head of Alfredo Garcia* (1974). Though Oates maintained a close association with Peckinpah, he had a penchant for working with a variety of visionary directors who understood his approach and were eager to enlist the subtle talents of the

consummate character actor. With supporting roles in *In the Heat of the Night* (1967), *The Hired Hand* (1971), *Badlands* (1973), *1941* (1979), and *Stripes* (1981), Oates delivered solid performances for filmmakers as diverse and talented as Norman Jewison, Peter Fonda, Terrence Malick, Steven Spielberg, and Ivan Reitman. Oates's offscreen personality was just as complex as his on-screen persona. Notorious for being a nightlife reveler, he was as sensitive and introspective as he was outgoing and prone to periods of exuberant, and at times illegal, excess. Though he never became a marquee name, Warren Oates continues to influence actors like Billy Bob Thornton and Benicio Del Toro, as well as directors such as Quentin Tarantino and Richard Linklater, all of whom have cited Oates as a major inspiration. In *Warren Oates: A Wild Life*, author Susan Compo skillfully captures the story of Oates's eventful life, indulgent lifestyle, and influential career.

The International Handbook of Leadership for Learning brings together chapters by distinguished authors from thirty-one countries in nine different regions of the world. The handbook contains nine sections that provide regional overviews; a consideration of theoretical and contextual aspects; system and policy approaches that promote leadership for learning with a focus on educating school leaders for learning and the role of the leader in supporting learning. It also considers the challenge of educating current leaders for this new perspective, and how leaders themselves can develop leadership for learning in others and in their organisations, especially in diverse contexts and situations. The final chapter considers what we now know about leadership for learning and looks at ways this might be further improved in the future. The book provides the reader with an understanding of the rich contextual nature of learning in schools and the role of school leaders and leadership development in promoting this. It concludes that the preposition 'for' between the two readily known and understood terms of 'leadership' and 'learning' changes everything as it foregrounds learning and complexifies, rather than simplifies, what that word may mean. Whereas common terms such as 'instructional leadership' reduce learning to 'outcomes', leadership for learning embraces a much wider, developmental view of learning.
